Boom Dig

Federal investigators blame human error for a deadly natural gas explosion. We all remember where we were that morning. We could actually see the smoke from our farm here which is close to twenty miles away. We started to pull, and right off the bat the pull tractor was spinning out, and those are big tractors so I knew something wasn't right. Out of nowhere I just heard a big boom. The tile plow ruptured into the pipeline. Once the gas got through the intakes of the tractors is when it ignited. As soon as I heard that boom I started running as fast as I could. The ground literally started erupting from my feet. They were highly respected and they were good at what they did. And it was one of those accidents that when it was done made people step back and pause. If an accident can happen to them it can happen to anyone. Watch the rest of the story at [threesecondslater.org](http://threesecondslater.org). And remember farm safe starts by contacting 811.

CMNA3745922H Dad Hero

My dad is a double amputee and he's one of my favorite people in the world. To me a hero is someone who fights for our country and freedom. My dad is a hero. Homes for our troops built this house and its basically made for him. My dad can get through the wide doorways. When he is making our lunch he can reach anything. He will help me build my projects. Life is good here. Without homes for our Troops, we would be living in a home that didn't have all these features that help him. Homes for Our Troops builds and donates specially adapted homes nationwide for severely injured post 9-11 veterans and enables them to rebuild their lives. If they get a new house like this one, it will help them do normal life. My dad is not just a hero he is my hero.

Paper

Most hiring algorithms would screen me out. Some bosses couldn't see me as a leader. I've run this place for twenty years, but I still need to prove that I am more than what you see on paper. On Screen: The Paper Ceiling, the invisible barrier that comes at every turn for workers without a bachelor's degree. I've been running code as long as I have been able to reach a keyboard. This is what I do, its second nature for me, coordinating a hundred details at once. It's the way my mind works I have a very mechanical brain. I sold them on my skills. I am more than what I am on paper. 50% of workers in America are STARs, Skilled Through Alternative Routes, instead of a bachelor's degree. I never got a college degree. And today I am the CEO of my own company. People want to tell me I am one in a million, when actually I am one of millions. STARs are all around us, it's time for them to shine.
