

Quarterly Issues Programs List for Townsquare Media Utica

January 1, 2023 through March 31, 2023

Quarterly Issues Programs List for Stations

WFRG-FM, WLZW-FM, WODZ-FM, WOUR-FM, and WIBX-AM

Section I. Issues.

The stations have identified the following topics as significant issues facing our community in this quarter:

- A. **Public Health:** In New York State, currently over 18,000,000 people have received at least one dose of the COVID-19 vaccine. And while the public seems eager to put the pandemic in the past, many people are not following up with the recommended booster shots. An expert on Radio Health Journal discussed why New Yorkers cannot become too lax with treatment of the virus. And locally, Dr. Kent Hall from Central New York's largest healthcare provider, Mohawk Valley Health System, echoed the importance of booster vaccines and encouraged our audience to continue with them.
- B. **Pregnancy Health:** America is one of the only developed nations with a rising maternal mortality rate, according to the CDC. In New York State, the pregnancy-associated mortality ratio was 49.6 deaths per 100,000 live births. According to current census data, there are 41,260 women of child bearing age residing in Oneida County. Concurrently, there has been a pause in available maternity services while a new hospital is being built. This situation has forced women to travel regionally for maternity care. Dr. Lindsay Admon of Radio Health Journal shared pertinent information to expecting parents, explaining the factors feeding into the national rising maternal mortality rate and offered potential solutions that could save more women. Nicky Dawkins, a professional doula, also shared the benefits of bringing in extra advocates during pregnancy.
- C. **Education:** Elementary and high school education is a top-of-mind local issue. Our area residents are concerned about how to best serve our student population while our local area is facing unprecedented recruitment challenges. The Utica City School District embodies 13 schools serving 9,679 students and they are currently facing a teacher shortage. At the start of the 2022 school year, there were 27 unfilled vacancies in the district and the long-term outlook is not encouraging with an estimated one third of New York State teachers expected to retire in the next five years. An education expert on Radio Health Journal discussed how to maximize educational outcome for students, not just to the state standards. The expert shared information on how to best develop successful students in the classroom who later become successful adults in the workforce.
- D. **Agriculture:** Farmland is still the predominant non-residential land use in Oneida County with 967 farms utilizing 24% of the total acreage, helping drive our local economy with over \$100.5 million in annual sales. With egg prices and food costs on the rise, people wonder what other goods are expected to increase in cost. We discussed with local farmers what products on stores shelves will see an increase in cost in 2023.

Section II. Responsive Programs

As part of our Responsive Programs, our brands air both "This Week in the Mohawk Valley" and the "Radio Health Journal" weekly.

This Week in the Mohawk Valley

“This Week in the Mohawk Valley” airs every Sunday on each station at the following times:

WFRG- FM, WLZW-FM, WOUR-FM, and WODZ-FM at 6AM

WIBX-AM at 10AM.

| Date(s) Aired | Issue(s) Discussed | Description of Program |

| 1:50 | SEGMENT 1: HOW SCIENTISTS ARE SPEEDING UP EVOLUTION USING GENOME EDITING | 11:06 |
| | Synopsis: The field of genome editing goes all the way back to the 1970s when researchers discovered how to clone DNA. Now, scientists can genetically modify DNA to eliminate genetic diseases and even create entirely new species of organisms. Experts discuss how gene editing technology can fit millions of years of evolution into mere months. Host: Elizabeth Westfield. Producer: Kristen Farrah. Guests: Dr. Raj Awatramani, Professor of Neurology and Scientific Director of the Transgenic and Targeted Mutagenesis Laboratory, Northwestern University; Dr. George Church, Professor of Genetics, Harvard Medical School, Director, US Department of Energy Technology Center, Founding Father of Genomics Compliance issues covered: genetics; gene editing; genomics; evolution; DNA; genetic diseases; consumerism; patient safety; vaccines; Links for information: https://wyss.harvard.edu/team/core-faculty/george-church/ https://twitter.com/geochurch?ref_src=twsrc%5Egoogle%7Ctwcamp%5Eserp%7Ctwgr%5Eauthor https://www.feinberg.northwestern.edu/faculty-profiles/az/profile.html?xid=16253 https://www.genome.gov/about-genomics/policy-issues/what-is-Genome-Editing | |

| 13:57 | SEGMENT 2: FINDING PAIN MANAGEMENT STRATEGIES THAT DON’T INVOLVE OPIOIDS | 8:25 |
| | Synopsis: We have coaches for nearly every aspect of our lives, so why not have one to help patients work through their health crises? Life Care Coaches are being integrated into hospitals to help patients safely use prescription opioids and even offer pain management strategies that don’t involve drugs. Experts explain how this new position is helping decrease rates of addiction and opioid overdoses. Host: Nancy Benson. Producer: Kristen Farrah. Guests: Cammie Wolf Rice, Author, <i>The Flight</i> , Founder, Christopher Wolf Crusade; Dr. Mara Schenker, Chief of Orthopedics, Grady Memorial Hospital Compliance issues covered: opioids; drug abuse; pain management; addiction; drug overdose; pain medication; vulnerable populations; consumerism Links for information: https://www.gradyhealth.org/doctors/mara-schenker/ https://cammiewolfrice.com/the-author/ https://twitter.com/maraschenker?lang=en https://www.instagram.com/cammierice/?hl=en https://www.instagram.com/christopherwolfcrusade/?hl=en | |
