Class of time

- Non-Preemptible

These announcements are broadcast at an agreed-upon rate, during specific days, within a specific program, daypart or time period requested by the advertiser. These announcements are non-preemptible and will not be preempted by an advertiser offering a higher rate. Rates are based on current selling level and availability at time of placement.

- Preemptible (With Notice)

These announcements are guaranteed to run, but may be preempted with notice. These announcements are sold to commercial advertisers with the understanding that they will run, unless the station sells out its inventory in a particular rotation or day-part and then notice will be provided to the advertiser. These commercials are scheduled to air at AGM's discretion in the particular program/time period requested by the advertiser.

- LUR: Lowest Unit/Spot Rate – (BTA, Best Time available/ROS, Run of Schedule/Rotations)

Candidates may purchase our lowest unit/commercial BTA/ROS announcements at rates comparable to those received by commercial advertisers and will receive treatment comparable to such advertisers with respect to preemption. These commercials run only if no higher paying advertiser purchases the time period during which they are scheduled.

*COMPLETE DESCRIPTION OF "CLASS OF TIME" IS AVAILABLE IN THE AGM POLITICAL ADVERTISING DISCLOSURE STATEMENT.
