

WSUR-DT
Quarterly FCC Report
Community Issues Responsive Programming
From April 1, 2015 through June 30, 2015

The following is a list of significant issues for the community of Puerto Rico and treated by WSUR -DT station. The list is not exhaustive and is limited to programs, interviews utility, PSA's and the community of WSUR - DT station. The order in which the topics are listed below do not necessarily reflect the priority and importance of the issues.

TEMA	PROGRAMA	FECHA	DURACIÓN	SINOPSIS Y/O DESCRIPCIÓN DEL PROGRAMA / SEGMENTO
Gobierno y Economía	Los Seis de la Tarde	4/28/2015	20 min	La Junta del Banco Gubernamental de Fomento lanzó una advertencia al gobernador de un posible cierre gubernamental debido a la falta de liquidez para operar. Grenda Rivera, Milly Méndez, Héctor Ferrer, Oscar Serrano, Noris Díaz y Manny Manuel en <i>La Sexta Silla</i> , discuten el tema.
Salud	Los Seis de la Tarde	5/7/2015	20 min	Las fertilizaciones in vitro han aumentado grandemente en Puerto Rico ya que cada vez es más el éxito de esta técnica de reproducción asistida para parejas que no pueden concebir. El equipo de Los Seis de la Tarde analiza el tema y presenta sus opiniones sobre el asunto.
Gobierno y Economía	Los Seis de la Tarde	5/15/2015	15 min	La Conferencia Legislativa del Partido Popular Democrático decidió aumentar el Impuesto sobre Ventas y Usos a un 11.5%, es decir 4.50% más que el “sales tax” que tenemos. Grenda Rivera, Milly Méndez, Héctor Ferrer, Oscar Serrano, Noris Díaz y José Santana, junto al invitado de <i>La Sexta Silla</i> analizan el impacto económico que esto tendrá en el País.
Educación	Los Seis de la Tarde	6/4/2015	20 min	Para los padres, muchas veces es difícil tratar el tema de la sexualidad con sus hijos, por lo que algunos optan por evadirlo. Por esta razón, se ofrecerá en Puerto Rico un taller para padres en el que se le darán las respuestas a las preguntas de sus hijos. Grenda Rivera, Milly Méndez, Héctor Ferrer, Oscar Serrano, Noris Díaz y José Santana, junto al invitado de <i>La Sexta Silla</i> discuten el tema.
Salud	Los Seis de la Tarde	6/25/2015	10 min	El equipo de <i>Los Seis de la Tarde</i> discute y analiza la preocupante cifra que refleja aumento de casos de VIH en Puerto Rico.
Educación	Rubén & Company	4/7/2015	15:33MIN	El Departamento de Educación pretende fusionar la clase de historia de Puerto Rico con la clase de español en los grados de primero a tercero. ¿Será esto una movida peligrosa? Con nosotros Emilio Nieves, portavoz de Únete y Jesús Omar, El Boricuazo. Además, Harry Valentín Gonzalez, Sub Secretario de Educación aclara detalles sobre estos asuntos académicos.

Economía	Rubén & Company	5/12/2015	6:00MIN	Ante la declaración de sequía para gran parte de la Isla y el plan de racionamiento de agua, el Secretario de DACO, Nery Adames, llega al estudio para discutir la emisión de una orden de congelación de precios para artículos de primera necesidad, entre ellos el agua embotellada.
Salud	Rubén & Company	5/4/2015	9:25MIN	Luz verde para el uso medicinal del cannabis, más no así para el uso recreativo de la marihuana. ¿Cuál es la diferencia? Con nosotros la Secretaria de Salud, Ana Rius. Además, en directo el Presidente Colegio de Médicos Cirujanos, el doctor Victor Ramos, quien se destaca por ser uno de los portavoces en contra del uso de la marihuana para fines terapéuticos.
Economía	Rubén & Company	6/3/2015	11:44MIN	El FBI allanó la oficina de James Méndez, el mercader de los dinares en Puerto Rico y, a pesar de que no se han radicado cargos en su contra, re surge la interrogante de si este negocio es o no legal. ¿Será que muchos puertorriqueños han sido víctima de fraude por la compra de dinares? Para discutirlo está con nosotros Gilberto Arvelo, mejor conocido como Dr. Shopper.
Salud	Rubén & Company	6/11/2015	7:30MIN	En el 2014 un 48.8% de los partos en Puerto Rico fueron cesáreas. Ante esta alarmante cifra, llega al estudio un panel de expertos en el parto humanizado para hablar sobre esta alternativa segura y natural para traer al mundo a un niño o niña.
Finanzas: Contigo Prosperidad	PSA	4/1/2015 – 6/28/2015	30ss	Chiquinquirá Delgado se une a la campaña de servicio público de Univision, Univision Contigo Prosperidad, para fomentar en la audiencia la importancia de cumplir sus sueños para desarrollarse como pequeños empresarios.

La misma busca fomentar que los padres/tutores dediquen diariamente al menos 15 minutos de calidad a sus hijos (mayormente entre las edades de 0-5), trasformando los momentos cotidianos en experiencias para el desarrollo cerebral.
Educación: Becas Juventud 2015	PSA	4/11/2015 – 5/10/2015	30ss	La cadena Univision hace un llamado a los estudiantes de cuarto año de escuela superior para participar en las Becas Juventud 2015 en donde podrían ganar una de dos becas para pagar sus estudios universitarios.
Prevención: Pon Tu Mano	PSA	4/15/2015 – 6/30/2015	30ss	Las personalidades locales Alexandra Malagón y Rony Campos se unen a la campaña “Pon Tu Mano” de la Fundación Escape con el propósito de orientar a la audiencia y prevenir el maltrato infantil.

