

### **Medical Notification Process**

**WKZT Elizabethtown KY, covering Louisville KY DMA, Kentucky Authority for Educational TV - (KET)**

Per the rules of the FCC (47 CFR 15.242) and as part of the grant of a construction permit, television stations are required to make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within the service area potentially affected by DTV operations.

Widelity was engaged to identify and to make a good faith effort to notify locations that met the criteria of the rules.

Using D&B data, and NAICS codes, and mapping software, Widelity identified all locations that were potentially impacted by the KET transitions. This yielded approximately 2,387 locations that met the following criteria:

- General medical and surgical hospitals
- Nursing and personal care
- Psychiatric hospitals
- Residential care
- Skilled nursing care facilities
- VA medical facilities

The facilities were selected from the licensed D&B data for the following NAICS codes:

#### **NAICS Code 622 Hospitals**

Industries in the Hospitals subsector provide medical, diagnostic, and treatment services that include physician, nursing, and other health services to inpatients and the specialized accommodation services required by inpatients. Hospitals may also provide outpatient services as a secondary activity. Establishments in the Hospitals subsector provide inpatient health services, many of which can only be provided using the specialized facilities and equipment that form a significant and integral part of the production process.

#### **NAICS Code 623 Nursing and Residential Care Facilities**

Industries in the Nursing and Residential Care Facilities subsector provide residential care combined with either nursing, supervisory, or other types of care as required by the residents. In this subsector, the facilities are a significant part of the production process and the care provided is a mix of health and social services with the health services being largely some level of nursing services.

The letters were mailed via the US Post Office. All addresses were verified for validity and compared to the USPS Move Update Service. The letters were bar coded and mailed with Full Service Intelligent Bar Codes. Letters that were returned from the US Post Office were researched individually and, where possible, addresses were corrected and the letters were resent.

In addition to the D&B and VA locations, healthcare associations and membership organizations received notifications (list follows)

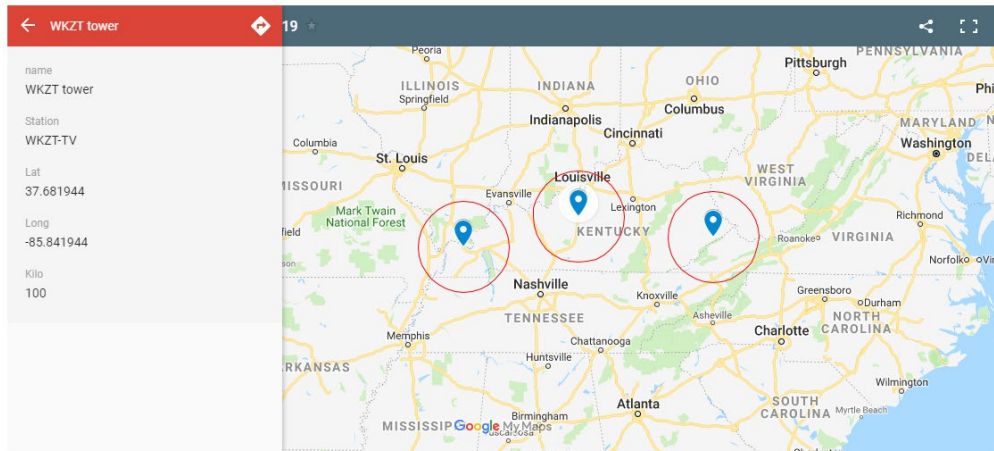

Widelity also created a KET specific webpage where information and updates could be found for each transitioning station.

List of associations receiving letters, applicable web information, letter sent to the facilities, associations, and the facility list follow.

### Notice of Channel Change for Digital Television Channels

You are receiving this letter because Kentucky Educational Television (KET) stations were reassigned channels following the Broadcast Incentive Reverse Auction (Auction 1001). KET has sixteen (16) stations that will be transitioning to new frequencies. Two stations, WKHA and WKMR, both covering the greater Lexington region, will be transitioning on 6/21/19. The other 14 stations will be transitioning in October of 2019. These changes may affect reception and retransmission equipment in your facility. Please be sure that anyone in your facility who is responsible for the supervision of the receiving equipment receives a copy of this notification.

