Quarterly Programming Reports. Every three months, we must prepare and place in our station public file, a list of programs containing our most significant treatment of community issues during the preceding three months (“issues/programs lists”). **The list must briefly describe both the issue and the programming during which the issue was discussed, including the date and time that each such program was aired and its title and duration.** We must keep these lists in the file until the next grant of our station renewal application has become final.
