**What does the supply chain
crisis reveal about our
infrastructure? In a global
economy where other
countries are operating their
ports 24/7 and are automated
we are only working 16 hours
per day. Unions are standing
in the way of progress. Labor
shortages and lack of chassis
also contribute to the
gridlock. 'Everyone along
every part of the U.S.
logistics chain is pointing
fingers at each other, and
everyone deserves some
blame, whether it's the ports,
the truckers, the warehouses,
the railroads or other
players.'**
