RADIO IQ IP LIST 2015, 2nd Quarter

DATE	PROG.	TIME	TOPIC	GUEST(S)
04/05/15	WGR	2:00 p.m.	Starting Up	Just after finishing college at the University of Virginia, Alexis Ohanian, with his friend Steve Huffman, created Reddit. Designed to be the front page of the Internet, Reddit is now one of the most talked about and influential spots on the web. Plus: Inspired by her architecture degree from the University of Virginia, Becca McCharen began designing structural corsets and body-cages for small fashion shows. Only a few years later, McCharen's hobby has grown into Chromat, an experimental label worn by just about every major female pop star, including Beyoncé, Lady Gaga, Madonna, and Nicki Minaj. And: While the term entrepreneur goes in and out of fashion, Ron Monark (College of William and Mary) says that the skills required to start a new company have always been in vogue.
04/12/15	WGR	2:00 p.m.	Dragons of Inaction	For this Earth Day, we're taking the planet's pulse—and our own. Robert Gifford (University of Victoria) explains the dragons of inaction that keep us from changing our behaviors, even if we know they're bad for the environment. And: Edward Maibach (George Mason University) is starting conversations about climate change in unexpected places: Facebook, the doctor's office, and the TV weather report. Later in the show: Coastal geologist Christopher Hein (Virginia Institute of Marine Science) says that due to climate change, east coast shorelines are shifting... fast. But, he says there may be a way we can help barrier islands preserve vital ecosystems throughout the accelerating changes. Also: Synthetic hormones are flooding the waterways, so biologist Sara O'Brien (Radford University) is conducting experiments to pinpoint the source of human-made hormones and to determine the consequences of exposure to them. The canary-in-the-coal-mine for O'Brien's research is the ubiquitous "mosquito fish".
4/19/15	WGR	2:00 p.m.	Wild Blessings: The Poetry of Lucille Clifton	The late poet Lucille Clifton was widely acclaimed for her powerful explorations of race, womanhood, and spirituality. She was nominated for the Pulitzer Prize and received the Robert Frost Medal for lifetime achievement posthumously, from the Poetry Society of America. An anthology of her work, "The Collected Poems of Lucille Clifton 1965-2010" recently won the Hurston Wright Legacy Award for Poetry, and Clifton was also honored by the Furious Flower Poetry Center (James Madison University.) Also: A talk with Hilary Holladay who is the author of "Wild Blessings: The Poetry of Lucille Clifton," the first full-length study of Clifton's work.
4/26/15	WGR	2:00 p.m.	Kremlin to Kremlin: The Joseph Roane Story	Joseph Roane, an agronomist trained at Virginia State University, was part of a group of African American expatriates who were encouraged by the Stalinist government in the 1930s to work in the Soviet Union building a society free of class and racism. Jon Bachman (Stratford Hall) and Marian Veney Ashton (A.T. Johnson Museum) are making a film on how Roane survived Stalin's purges and returned to the United States to become a mentor to young African American agricultural students. Also: Brian McKnight's (University of Virginia at Wise) new book <i>We Fight for Peace</i> tells the story of American prisoners of war in the Korean War, who defected to North Korea and what happened to them when they decided to return to the United States.
5/3/15	WGR	2:00 p.m.	Mr. Turner & the Industrial Revolution	The critically acclaimed film <i>Mr. Turner</i> examines the life and work of the British Romanticist painter J.M.W. Turner, whose style earned him the informal title "the painter of light." Historian William Rodner (Tidewater Community College) is the author of <i>J.M.W. Turner: Romantic Painter of the Industrial Revolution</i> . Rodner says Turner was one of the first major artists to depict the Industrial Revolution. And: In the 1830s, thousands of women were involved in the movement to abolish slavery. Stephanie Richmond (Norfolk State University) says the presence and activity of women in the abolitionist movement laid the framework for another important movement: women's suffrage.
5/10/15	WGR	2:00 p.m.	Imagining Yoko Ono	Yoko Ono is best known for her marriage to John Lennon and was vilified by the press in the 1960s for her perceived role in the breakup of the Beatles. Kevin Concannon (Virginia Tech), an expert on Ono's work, notes she was an accomplished and innovative artist long before she met Lennon. Plus: A novel by Fred D'Aguiar (Virginia Tech) tells the story of a mother and daughter caught up in the tragic Jonestown mass suicide of 1978.
