The above programs were either produced, funded or acquired and scheduled by KET. The list does not take into account the educational programs KET airs during the day and overnight. This list also does not take into account numerous programs fed from PBS, many of which cover the topics above. As noted, many of these programs air at various times throughout the week after their original broadcast on the KET network of channels: KET, KET2 and KET KY (The Kentucky Channel).

KET polled its viewers in March and April 2017 to find out what issues in the state were of concern to them and the current priority list was culled from the results of that poll of over 520 respondents, which took place via online voting and via mail. The priority list basically remained the same with Environment and Education sharing the top spot, followed by Health and State Government. However, the Economy dropped from third place to fifth place in priority, followed by Immigration, Youth Issues and Urban Growth.

KET continues to work on programming for our "Inside Opioid Addiction" initiative. In addition, we continue to air the Opioid Addiction programs that we have produced. KET will continue to do more programs about the Opioid epidemic in the coming year, as well as a new initiative on smoking.

KET continues to use its statewide digital channel, the Kentucky Channel (KET KY), to feature a diverse variety of programming by, for and about Kentuckians. From live legislative coverage in Frankfort, to Kentucky arts and music programs, documentaries about the history of the Commonwealth, and programs about the issues that affect all citizens, from health to the economy, The Kentucky Channel was designed specifically for the viewers of Kentucky. Utilizing KET's program archives and current production projects, along with productions from independent producers around the state, partnering broadcast entities, and a variety of other sources, the Kentucky Channel provides Kentucky programming 24/7.
