

June 23, 2008

Mr. Chuck Davis
Director of Technology
WWJ - CBS
26905 West 11 Mile Road
Southfield, MI 48033

Dear Mr. Davis:

Letters announcing the intention of WWJ-TV/Detroit, MI to commence digital testing were mailed on June 13 to 307 medical facilities in its signal area.

Enclosed is a copy of the DTV Medical Notification, a list of the addresses, the Proof of mailing stamped by the United States Post Office in Orlando, the counties used in the research and a map of the signal area.

In a subsequent package, you will receive the envelopes of the non-deliverable letters returned by the Post Office. The rate of return is about seven percent, and results when entities move and the forwarding period expires; because some refuse the letter, and because some facilities change their name. However, some that merged their ownership may have been notified under another name.

Whatever the reason for the returns, these envelopes along with the list of addressees and the letter receipts are evidence of your sincere attempt to inform the medical community. Please put all these documents relevant to the notification in your Public File.

Thank you for allowing us to serve your station.

Sincerely,

Lauren Donahue
J.C. Curley & Company, Inc.

J. C. CURLEY & COMPANY METHODOLOGY

RESEARCH

We determine the signal reach of the television station client. When more than one station is involved, we create a composite drawing of the grade B contour of the combined signal areas.

Our research philosophy is to cast a broad net over this defined geographical area that identifies licensed medical facilities within 50 miles of each transmitter location and that meet the following criteria:

- All general and surgical hospitals (especially cardiology, children, burn, etc.)
- All cardiology treatment centers and physician staffed clinics
- Free standing urgent care facilities
- Ambulatory medical surgical facilities
- Cardiology treatment facilities (not cardiologists)
- Medical centers
- Skilled nursing facilities associated with a hospital.
- Animal surgical hospitals associated with Schools of Veterinary Medicine

Once we have created a gross data base (in New Orleans, as an example, there were over 750 listings for medical facilities), we then eliminate (sometimes using telephone confirmation) those entities not meeting a narrower bio-telemetry technology criteria. (In New Orleans, our example, the edited list contained 245 names.)

MAILING AND REPORT FOR THE PUBLIC FILE

A formal letter approved by the station that includes the pertinent DTV data is sent via either US Postal Certified Mail or Proof of Mailing (based upon client needs) to all the medical facilities on the edited mailing list. We then prepare a report for the stations' Public File consisting of a summary cover letter, a copy of the notice and technical data, a copy of the address list, a map of the signal area and a list of the counties used in our research, and the US Post Office documentation of mailing. At a later time, we collect any non-deliverable envelopes and forward these to the stations for inclusion in their DTV report.

SPECIAL SITUATIONS

Obligation for International Notices: For those stations whose signals cross country borders, both the FCC Video Division and the International Division has opined that there are no treaties or rulings requiring stations to inform medical facilities outside of the USA. However, they recommend a "common sense" practice in which the bordering foreign medical facilities receive attention equal to that given to domestic entities. In El Paso, for instance, we confirmed our research of medical facilities with the American Consulate General's Office in Ciudad Juarez, Mexico, then translated the Notices and technical information into Spanish before mailing them to the Mexico locations.

NOTICE OF MAXIMIZATION OF DIGITAL TELEVISION (DTV) OPERATIONS

THIS LETTER CONCERNS TELEMETRY OPERATION. PLEASE ASSURE THAT THOSE WHO SUPERVISE OR MAINTAIN CLINICAL OR BIOMEDICAL ENGINEERING AT YOUR FACILITY RECEIVE IT.

The station listed above has retained Curley & Company, Inc., broadcast consultants, to inform you of its intention to begin digital television (DTV) maximization operations in your area.

All full power television stations are required by law to begin providing DTV services, and have been given second television channels for that purpose. We are notifying you of our intention to begin DTV maximization operations because patients within your facility may use biomedical telemetry devices that operate in the television broadcast band, and may be affected when we begin our maximization DTV service.

The rules of the Federal Communications Commission (codified at 47 CFR 15.242) have allowed certain biomedical telemetry devices to use unoccupied DTV channels in their area *on a secondary basis*. This means that the medical facility or operator of the device is responsible for resolving any interference problems that may arise with the digital television-broadcast service or, alternatively, must cease its operations on that channel.

The purpose of this notice is to provide you information and a reasonable opportunity to resolve problems. However, you will want to discuss this with your technology supplier especially if you believe that biomedical devices used in your facility are likely to malfunction when we begin our DTV maximization operations. *If you plan to replace your biomedical equipment, we urge that you purchase equipment designed to operate in the frequencies set aside for medical use.*

The commencement date, DTV channel and frequency band for each station are listed on the attached pages (or reverse) along with contact information for the broadcast executive in charge of DTV for the station. If you wish more information or you want to report anticipated or actual interference problems please contact the individual listed on the attached page who is associated with the specific channel.

Respectfully,

J. C. Curley & Company

Page 2 The relevant technical details of our proposed DTV operations:

Please Note: This is the second notice that some medical facilities in the Detroit, MI area may receive from station WWJ-DT regarding Digital Television (DTV) operations.

The initial notice was sent on or about May, 1999, announcing its intention to begin DTV Operations. Station WWJ-DT began digital television transmission on or about July 15, 1999, at 200 kW ERP by authority of the Federal Communications Commission.

In order to ensure there is no interruption in patient care, this notice is to inform you that WWJ-DT will begin operating at its fully authorized power as indicated below.

**WWJ-TV Channel 62; Network CBS
Detroit, MI.**

WWJ-DT

DTV Channel:	44
Frequency Band:	650-656 MHz
Scheduled On-air Date:	On or after July 15 , 2008
Effective Radiated Power:	345 kW ERP Fully Authorized by the Federal Communications Commission.
Antenna Location	42-26-53 North Latitude; 83-10-23 West Longitude (NAD-83) Located at Meyers and Eight Mile Road, Oak Park, MI.
Antenna Height:	323 meters Height Above Average Terrain 522.8 meters Radiation Center Above Mean Sea Level 321 meters Radiation Center Above Ground Level
Contact:	Chuck Davis, Chief Engineer