5/17/15	WGR	2:00 p.m.	Bringing Home the War Dead	Before the Korean War, the bodies of American soldiers killed in conflicts abroad were buried in overseas cemeteries. But the nature of the conflict in Korea changed that. Brad Coleman (Virginia Military Institute) says the Korean War brought about other changes, too, including the development of forensic anthropology. And: For U.S. military veterans, the benefits claims process can be daunting. The Lewis B. Puller Jr. Veterans Benefits Clinic at the William & Mary Law School is making that process faster and has been touted as a model for the solution to the nation's backlog of claims. Plus: Bootcamp can be funny. Comedy Bootcamp at the William & Mary Center for Veterans Engagement is a stand-up comedy class exclusively for veterans and servicemen, and it serves as an outlet for veterans with PTSD, TBI, and combat-related injuries.
5/24/15	WGR	2:00 p.m.	How to Save a City	The first 24 hours after a city declares bankruptcy, there's a reckoning: what gets to stay and what has to go. Frank Shafroth (George Mason University) walks us through what it's like when a major city goes bankrupt and gives insight into the future of Detroit. And: While some people see social media as a waste of time, Lori Underwood (Christopher Newport University) believes that it could be our best bet to end the war on terror.
5/31/15	WGR	2:00 p.m.	Under Magnolia	In her new memoir <i>Under Magnolia</i> , Frances Mayes, the renowned author of <i>Under the Tuscan Sun</i> returns to her hometown to explore her coming of age in the Deep South. And: Since 2000, furniture imports from China have increased dramatically and offshoring has cost American furniture makers thousands of jobs. In her new book <i>Factory Man</i> , Beth Macy tells the remarkable story of John Bassett III's battle to keep his family's furniture business in southwest Virginia open.
6/7/15	WGR	2:00 p.m.	Nuts and Bolts: Our Brains on STEM	What if you could change not just how much you know, but your actual intelligence? Psychologist Oliver Hill (Virginia State University) says special cognitive training can rewire the way brains work and help kids succeed in math and science. And: Stereotypes affect the way others see us and how we see ourselves. They can also lead to lower test scores. Claude Steele (Stanford University) and Margaret Shih (University of California, Los Angeles) explain that stereotypes about math and science can self-handicap. Plus: Cheryl Talley (Virginia State University) is helping students overcome self-handicapping through science like journalism and fact-based news.
6/14/15	WGR	2:00 p.m.	Marking Stories of Slavery	Plantations in America's South are physical testaments to the great wealth accrued through slave labor. Yet, Stephen Hanna (University of Mary Washington) has found that plantation museums often gloss over that economic history in favor of more romanticized depictions of plantation life. Plus: There's little historical evidence that African Americans supported the Confederate cause by becoming soldiers. Yet this myth of the "black Confederate" remains in circulation. Gabriel Reich (Virginia Commonwealth University) studies the way collective memories of the Civil War are shaped and offers ways school curricula could address these problematic narratives.
6/21/15	WGR	2:00 p.m.	What Would You Do?	If you swipe a stranger's car and nobody sees, what do you do? Do you leave a note? Do you track the owner down? Bill Hawk and Erica Lewis (James Madison University) give coping strategies for deciding what to do when faced with an ethical dilemma. Plus: Zooplankton are microscopic animals in the ocean that are critical to both the food chain and the recycling of carbon dioxide from the atmosphere. Deborah Steinberg (William and Mary Virginia Institute of Marine Science) says that due to climate change there's been a change in the distribution and variation of zooplankton.
6/28/2015	WGR	2:00 p.m.	America the Beautiful	From Marian Anderson's 1939 concert at the Lincoln Memorial to Marvin Gaye's singing of the National Anthem at the NBA Finals, the theme of patriotism can be heard throughout African American music. Benjamin Ross offers selections from this rich musical heritage. Also: Published in 1946, <i>The Street</i> by Ann Petry was the first million-selling novel by an African American author. Keith Clark (George Mason University) says Petry deserves to be in the pantheon of other great African American writers like James Baldwin and Toni Morrison.

