1. During the Second quarter 2017 the following compliancy issues were identified

Family Issues;
Health
Education,
History,
Religion,
Medicine,

2. During the Second quarter 2017 the following compliancy issues were covered.

Date 04/03/2017 Duration: 30 minutes

ISSUE IDENTIFIED – How reduce risk of Disease?

ISSUE TREATMENT SYNOPSIS: Every day your body wages war against enemies that are silent and unseen but potentially deadly. Foreign invaders, such as bacteria, viruses, and parasites, threaten your health. You are not likely to be aware of those battles because you're immune
System repels or destroys most of the invaders before the onset of symptoms.

ISSUES COVERED: Family, Health, Education,

Date 04/17/2017 Duration: 30 minutes

ISSUE IDENTIFIED – How reduce risk of Disease? Part 2

ISSUE TREATMENT SYNOPSIS: For thousands of years, people knew virtually nothing about the dangers of microscopic or other small harmful organisms. However, when 19th-century scientists confirmed the link between germs and disease, we became better equipped to defend ourselves. Medical researchers have since eliminated or greatly reduced the threat of some infectious diseases, including smallpox and polio. Recently, however, others, such as yellow fever and dengue, have made a comeback.

ISSUES AND PROGRAMS LIST REPORT QUARTER 2nd. 2017 APRIL- JUNE

Date 05/01/2017 Duration: 30 minutes

ISSUE IDENTIFIED – How reduce risk of Disease? Part 3

ISSUE TREATMENT SYNOPSIS: The best defense is to protect your water supply from contamination. If you know that your water supply is contaminated or suspect that it is, you can treat the water at home to make it safe._ Store potable water in a closed vessel, and dispense it hygienically with a clean ladle or through a tap. Never put your hands into a clean water supply. If possible, you should try to live in a community that properly disposes of human waste so that it does not contaminate local water sources.

ISSUES COVERED: Family, Education, and Health.

Date 06/12/2017 Duration: 30 minutes

ISSUE IDENTIFIED – Desiderius Erasmus legacy

ISSUE TREATMENT SYNOPSIS: DESIDERIUS ERASMUS IN HIS day, Desiderius Erasmus (c. 1469-1536) was at first admired as the most brilliant of European scholars, then vilified as either a coward or a heretic. Caught up in a tempest of religious debate, he dared to expose the faults and abuses that existed in Catholicism as well as among its would-be reformers. Today, he is recognized as a key figure in the transformation of Europe's religious landscape.

ISSUES COVERED: History, religion.

Date 06/26/2017 Duration: 30 minutes

ISSUE IDENTIFIED – What is the food intolerance?

ISSUE TREATMENT SYNOPSIS: A food intolerance, like a food allergy, may be an adverse reaction to a food item. But unlike a food allergy (which is triggered directly by the immune system), a food intolerance is a reaction of the digestive system, and thus no antibodies are involved. Basically, a person may have trouble breaking down a food, perhaps because of enzyme deficiencies or because of chemicals found in the food that are difficult to process. For example, a lactose intolerance occurs when the gut does not produce the needed enzymes to digest the type of sugars found in milk products.

ISSUES COVERED: Family, medicine, Health.
