WLFL-TV 1st Quarter Public Service Report

Prepared by: Kim Rivenbark

Date Prepared: April 10, 2007

To Whom It May Concern:

The attached is a compiled list of program descriptions of public affairs shows, which WLFL produced to serve the community's interest during the 1st quarter (January 1st through March 31st 2007) of the broadcast calendar year.

Community Calendar:

WB 22 Community Calendar

Local non-profit organizations utilize this community service project to promote local community events and activities. The events and activities included support group meetings to talk about important issues, and charity events that help raise money for important causes. The Community Calendar airs daily at 10am. It is 60 seconds in length and is comprised of 3 announcements at 20 seconds each.

In the 1st quarter, WLFL aired approximately 55 announcements for a total of 55 minutes of community announcements.

Public Service Announcements:

In addition to the attached, WLFL aired public service announcements covering a number of topics which include the following subject matter: **Crime, Drugs/Alcohol, Education, Employment/Economy, Environment, Health, Youth/Teens, Volunteering, Fitness, Family and Government.** During the 1st quarter of 2007, WLFL aired approximately 7 hours of public service announcements. These public service announcements range from 10 seconds to 60 seconds in length. The public service announcements aired daily between sign on to sign off seven days a week

Locally produced Public Service Announcements:

We aired 2 locally produced Public Service Announcements during the 1st quarter for Black History Month.

Network produced Public Service Announcements:

We aired no Network produced Public Service Announcements during the 1st quarter.

Dental- If you have lost a tooth dental implants is the way to go. Your body grows around the tooth and it becomes a part of you for a very natural looking tooth. They can be done in a day, and the healing process is the same as taking out a tooth.

Prostate Cancer- Prostate Cancer is the most common malignancy affecting men but fortunately it is very curable. The American Cancer Society suggests that men begin screening at the age of 50. The earlier you receive treatment the better your chances are of a cure.

Other events

The CW Television Network programs

There were no WB Television Network programs that aired during the 1st quarter

Community Outreach –Schools

WFLA outreaches to schools through job shadowing day, where students from area schools spend the day at the station and learn what employees at a television do day to day.

WFLA does station tours for schools and scout troops.

News Kids

Each week we have a kid come into our studios and shoot a community service spot focusing on area kids events and activities.
