But do these books make kids more violent or afraid? We talk to two best-selling authors of young people's literature about what kids look for in these stories, how they can help young people deal with their fears and create life-long reading habits.

Why are deer, coyotes, bears, cougars and other wild animals showing up in suburban gardens and on city streets? We talk to a man who has studied bears for 20 years about what makes these animals move into cities and towns, how we can prevent their visits, and how to behave safely if a bear happens to cross your forest – or garden -- path.
