Discover the true story of America's "Great Experiment." Go beyond the oft-told tales of gangsters, rum-runners, flappers and speakeasies to experience the rise, rule and fall of the 18th Amendment to the U.S. Constitution in Ken Burns and Lynn Novick's PROHIBITION. Since the early years of the American Republic, alcohol has been embedded in the fabric of American culture. But by 1830, the average American over 15 years old consumes nearly seven gallons of pure alcohol a year, three times as much as we drink today. Alcohol abuse wreaks havoc on the lives of many families. As a wave of spiritual fervor for reform sweeps the country, many women and men begin to see alcohol as a scourge. After the Civil War, the country's population swells with immigrants, who bring their drinking customs with them from Ireland, Germany, Italy and other European countries. The temperance campaign ignites, spearheaded by the Woman's Christian Temperance Union. Carrie Nation and her Home Defenders Army bring publicity by attacking Kansas bars with stones and hatchets, and the Anti-Saloon League (ASL) forms to push for an amendment to the Constitution outlawing alcohol nationally. Most politicians dare not defy the ASL, and in 1917 the 18th Amendment sails through both Houses of Congress; it is ratified by the states in just 13 months. When the Amendment is signed into law, Prohibitionists rejoice that America has become officially dry. But Americans are about to discover that making Prohibition the law of the land has been one thing; enforcing it will be another.

Discover the true story of America's "Great Experiment" – the 18th Amendment to the U.S. Constitution outlawing alcohol – in Ken Burns and Lynn Novick's PROHIBITION. In 1920, Prohibition goes into effect, making it illegal to manufacture, transport or sell intoxicating liquor. This episode examines the problems of enforcement, as millions of law-abiding Americans become lawbreakers overnight. While a significant portion of the country is willing to adapt to the new law, others are shocked at how inconsistent the Volstead Act actually is. As weaknesses in the law and its enforcement become clear, millions find ways to exploit it. Drys had hoped Prohibition would make the country a safer place, but the law has many victims. Honest policemen are killed on the job, unlucky drinkers are poisoned by adulterated liquor and overzealous federal agents violate civil rights just to make a bust. Alcoholism still exists, and may even be increasing, as women begin to drink in the speakeasies that replace the male-only saloon. Despite the growing discontent with Prohibition and its consequences, few politicians dare to speak out against the law, fearful of its powerful protector, the Anti-Saloon League.

Discover the true story of America's "Great Experiment" – the 18th Amendment to the U.S. Constitution outlawing alcohol – in Ken Burns and Lynn Novick's PROHIBITION. Support for Prohibition diminishes in the mid-1920s as the playfulness of sneaking around for a drink gives way to disenchantment with its glaring unintended consequences. By criminalizing one of the nation's largest industries, the law has given savvy gangsters a way to make huge profits, and as they grow in power, rival outfits wreak havoc in cities across the country. The burgeoning tabloid newspaper industry fans the frenzy with sensational headlines and front-page photographs of murder scenes, while Al Capone holds press conferences and signs autographs. The wealthy Pauline Sabin begins publicly decrying that Prohibition has divided the nation into "wets, drys, and hypocrites." Nearly a century before, women had hoped Prohibition would make the country a safer place for their children. But by the late 1920s many American women believe that the "Noble Experiment" has failed. Sabin unifies women of all classes, refuting the notion that all women support Prohibition and denouncing the law itself as the greatest threat to their families. Sabin and others argue that repeal will bring in tax revenue and provide desperately needed jobs. After the election of Franklin D. Roosevelt in 1932, Congress easily passes the 21st Amendment, which repeals the 18th, and the states quickly ratify it. In December of 1933, Americans can legally buy a drink for the first time in 13 years.

Segment Length: 00:00:00

In the fall of 2001 envelopes carrying deadly anthrax were delivered to U.S. Senate offices, network news divisions and a tabloid newspaper. Five people were killed, many more were infected and the nation was terrorized. Seven years later, after the mistaken pursuit of one suspect, the most expensive and complex investigation ever undertaken by the FBI ended when the organization identified Army scientist Dr. Bruce Ivins as the sole perpetrator of the attacks – after Ivins had taken his own life. Now, new questions are being raised about the FBI's investigative methods and whether Ivins really did it. FRONTLINE, in a co-production with ProPublica and McClatchy Newspapers, takes a hard look at the FBI's investigation of the country's most notorious act of bioterrorism.

