ISSUES for Eastern North Carolina

The Environment- The environment is an important topic to cover in any region but especially important in coastal communities such as ours. Coastal erosion, off shore oil drilling, the fishing industry, rivers and streams that feed the ocean are all on our radar as important issues that we report on.

Healthcare- Healthcare is also important in many regions but especially here in eastern North Carolina due to the aging population. Our area attracts retirees both inland and on the coast. Access to healthcare, rising costs and new innovations are all topics of concern not just to seniors but to all of us

Education- Quality of education, classroom size, rising costs, private vs public, as well as higher education options and accessibility for students are all topics needing discussion in our area Cultural

Arts- The arts are an important part of any community and it's in our mission to shine a spotlight on community events telling the area's story as it relates to the arts, music and history.

Politics- Local, state and national politics all have considerable impact on our community. We'll cover the issues affecting our listeners whether it be about our Governor and legislators or local governance that our citizens need to be informed members of our community.
