

EDUCATIONAL MEDIA FOUNDATION

October 2023

During the upload of quarterly reports for this station, there were some technical issues regarding the OPIF. While attempting to upload files, there would often be times when access was denied. When this happened, we would be locked out for various periods of time. Various browsers were used (Chrome, Firefox and Edge) with the same result.

The individual responsible for uploading these files contacted the FCC through e-support in an effort to rectify the issue. While not all FCC public files were affected, it did significantly delay our ability to upload this report in a timely manner.

The week following the upload deadline, an audit was conducted and it was found that this station's quarterly report for 3Q-23 had not been uploaded. Again, attempts were made to upload the report which was finally successful.
