5. Fossils and billions of years
6. Belief in God
7. Heroes
8. Cancer
9. The Ice Age
10. Communication in Marriage
11. Temptation
12. Air Quality

KIBC-FM attempted to address the issues above with programs represented by the attached list.

REPRESENTATIVE LISTING OF OUR PROGRAMING TO MEET COMMUNITY NEEDS

### 1. ISSUE/TOPIC: Birth Defects

**PROGRAM:** Revive our Hearts, January 15, 2024; 9:00-9:30am

**DESCRIPTION:** Guest Elizabeth Mitchell shares her experience with her son that was born with a heart defect. Through her sons physical issues she was drawn deeper in her relationship with Christ. And when she lost her son she learned how to grieve well with the Lord's help.

### 2. ISSUE/TOPIC: Extraterrestrials

**PROGRAM:** Viewpoints Commentary, March 27, 2024, 11:15am

**DESCRIPTION:** Speakers that discuss the vastness of the universe say the question they get the most often is one about the possibility of extraterrestrials. Is there life on other planets or in other worlds? The quick answer is we don't know. The Bible is silent on this topic. So the question is What if we did discover extraterrestrial creatures? Wouldn't they need salvation just like we need? Commentator Kerby Anderson gave an insightful answer to this interesting topic.

### 3. ISSUE/TOPIC: Blood Donation

**PROGRAM:** Family Health Checkup, January 19, 2024, 12:15pm

**DESCRIPTION:** On this brief broadcast, listeners were informed about the importance of donating blood and the different types of blood donation. Whole blood – given to trauma & surgery patients, Power Red donation – given to newborns and for transfusions during the birthing process, Platelet donation – used for cancer patients and others facing life threatening illnesses, Plasma donation – emergency situations. Listeners were encouraged to consider blood donation and given information on where they find out more information about this important topic.

#### 4. ISSUE/TOPIC: Gender Identity

**PROGRAM:** Revive our Hearts, February 12, 2024, 9:00-9:30am

**DESCRIPTION:** Many today are confused about life and sexuality. Author Nancy Pearcey traces much of the confusion back to an underlying faulty worldview. You are fearfully and wonderfully made by God. That's according to the Bible. Author and speaker Nancy Pearcey helps us see the value of our bodies and how science is on our side; that the body is a product of a planned purposeful design and order.

#### 5. ISSUE/TOPIC: Fossils and Billions of years

**PROGRAM:** Answers in Genesis, January 9, 2024; 3:30pm

**DESCRIPTION:** Many people think it took millions of years for us to get the billions of fossils we have today. But the fossil record shows evidence of having been laid down very quickly. Jellyfish don't have any hard parts, so they decay within hours—and yet we have perfectly preserved jellyfish fossils. Listeners were encouraged to hear that the Bible provides the explanation. The global flood of Noah's day would've rapidly buried creatures all over the world. In the Bible's history, it explains what we see in the fossil record.

#### 6. ISSUE/TOPIC: Belief in God

**PROGRAM:** Love worth Finding, March 18, 2024, 8:00-8:30 pm

**DESCRIPTION:** Can an intelligent man or woman believe in God? It may surprise us to realize that intellect has nothing to do with it. If a man doesn't believe in God, it is not because of intellectual difficulties, rather it is because of moral difficulties. On this broadcast, Pastor Rogers gave a challenging message about

how we can come to God and it has nothing to do with our intellect.

## 7. ISSUE/TOPIC: Heroes

**PROGRAM:** Adventures in Odyssey, March 8, 2024, 4:30-5:00 pm

**DESCRIPTION:** In this fun imaginative adventure the gang at Whit's End learn an important lesson about what a true hero is. Tamika Washington had a hero in her favorite movie star but when she actually had an opportunity to talk to the actress she realizes that is just because she liked how the TV star acted in character on a show. It wasn't who she really was in real life. Whit helps her define what a hero is and Tamika learns a valuable lesson about what makes someone a hero.

## 8. ISSUE/TOPIC: Cancer

**PROGRAM:** Joni and Friends, February 2, 2024; 8:00am

**DESCRIPTION:** In honor of World Cancer Day, Host Joni Eareckson Tada shared some insights about the time she had cancer. Hear Joni talk about how God helped her in times of suffering. In your trials, He will give you power, peace, and change your outlook to endure.

## 9. ISSUE/TOPIC: The Ice Age

**PROGRAM:** Answers in Genesis, January 29, 2024, 3:30pm

**DESCRIPTION:** The idea of an icy world inhabited by mammoths and saber-toothed tigers fascinates people. But where does this fit into biblical history? Those who believe in an old earth say there were many ice ages. But they don't have a mechanism that could cause one ice age, let alone dozens. Host Ken Ham

shared with listeners that when we start with the Bible's history, though, a single ice age makes sense.

10. ISSUE/TOPIC: Communication in Marriage

PROGRAM: Love Worth Finding, February 26, 2024

DESCRIPTION: Communication is the way to joy, happiness, and victory; without it, we are headed for ruin. Communication in marriage is the highest level of intimacy. If we cannot be completely honest with each other, we will drift apart. Pastor Adrian Rogers gave a timely message about the importance of having good communication in our marriages.

11. ISSUE/TOPIC: Temptation

PROGRAM: Joni and Friends, March 6, 2024, 8:00am

DESCRIPTION: We often hear people talk about their trials and temptations, like they are one in the same. But think about it, are they? Trials and temptations may sound like one and the same, but they are not. A trial is a test that God puts before us to prove our faith and produce perseverance. Trials are something we can face with joy. But there isn't anything joyful about temptation. No, unlike trials, God does not even place temptations in our path. Temptations occur when we are enticed and dragged away by our own evil desire. So how are trials and temptations related? On this broadcast, host Joni Tada gave an encouraging reply to this question.

12. **ISSUE/TOPIC: Air Quality**

**PROGRAM: Family Health Checkup, January 11, 2024**

**DESCRIPTION:** Seasonal allergies don't take time off. So even in the winter it is important to check the air filters in your home. Poor air quality in your home can cause asthma, fatigue, skin irritations, poor sleep, dizziness, headaches, and unpleasant odors. Listeners were given some helpful tips to be sure they had good air quality in their homes.
