EAS filing 04-01-23 through 06-30-23

Please review our electronic file and hard copy station log for notations of our station tests and compliance.

The logs are available during regular business hours via computer or site visit. Our written logs and notes are available, as always, upon request.

ADCO Mr. Thomas Sinon, is functioning well in the role.

Our EAS operating system is up to date this quarter. And Mr. Sinon has discussed with Mr. Jim Gorman the upcoming EAS goals and we are assured that when the software updates are available, we will install them. We are assured that we are current and compliant for our system at the current time.

Mr. Sinon seems to be comfortable in his role of ADCO. We have discussed his taking on the role of DCO at some point in the future.

On May 16, 2023 at 22:15 we experienced transmitter difficulties at the tower site on Ridgeland Road in Monee, IL. Mr. Sinon went to the tower site and Ms. Graber stayed in studio to assist and coordinate if needed.

After exhaustive check and verification at the tower site in conjunction with Crown Broadcasting, we determined that the transmitter needed repair. Mr. Sinon volunteered to hand deliver the transmitter to Crown Broadcasting International Radio and Electric Corp., in Elkhart, Indiana.

After consulting with the professionals at Crown, and the assurance that the unit could be repaired while he waited, Mr. Sinon waited as the transmitter was repaired and then returned it to the tower site.

WGEN-FM was fully operational and transmitter fully functional and installed at 17:10 hours on May 18, 2023.

On June 27, Mr. Sinon spoke with Jim Gorman of Gorman-Redlich on CAP DEC to EAS upgrades to make sure WGEN was logging true internet time for all tests, weekly and monthly and to confirm that the system was working correctly and tested after the last round of upgrades and to inquire about the work they were doing in preparation for the next round of required upgrades. We are compliant currently and according to Mr.

Gorman will be receiving the latest updates as soon as they become available and well within the time frame for the next upgrade requirement date.

Additionally, to confirm the RWT tests were functioning correctly. Mr. Gorman confirmed that all RWT (required weekly tests) occur weekly, automated at 0300 hours, on Sundays, each Sunday. This is as it is being logged automatically by our system.

July 6, 2023