Segment Length: 00:00:00

From 1941 to 1978, the husband-and-wife team of Ray and Charles Eames brought unique talents to their partnership. He was an architect by training; she was a painter and sculptor. Together, they are considered America's most important and influential designers, whose work helped shape, literally, the second half of the 20th century and remains culturally vital and commercially popular today. The Eames are, perhaps, best remembered for their mid-century modern furniture, built from novel materials like molded plywood, fiberglass-reinforced plastic, bent metal wire and aluminum – offering consumers beautiful, functional, yet inexpensive products. Revered for their designs and fascinating as individuals, the Eames have risen to iconic status in American culture, but their influence on significant events and movements in American life – from the development of modernism to the rise of the computer age – has been less widely understood.

Crows do not have the best of reputations. They are generally dismissed as spooky -- Hitchcock used them quite successfully to frighten moviegoers -- or as a general nuisance; scarecrows were, after all, invented to scare crows away from crops. But their image is about to take a turn. New research has shown that they are among the most intelligent animals in the world, able to use tools as only elephants

and chimpanzees do, able to recognize each other's voices and 250 distinct calls. They are social, mate for life and raise their young for as long as five years. They're able to recognize individual humans and pick them out of a crowd up to two years later. Crow experts from around the world sing their praises and present the viewer with captivating new footage of crows as they've never been seen before.

More than one million immigrants have been deported since President Obama took office. Under his administration, deportations and detentions have reached record levels. The get-tough policy has brought complaints of abuse and harsh treatment, including charges that families have been unfairly separated after being caught in the nationwide dragnet. The administration has promised to make the detention system more humane, and more selectively target the most serious criminals. But it faces Republican critics who urge stricter measures—and a growing backlash among Latino voters, a key 2012 electoral force. In a co-production with the Investigative Reporting Workshop, correspondent Maria Hinojosa investigates Obama's enforcement strategies and journeys into the secretive world of immigrant detention, with a penetrating look at who is being detained and what is happening to these detainees.

Incisive interviews with leading thinkers, secretaries of state and seasoned survivors of war and peace-making challenge the conventional wisdom that war and peace are men's domain. Their experiences reveal how the post-Cold War proliferation of small arms has changed the landscape of war, with women becoming primary targets and suffering unprecedented casualties. Simultaneously, they describe how women are emerging as necessary partners in brokering lasting peace and as leaders in forging new international laws governing conflict. "War Redefined" reframes the understanding of modern warfare through probing conversations with Secretary of State Hillary Clinton and her female predecessors, Condoleezza Rice and Madeleine Albright; Liberian peace activist Leymah Gbowee; Bosnian war crimes investigator Fadila Memisevic; Zainab Salbi, founder of Women for Women International; globalization expert Moises Naim; and Cynthia Enloe of Clark University, among others. Geena Davis narrates.

It has been called the most spectacular terror attack since 9/11. On the night of November 26, 2008, 10 men armed with guns and grenades launched an assault on Mumbai with a military precision that left 166 dead. India quickly learned the attackers belonged to Lashkar-e-Taiba, a Pakistani militant group associated with Pakistan's secretive

intelligence agency, the ISI. But what wasn't known then was that a Lashkar/ISI operative had been casing the city for two years, developing a blueprint for terror. His name was David Coleman Headley and he'd been chosen for the job because he had the perfect cover: He was an American citizen. FRONTLINE and ProPublica reporter Sebastian Rotella team up to investigate the mysterious circumstances behind Headley's rise from heroin dealer and U.S. government informant to master plotter of the 2008 attack on Mumbai.

Walker Percy (1916-1990) was a critically acclaimed writer and popular novelist of the late 20th century. Early on, he turned away from his medical training to pursue writing and philosophical questions about the meaning of life and social isolation in the modern age. However, much of his fiction invoked wit, humor and imagination, thereby making his existential search a universal one. His six novels, including *The Moviegoer* – which won the National Book Award in 1962 – became best-sellers. This program, which profiles a significant Southern writer who often wrote of the South's traditions and culture, features beautiful cinematography and stylized re-creations and includes interviews with such authors as Richard Ford, Walter Isaacson and Jay Tolson.

Hour one examines how Judaism and the Roman empire shaped Jesus' life. Jesus was an ordinary Jewish resident of his time, but new archaeological findings show that Jesus was probably not the humble village peasant often portrayed. Nazareth, where he grew up, was about four miles from the cosmopolitan urban center of Sepphoris, one of the Roman provincial cities. While Rome defined one dimension of Jesus' world, the other was symbolized by the great Temple in Jerusalem. Jesus was born, lived, and died a Jew, and he was influenced by the diversity and tensions of Judaism at that time. Jesus was most likely arrested and executed by Roman authorities whose principal concern was to keep peace in the empire. Rome had little tolerance for those it judged disruptive of the Pax Romana (Roman peace), punishing them in many ways, including crucifixion. The death of Jesus was a Roman act; there was little if any notice taken by Jewish people. Jesus was another victim of the Pax Romana.