Salud	Despierta América	4/1/2015	27ss	Kids allowed alcohol sips more likely to get drunk. A new report suggests that giving your child a sip of beer or wine every once in a while is not a good idea. The study found that kids who sipped alcohol by the sixth grade are five times more likely to have a full drink by the time they reach high school. They are also four times more likely to binge drink or get drunk. One of the study's authors says she hopes the research teaches kids when it's not acceptable to drink booze. The study was published in the journal of studies on alcohol and drugs.
Educación	Despierta América	4/2/2015	2:17min	Preschoolers ADHD. The first national survey of children with attention deficit/hyperactivity disorder shows that nearly half of preschoolers are on medication for the condition, and more than a fifth were receiving neither of the recommended therapies. American Academy of Pediatrics guidelines call for the use of behavioral therapy first with children younger than 6 because the long-term impacts of medications on developing brains are not well known. But the data show that 46.6 percent of the pre-school aged children with the disorder had taken medication alone or with behavioral therapy in the previous week, and 53.2 percent had used behavioral therapy in the previous year. The data come from the 2009-2010 National Survey of Children with Special Health Care Needs. The numbers also show that 15.3 percent of preschoolers were taking dietary supplements, though there are no proven dietary treatments for the disorder, said Steven Cuffe, chairman of the Department of Psychiatry at the University Of Florida College Of Medicine in Jacksonville, and one of the authors of the study. "We think there may be an issue with the availability of behavioral treatments for preschoolers," Cuffe said. "That is our suspicion. That [number receiving behavioral therapy] should be higher."
Salud	Despierta América	5/8/2015	1:15min	Healthy diet may improve memory, says study. We've all heard the age old adage, "You are what you eat." But could what we eat also affect how we think? New research sheds additional light supporting the long standing notion that eating a healthy diet could potentially be linked to a lower risk of memory and thinking decline, researchers say. The study, published this week in the journal Neurology, further helps our understanding of the correlation a higher diet quality could have on reducing the risk of memory loss.
Salud	Despierta América	6/15/2015	25ss	Job stress affects your health. According to numerous studies, stress can have an impact on weight and could be responsible for obesity. Snacking, addictive or compulsive behaviors and an unbalanced diet could in fact be provoked by the instability of mismanaged emotions.

				This new study attempts to understand to what point job stress can be linked to weight gain in normal weight people. A team of European researchers analyzed eight studies involving more than 60 000 workers who reported on-job stress and allowed scientists to record their weight over time. The researchers indicated in the June 4 issue of the International Journal of Obesity that the results of these studies showed no link between job stress and weight gain or obesity. The team also ascertained that people who had seen their job stress level diminish had not experienced any related weight loss. A reduction in professional anxiety doesn't seem to be related to a reduction in obesity.
Educación	Despierta América	6/22/2015	30ss	Children learn faster with tablet computers. Babies should be given iPads as soon as they are born to help them learn, according to scientists. New research by the University of London found that using tablets provides more stimulation for newborns' brains than books. The findings go against previous studies which suggested looking at a screen can damage children's social skills. Initially academics found a small group of babies - some aged six months and some 10 months old - could recognize the number three better if it was shown to them on an iPad. Now the academics are using a larger sample of hundreds of babies and toddlers, with one group given the iPads from birth and the others not allowed using tablets.
Salud	Primer Impacto	4/6/2015	1:49min	Desintoxicacion de azúcar. Cecilia ramirez harris in her live segment vida sana, give us a simple but effective diet in order to detox from sugar, a substances that interferes with your metabolism and brain health, in all it's ways, the sugar detox process usually takes five days, up to 21.

Jeannette torre-alvarez, a begining education expert, talks about the anxiety, insecurity and distractions, causes of your little ones goes straight from their bed s into fahter's. Luckily, she give us tips to break this bedtime and encourage our children to sleep independently.
Salud	Primer Impacto	5/4/2015	1:42min	Vida sana con cecilia: otras razones que engordan. There are other factors that may people gain weight other than food and why some may not see the results and dont loose weight. If you are one of those people, these are some of the reasons why dieting and exercising is not working for you...pkg There are more than 50 types of andovirus that causes the common cold and gastroenteritis, but the ad-36 can make the person who gets it, gain weight over the course of three months until the body fights it. The

				best thing to do to prevent this virus is sleep enough, avoid stress and washing your hands.
Educación	Noticiero Univision, Edición Nocturna	4/3/2015	1:48min	Study latino toddlers and language comprehension . Although earlier studies have shown that Latino children are raised with emotional warmth and develop social skills on par with others when they enter kindergarten, the new research found they are not receiving sufficient language and literacy skills at home, said a UC Berkeley professor of education and public policy and co-author of the study.
Seguridad	Noticiero Univision, Edición Nocturna	6/2/2015	22ss	USA security airport. President Barack Obama still has confidence in the U.S. Transportation Security Administration after a scathing report that faulted the agency for not detecting obvious threats to airline security, the White House said on Tuesday (June 2). On Monday, Melvin Carraway, the acting administrator of the TSA, which is responsible for screening airline passengers in the United States, was reassigned after media cited a government report that checkpoint screeners failed to detect mock explosives and weapons in 95 percent of tests carried out by undercover agents. Homeland Security Secretary Jeh Johnson, whose department oversees the TSA, was briefed last week on the trials, which were completed recently, ABC News said. In one test, the network said an undercover agent was stopped when he set off an alarm at a checkpoint but that TSA screeners then failed to find a fake explosive device taped to his back. Johnson issued a statement on Monday saying the results of the security checks were classified but that he had directed the TSA to revise screening procedures "to address specific vulnerabilities identified" in the undercover operation.
