

**WSHL-FM, Easton, Massachusetts
Stonehill College, Inc.**

Quarterly Programming Statement for April 1, 2019 – June 30, 2019

July 10th, 2019

WSHL-FM, “The Radio Voice of Stonehill College”, located in North Easton, Massachusetts, operates 24 hours a day, 7 days a week, throughout the year to provide programming to enlighten, entertain and to inform. Our main programming focus is geared towards a young adult audience, ages 18 years of age and older, with a primary emphasis towards a college aged audience.

WSHL-FM provides a free-form alternative music format with daily informational programming including news, weather and sports segments to keep our audience informed about the world around us. **WSHL-FM** provides regularly scheduled Public Service Announcements at approximately 15 minutes past the hour and at 45 minutes past the hour, 24 hours a day and 7 days a week. Our public service announcements are provided by The Advertising Council, which we regularly update every quarter to assure continuous service to the local Easton and Brockton communities.

Our daily programming is completely produced by students of the college. It includes alternative music, a live news and informational program hosted by **Robert Coleman** every Saturday morning from 10:00 AM until 12 noon where he discusses State and Federal Government, including laws that were passed, bills

being debated and news and information of our government in action. On the lighter side of the spectrum, **Tristan Dunn** has a live talk show every Sunday afternoon from noon until 2:00 pm where he discusses “**eSports**” (competitive video gaming) and gives updates on eSports teams and other Tournaments.

We have recently rebuilt our Production Studio which will allow our students to record programs and promotional material, including podcasts to the Internet. This will also allow for the students to create new programming ideas to entertain and inform the local college community and to the Greater Easton/Brockton area. In addition, we have been informed through the station’s Alumni Board that we can upgrade our Production Studio to more modern equipment including a new broadcast board which has arrived and is being installed. This will allow the station to have more flexibility both on air and on Production purposes. Thank you for your attention.

Sincerely,

Peter Q. George (K1XRB)
Chief Engineer/Operator, WSHL-FM