In the attached document, the station locations are listed as well the expected distance that the Television Signals will travel and that may impact the wireless medical telemetry devices in your facility.

**Many of the signals from the KET stations overlap. Your facilities may be impacted by multiple signals from these overlapping stations. Please refer to the attached sheet. If your facility is within the range of the city from which the station broadcasts its signal, your facility may be impacted.**

Included are reference charts of the station changes. See [www.widely.com/ket](http://www.widely.com/ket) for location tools and updated information.

Under authorization from the Federal Communications Commission (FCC), the stations listed in the attached document will be broadcasting on a new frequency.

Per the rules of the FCC (DA 17-702), stations are required to make a good faith effort to identify and notify health care facilities (e.g., hospitals, nursing homes, see 47 CFR 15.242(a)(1)) within the service area potentially affected by the DTV operations.

Widely has been retained by the station listed above to make the required good faith notifications to applicable facilities in their service areas. This letter is to notify health care facilities in the coverage area in the event that any electronic medical devices are affected by the relocation of the transmit frequencies of the station. Your facility may have electronic biomedical devices that could be impacted by the DTV operations listed on the following pages. The FCC allows certain electronic biomedical devices to use unoccupied DTV frequencies on a secondary use basis. As a result of the secondary use status, your facility is responsible for identifying and resolving any potential radio frequency interference for the operations identified on the following pages.

Per the FCC, this process of change in frequencies for the 16 KET stations may begin as early as 6/21/19 for 2 stations and 10/18/19 for 14 stations. This change in broadcast channels may affect equipment in your facility. It is possible that certain medical devices in your facility may be affected by the change in operations identified here.

As the guidance from the FDA notes:

Many medical telemetry devices are operated under 47 CFR Part 15 of the FCC regulations. These devices are secondary users of the radio-frequency (RF) spectrum. Licensed users such as television stations are the primary users. As a secondary user, your telemetry devices may be subject to interference from the primary user at any time, but must not cause interference with the primary user. If your telemetry devices are operating on frequencies licensed to a primary user, you need to be aware of the potential for interference and take any steps necessary to avoid device malfunctions due to interference

#### FDA Recommendations

To address potential interference problems for medical telemetry systems, the FDA recommends that you work with the manufacturer of your telemetry systems to:

- determine the channel/frequencies your telemetry systems use; and
- consult the FCC table of allotments for DTV channels that will be coming on line in your area.

If your telemetry systems are transmitting or receiving on channels that are scheduled to be used by a local station, you should work with the manufacturer of your telemetry systems to:

- change your telemetry channels to unused channels prior to the expected broadcast date to avoid interference

As a general rule, if you find that your telemetry systems are transmitting or receiving on channels that will remain unused, you should not have a problem due to DTV transmissions. However, you should periodically check the FCC allotments to assure that those channels remain available.

Following are reference charts of the station changes. See [www.widely.com/ket](http://www.widely.com/ket) for additional tools and updated information.

Dear:

You are receiving this letter because Kentucky Educational Television (KET) was a participant in the Broadcast Incentive Reverse Auction (Auction 1001). KET has sixteen (16) stations that will be transitioning to new frequencies throughout the state. Two stations, WKHA and WKMR will be transitioning on 6/21/19. The other 14 stations will be transitioning in October of 2019. Many of your member's facilities are potentially impacted by signals from multiple stations in the KET network.

Our firm, Widelity, has been retained by KET to make the required good faith notifications to applicable facilities in their service areas. Hospitals, medical, VA, and residential medical facilities in the service areas have been notified of the impending change in frequency. The letter, sent to approximately 2,400 facilities in Kentucky and the surrounding states is attached.

Facilities may also refer to [www.widelity.com/ket](http://www.widelity.com/ket) for additional tools and updated information

It is possible that some of your member's facilities in that are in Kentucky or are within 70 miles of the Kentucky border will be impacted by the FCC authorized move. In your membership communications, please consider notifying your members of the change in the event that some of their devices are tuned to the identified spectrum. Timely notification will give them time to retune their equipment.

Please do not hesitate to contact me if you have any questions or need additional information.

Thank you for your assistance in this effort.

Sincerely,

Michael Lasky

Principal

Widelity
