ON THE SERIES PREMIERE OF "COSMOS: A SPACETIME ODYSSEY"
SUNDAY, MARCH 9, ON FOX**

repeated on Mar 15 at 7pm

In a TV First, Series Premiere to Air Simultaneously Across Multiple U.S. Fox Networks

More than three decades after the debut of Carl Sagan's groundbreaking and iconic series, "Cosmos: A Personal Voyage," it's time once again to set sail for the stars. Host and astrophysicist Neil deGrasse Tyson sets off on the Ship of the Imagination to discover earth's Cosmic Address and its coordinates in space and time. Viewers meet Renaissance Italy's Giordano Bruno, who had a spiritual epiphany about the infinite expanse of the universe. Then, Tyson walks across the Cosmic Calendar, on which all of time has been compressed into a year-at-a-glance calendar, from the Big Bang to the moment humans first make their appearance on the planet in the all-new "Standing Up in the Milky Way" Series Premiere episode of COSMOS: A SPACETIME ODYSSEY airing Sunday, March 9 (9:00-10:00 PM ET/PT) on FOX, and simultaneously across multiple U.S. Fox networks, including National Geographic Channel, FX, FXX, FXM, FOX Sports 1, FOX Sports 2, Nat Geo Wild, Nat Geo Mundo and FOX Life. After the cross-network premiere event, COSMOS: A SPACETIME ODYSSEY will continue its epic 13-episode run, airing Sundays (9:00-10:00 PM ET/PT) on FOX, and Mondays – with all-new bonus footage and behind-the-scenes content – on the National Geographic Channel (NGC) (10:00-11:00 PM ET/PT). (C-101) (TV-PG D, V)

**DISCOVER THE TREE OF LIFE
ON AN ALL-NEW "COSMOS: A SPACETIME ODYSSEY"
SUNDAY, MARCH 16, ON FOX**

Host Neil deGrasse Tyson is on a voyage to explore the relatedness of all living things and the possible evolution of life in the cosmos. Go on a journey to discover how artificial selection turned the wolf into canine breeds and how natural selection sculpted the complex human eye. Later, Tyson visits the grand Hall of Extinction, a monument to all the broken branches on the tree of life. Retrace the story of life on Earth and the unbroken thread that stretches from the first one-celled organisms to human life in the all-new "Some of the Things That Molecules Do" episode of COSMOS: A SPACETIME ODYSSEY airing Sunday, March 16 (9:00-10:00 PM ET/PT) on FOX. (C-102) (TV-PG D, V)

**KNOWLEDGE CONQUERS FEAR
ON AN ALL-NEW "COSMOS: A SPACETIME ODYSSEY"
SUNDAY, MARCH 23, ON FOX**

Cary Elwes ("The Princess Bride") Guest-Voices

Neil deGrasse Tyson sets off on the Ship of the Imagination to chase a single comet through its million-year plunge toward the sun. Later, Tyson visits the birthplace of Sir Isaac Newton and retraces the unlikely friendship between Newton and brilliant polymath Edmond Halley (guest voice Elwes). It was Halley's patience and generosity which allowed Newton to conquer his fear of isolation and find the courage to publish his masterwork, "Principia Mathematica," which launched a science revolution in the all-new "When Knowledge Conquered Fear" episode of COSMOS: A SPACETIME ODYSSEY airing Sunday, March 23 (9:00-10:00 PM ET/PT) on FOX.
