He asks why is the arrest rate so different for men of different races but not much different for women of different races? Bushway talks about how Zero Tolerance policies at schools may have contributed to the rates. He says at around age 23 most men age-out of the behaviors that are more likely to lead to arrests. Bushway also says society may need to reframe it's opinion of people who have been arrested, but not convicted. With so many experiencing at least one arrest in a lifetime, it is hard to imagine they are all potential criminals.</p>
