\* As specified in *Children's Television Obligations Of Digital Television Broadcasters*, FCC 04-221 (¶24), "digital broadcasters [are permitted] to air all of their additional [3 hours of] digital [children's] core programming, beyond the 3 hour baseline on the main digital program stream, on one free digital video channel or distribute it across multiple free digital video channels, at their discretion, as long as the stream/s on which the core programming is aired has comparable carriage on multichannel video programming distributors ("MVPDs")." TBN's main digital stream fully met the children's programming requirement. However, rescheduling and changes in the addition of new children's programming at the beginning of the year created a gap in core programming on its multicast channels. These changes have been integrated into operations and the new schedule, and the issue has been resolved.