WVTF IP LIST 2015 2nd Quarter 2nd Quarter

DATE	PROG.	TIME	TOPIC	GUEST(S)
04/08/15	WGR	7:30 p.m.	Starting Up	Just after finishing college at the University of Virginia, Alexis Ohanian, with his friend Steve Huffman, created Reddit. Designed to be the front page of the Internet, Reddit is now one of the most talked about and influential spots on the web. Plus: Inspired by her architecture degree from the University of Virginia, Becca McCharen began designing structural corsets and body-cages for small fashion shows. Only a few years later, McCharen's hobby has grown into Chromat, an experimental label worn by just about every major female pop star, including Beyoncé, Lady Gaga, Madonna, and Nicki Minaj. Deborah Steinberg (William and Mary Virginia Institute of Marine Science) says that due to climate change there's been a change in the distribution and variation of zooplankton.

WVTF IP LIST 2015 1st Quarter

DATE	PROG.	TIME	TOPIC	GUEST(S)
01/06/15	TED	7:30 p.m.	Misconceptions	Malcom Gladwell, Jennifer Lee, Allan Savory. TED speakers move beyond conventional wisdom and reveal complex realities about what we think we know to be true.
01/07/15	WGR	7:30 p.m.	Let There Be Night	Paul Bogard of James Madison University and Roger Ekirch of Virginia Tech
01/13/15	TED	7:30 p.m.	In Search Of	How far would you go to find something that's just out of reach, or maybe not even real? TED speakers tell stories about searching for elusive sea creatures and distant aliens. Seth Shostak, Edith Widder
1/14/15	WGR	7:30 p.m.	HIV Education in the African American Church	John Fife, Virginia State University
1/20/15	TED	7:30 p.m.	Brand Over Brain	Brands help us assign value to almost everything we buy. But is there a way to know the difference between real and created value? TED speakers explore the seductive power of brands. Morgan Spurlock, Paul Bloom.
1/21/15	WGR	7:30 p.m.	Telling American Stories	Jennifer Murray, University of Virginia
1/27/15	TED	7:30 p.m.	Keeping Secrets	Who should get to keep secrets, and who should demand to know them? TED speakers talk about the damage secrets can do, and the shifting roles we play when we keep, or share them. Frank Warren, Ash Beckam.
1/28/15	WGR	7:30 p.m.	Where Did You Come From?	Musicians Suz Slezak, David Wax, and Miriam Liss and Holly Schiffon of University of Mary Washington.
2/3/15	TED	7:30 p.m.	What We Fear	TED speakers explore what it means to be afraid, and how we calm ourselves down — or don't — when we're terrified. Chris Hadfield, Karen Thompson Walker
2/4/15	WGR	7:30 p.m.	How the Bard Meant It	David Crystal, Daniel Fromson
2/10/15	TED	7:30 p.m.	7 Deadly Sins	Sinful behavior is human, and nearly impossible to avoid. TED speakers talk about the guilty pleasure of behaving badly and the challenge of confronting sin — and avoiding it. Christopher Ryan, Mick Cornett
2/11/15	WGR	7:30 p.m.	I Am...In Love	Sonali Gulati, Virginia Commonwealth University, Jennifer Apperson and Sarai Blincoe of Longwood University

RADIO IQ IP List 2015, 1st Quarter

DATE	PROG.	TIME	TOPIC	GUEST(S)
01/03/15	TEDD	2:00	Misconceptions	Malcom Gladwell, Jennifer Lee, Allan Savory. TED speakers move beyond conventional wisdom and reveal complex realities about what we think we know to be true.
01/04/15	WGR	1:00	Let There Be Night	Paul Bogard of James Madison University and Roger Ekirch of Virginia Tech
01/10/15	TEDD	2:00	In Search Of	How far would you go to find something that's just out of reach, or maybe not even real? TED speakers tell stories about searching for elusive sea creatures and distant aliens. Seth Shostak, Edith Widder
1/11/15/	WGR	1:00	HIV Education in the African American Church	John Fife, Virginia State University
1/17/15	TEDD	2:00	Brand Over Brain	Brands help us assign value to almost everything we buy. But is there a way to know the difference between real and created value? TED speakers explore the seductive power of brands. Morgan Spurlock, Paul Bloom.
1/18/15	WGR	1:00	Telling American Stories	Jennifer Murray, University of Virginia
1/24/15	TEDD	2:00	Keeping Secrets	Who should get to keep secrets, and who should demand to know them? TED speakers talk about the damage secrets can do, and the shifting roles we play when we keep, or share them. Frank Warren, Ash Beckham.
1/25/15	WGR	1:00	Where Did You Come From?	Musicians Suz Slezak, David Wax, and Miriam Liss and Holly Schiffon of University of Mary Washington.
1/31/15	TEDD	2:00	What We Fear	TED speakers explore what it means to be afraid, and how we calm ourselves down — or don't — when we're terrified. Chris Hadfield, Karen Thompson Walker

instinctive and essential, but what is it that brings certain people together? TED speakers examine the mystery of connection and relationships. Amy Webb, Helen Fisher

Allen Lewis of James Madison University, Tom Costa of University of Virginia at Wise

The brain can seem as mysterious as a distant galaxy, but scientists are starting to map and manipulate its many regions. TED speakers take us on a trip through the human brain. Jill Bolte-Taylor, Suzanaerculano-Houzel

Reuben Rainer and Asa Eslocker of University of Virginia
TED speakers share ideas about what makes us successful. Tony Robbins, Angela Duckworth

Robert Godwin-Jones, Virginia Commonwealth University

Math intimidates a lot of us, but it can deliver surprising answers to life's pressing questions. Randall Munroe, Terry Moore.

Heather Branstetter of Virginia Military Institute
TED speakers reflect on how words and methods of communication affect us, more than you might expect. John McWorter, Mark Pagel.

Ralph Buehler of Virginia Tech, on his book *City Cycling*

When is copying flattery, when is it thievery, and when is it sheer genius? TED speakers explore how sampling, borrowing, and riffing make all of us innovators. Mark Ronson, Kirby Ferguson.

Jason Ross Arnold of Virginia Commonwealth University
Does something serious happen when we play? TED speakers describe how all forms of amusement — from tossing a ball to video games — can make us smarter, saner and more collaborative. Jeff Mogil, Charlie Todd
Reddit Creators Steve Huffman and Alexis Ohanian
