

July 2023

The week of July 3, 2023, prior to the July 10 deadline for uploading quarterly reports, accessibility to the Online Public Inspection File for stations owned and operated by Educational Media Foundation (EMF) were often not available. While signing into individual stations to upload files, there would often be times when access was denied. When this happened, we would be locked out for various periods of time. Various browsers were used (Chrome, Firefox and Edge) with the same result.

Our FCC attorney, Mary O'Connor at Wilkinson Barker Knauer, contacted the FCC to make them aware of the issue. While not all FCC public files were affected, it did significantly delay our ability to upload this report in a timely manner.

The quarterly issues report for this station was uploaded to the OPIF on July 11, 2023.
