

4th Quarter 2018 Class A Certification for WCBZ-CD

This report was filed late because FCC servers were shut down as a result of a government shutdown. The FCC re-opened on January 28, 2019 and reports are now due January 30, 2019.

WCBZ-CD broadcast continuously, twenty-four hours per day, during the fourth quarter of 2018.

Locally originated programming consisted of our local AccuWeather® feed on channel 22.1 through December 23, 2018. The AccuWeather® feed provides a continuous twenty-four hour per day (with the exception of other locally originated programming) weather broadcast showing current conditions and forecasts. On December 24, 2018 COZI TV network was launched on channel 22.1. Locally originated programming moving forward will be broadcast Sunday between 2 AM and 5 AM on channel 22.1. The AccuWeather® feed moved to channel 22.5. AccuWeather will air as needed on channel 22.1 in order to meet the three hour per week requirement for locally originated programming.

WCBZ-CD has met the requirement of at least three hours per week of locally originated programming for the fourth quarter of 2018.

A handwritten signature in black ink that reads 'Mark Hiner'.
