- 1. Alabama Broadcasters Association PEP Spots*
- 2. A Problem With The Daily Commute On Dauphin Street*
- 3. Consumer Affairs: Major Airlines Cut Back On Summer Schedules*
- 4. City of Mobile Implements New 311 App*
- 5. Consumer Affairs: Beware Of Scammers Targeting Xfinity Customers*
- 6. Telling The Truth About Chemical Abortions*
- 7. Marijuana And Pregnancy*
- 8. Weather and Community Events*

Title: Alabama Broadcasters Association Pep Spots

Date: April 1st, 2023 – June 30th, 2023

Time: 2 times per day everyday

Duration: 30 Seconds

Problem # 1: Bringing Attention To The “Move Over” Law

The Alabama Department of Transportation (ALDOT) is bringing awareness to two issues of great importance across our state for the remainder of the year. Spot announcements will air on the following subject matter: “Railway Safety” and “Move Over” when you see flashing lights.

One spot focuses on Railway Safety... “Never try to beat and train. It is a deadly game.” A second spot is designed to bring attention to The “Move Over” law which requires that you move over when you see flashing lights. If you can’t move over – Slow Down!

Title: WKRG-TV News

Date: Monday, June 26th, 2023

Time: 6:46 AM, 7:46 AM, 8:46 AM, 4:46 PM & 5:46 PM

Duration: 1 Minute

Problem # 2: A Problem With The Daily Commute On Dauphin Street

If Dauphin St. is a part of your daily commute, your drive just got a little longer.

Beginning Monday, June 26, Dauphin St. will be closed between Mohawk St. and Upham St. The closure is a result of a MAWSS sewer line installation and is expected to last a week, according to a City of Mobile news release.

Date: Thursday, April 6th, 2023

Time: 6:16 AM, 12:16 PM & 6:16 PM

Duration: 1 Minute

Problem # 3: Major Airlines Cut Back On Summer Schedules

If you booked a summer airline flight, you better check with your carrier. American, Frontier, and United have cut some flights from their schedules due to delays in delivering new jets and an ongoing shortage of pilots.

Industry sources say small regional airlines may be the most affected.

More information is available at consumeraffairs.com.

Date: Wednesday, June 22nd, 2023

Time: 6:46 AM, 7:46 AM, 8:46 AM, 4:46 PM & 5:46 PM

Duration: 1 Minute

Problem # 4: City of Mobile Implements New 311 App

The City of Mobile has implemented a new 311 app with multiple ways for citizens to report problems and request services.

Mobile 311 services give options for citizens to engage with their government every day by directing requests from public services to City of Mobile departments.

Citizens can submit Service Request Orders over the phone, online, or through the new mobile app. Citizens can also check the status of existing requests from anywhere on the "The City of Mobile, AL 311" app. The app can identify when an issue has already been reported, however, the 311 staff does not directly address the citizen's concerns, but is a vital part of the process.

Date: Thursday, April 6th, 2023

Time: 6:16 AM, 3:46 PM & 6:16 PM

Duration: 1 Minute

Problem # 5: Beware Of Scammers Targeting Xfinity Customers

If you are an Xfinity customer and someone calls you and says you can save 50% on your bill by paying one year in advance. It's a scam. Police in Pennsylvania say victims are being told that they must pay their bill in advance using target gift cards if they want the discount.

More information is available at [consumeraffairs.com](https://www.consumeraffairs.com).

Title: WKRG-TV News

Date: Tuesday, May 9th, 2023

Time: 6:46 AM, 7:46 AM, 8:46 AM, 4:46 PM & 5:46 PM

Duration: 1 Minute

Problem # 6: Telling The Truth About Chemical Abortions

While some states have advanced significant restrictions on surgical abortions since Roe was reversed last summer, the push to expand chemical abortion is stronger than ever. In the past decade, the number of chemical abortions has skyrocketed by 120%. Estimates are that chemical abortions account for over 50% of all abortions.

Proponents argue that chemical abortions are safe, but nothing could be further from the truth. When used for an abortion, the drug mifepristone starves a child of nutrients by blocking progesterone, the primary hormone that attaches the embryonic child to the uterine lining, which is the baby's primary source of nutrition.

Chemical abortion also harms mothers. One study based on robust data from Finland's healthcare system found that one in five women had an adverse event after mifepristone. It also found that the rates of complication were four times higher with chemical abortion than surgical abortion.

If we are to love those in unexpected pregnancies, we must tell the truth about chemical abortions.

Title: The Point

Date: Thursday, June 8th, 2023

Time: 9:46 AM, 1:46 PM, 6:46 PM & 11:46 PM

Duration: 1 Minute

Problem # 7: Marijuana And Pregnancy

Despite advocates' claims that marijuana use is harmless, another study indicates otherwise. Apparently, the number of hospital visits for pregnant women has almost doubled in Ontario since Canada legalized recreational marijuana in 2018. Of those visits that were marijuana related, the majority were emergency room visits.

According to lead researcher Dr. Daniel Myran, although marijuana-related incidents were only a fraction of overall visits, almost all of them were serious. And according to other research, babies born to marijuana-using mothers are more likely to be born prematurely, have lower birth weights, and be admitted to neonatal care units. Exactly how marijuana harms preborn children will require additional research, but the clear risks are reason enough to recommend that pregnant moms avoid using marijuana altogether.

This is another contradiction to the narrative peddled to us for years. Recreational marijuana use is simply not as safe as we are told it was.

Title: Weather & Community Events

Date: Daily

Time: Randomly and Frequently

Duration: 30 seconds & 60 seconds

WLPR-AM airs local weather and Community Events for our listening area all throughout the day.
