EAS filing 10-01-23 through 12-31-23

Please review our electronic file and hard copy station log for notations of our station tests and compliance.

The logs are available during regular business hours via computer or site visit. Our written logs and notes are available, as always, upon request.

ADCO Mr. Thomas Sinon, is functioning well in the role. Next quarter we are hoping he will take on the DCO role.

Our EAS operating system is up to date this quarter. And Mr. Sinon has discussed with Mr. Jim Gorman installed the latest EAS software update and we are assured that we are current and fully compliant. Form 2 was filed last Quarter and Mr. Sinon worked on our Form 3 and submitted it. We received the test. October 2 we installed the E Prom hardware and are FCC compliant at this time. On November 27 the latest software update was installed. Our station received and transmitted the latest test as required.

Mr. Sinon spoke with Jim Gorman of Gorman-Redlich on CAP DEC to EAS upgrades to make sure WGEN was logging true internet time for all tests, weekly and monthly and to confirm that the system was working correctly.

Additionally, to confirm the RWT tests were functioning correctly. Mr. Gorman confirmed that all RWT (required weekly tests) occur weekly, automated at 0300 hours, on Sundays, each Sunday. This is as it is being logged automatically by our system.

Mr. Gorman remotely assisted Mr. Sinon with the installation and testing of the updates as required and we are and remain compliant.
