Much money and time is spent trying to rid the land of these aliens – often to no avail. But are these species present because they're the only ones that can thrive in an area? Once "pushed out" from school, these children are often headed down the road to a life of poverty and more serious crimes. A good portion of these kids are African-American girls who, our guest says, are unfairly targeted for discipline because of a misunderstanding of their behavior. We discuss this phenomenon and also talk to a professor who has studied the effect that extremely strict school rules have on the students and the teachers who are made to enforce them.

There are many reasons why we follow through on the tasks we begin, but our guest thinks that those who do succeed in the big things in life have something called "grit." We discuss how passion, hope and perseverance all play into the ability for some individuals to keep on course --even when they face hurdles in their lives and their work -- and accomplish great things.
