Service: PBS
Format: Other
Segment Length: 01:00:00

Leonardo da Vinci is well known for his inventions as well as his art. New evidence shows that many of his ideas were realized long before he sketched them out in his notebooks- some even 1,700 years before him! Of these "inventions" da Vinci never affirmed that his projects came from his original ideas. This film features drawings of his most famous ideas and inventions, some of which trace their original creation to ancient Greece while others were a product of the scientific inventions of golden age of Islamic learning. This knowledge seemed to be lost in Europe during the Dark Ages until the Renaissance when da Vinci recovered it.

Episode Title: Attenborough's Wonder of Song
Length: 60 minutes
Airdate: 5/3/2023 7:00:00 PM
Service: PBS-NPS
Format: Documentary
Segment Length: 00:56:46

David Attenborough presents seven of the most remarkable animal songs found in nature and explores the significance of these songs in the lives of their species. Each one - from the song of the largest lemur to the song of the humpback whale to the song of the lyrebird - was recorded in his lifetime. But will they soon be heard no more? Contrary to Charles Darwin's theory of sexual selection, a new generation of scientists have discovered that animal song is not just the preserve of males. Females sing too. But there are also fears that we do not have much longer to hear them. Because as humankind gets noisier, the rest of the planet is falling silent. Joyous, surprising and poignant, this story of pioneering research and astounding insight is a chorus of wonder ☐ and a wake-up call.

Service: PBS-NPS
Format: Documentary
Segment Length: 00:56:05

The first of a series of three documentaries, each focusing on a different neurodegenerative disease. This film follows three people living with amyotrophic lateral sclerosis (ALS), a neuromuscular disease with an average survival time of 2-5 years from diagnosis. As ALS progresses, the brain loses the ability to control muscles, resulting in the inability to move, speak, eat, and ultimately breathe. In Durham, North Carolina, renowned African-American architect Phil Freelon is dealt the diagnosis of ALS on the eve of completing his architectural masterpiece, The National Museum of African American History and Culture. As he progresses towards paralysis and loss of speech, he and his family grapple with the illness, erosion of control, and the question of what it is to live and die with dignity. In the rural California town of Arvin, former mechanic Charlie Wren is living on a life support ventilator, completely paralyzed except for his eyes. He is cared for by his wife Angelina Flores Wren, who left her job as a medical assistant to become his 24/7 caregiver. Their story highlights the efforts the two must make to live with this illness without a financial safety net. In Nutley, New Jersey, Michele Stellato is diagnosed with ALS at the age of 32 and becomes the second person in the world to receive a new experimental treatment at Columbia University
