Date:	Show:	Topic:	Run time:	Context:
10/02	News 10 at 10	Health	:55	Antibiotic resistance is a serious problem in the U.S. In a report, we gave tips for combatting the problem.
10/3	Passe Partout	Health	1:03	Exercising for as little as an hour a week is enough to help prevent depression. Scientists say many cases of depression could have been prevented if participants exercised for just one hour a week.
10/3	News 10 at 5	Health	1:30	The mass shooting in Las Vegas has many people feeling a range of emotions. Psychologists say it's normal, but for some people it can interfere with life.
10/4	Passe Partout	Health	:54	London researchers found Vitamin D can protect against severe asthma attacks. Doctors say a daily dose of Vitamin D combined with regular asthma medication could cut the risk of a serious asthmas attack in half.
10/4	News 10 at 5	Children/Youth	1:15	The number of soccer-related injuries among young people is rising
10/5	News 10 at 5	Health	1:15	A new way to approach weight loss may give people more power over food. In a report, we take a look at how an old philosophy is being applied to fight our very modern obesity crisis.
10/6	News 10 at 5	Health	1:30	One Lafayette family has made it their life mission to raise awareness of the importance of organ donation after going through tragedy years ago.

10/9	Passe Partout	Health	:45	A new study links antibiotics prescribed by dentists to the superbug infection C-Diff. Minnesota health officials found almost 40 percent of dentists are not following guidelines and are overprescribing antibiotics.
10/9	News 10 at 10	Health	1:00	In light of an incident where a Breau Bridge High student was knocked out defending her autistic friend, we explained the characteristics of autism in order to raise awareness about the disorder.
10/10	Passe Partout	Health	:45	A fatty diet may increase the risk of a relapse for children with multiple sclerosis by more than 50 percent.
10/10	News 10 at 5	Health	1:00	Researchers at Pennington Biomedical Center in Baton Rouge are working on something that could revolutionize how new diabetes medication is developed. It's a new test that could make discovering new drugs faster and cheaper.
10/11	Passe Partout	Health	1:16	The popularity of meditation and mindfulness has exploded in recent years. Meditation is now being used for everything from depression to addiction. But researchers say dependable scientific evidence is in short supply.
10/11	News 10 at 5	Health	1:30	World health experts say the number of obese children and teenagers is now ten times higher than it was forty years ago. Experts are pushing for taxes on high fat and high sugar foods and say schools and parents need to keep kids active.
10/12	Passe Partout	Health	1:04	Most strokes are caused by risk factors that can be controlled, like high blood pressure and cholesterol. But despite efforts to prevent and screen for those factors, a new study finds they are on the rise among people with strokes.
10/13	Passe Partout	Health	:54	Doctors in Brussels have discovered a new type of diabetes. They say the inherited disease is caused by a genetic mutation.
10/13	News 10 at 5	Health	1:30	Experts say now is the time to get vaccinated for the flu. The American Academy of Pediatrics is recommending kids get vaccinated before the end of October.

10/16	Passe Partout	Health	1:00	A new study finds that a type of irregular heartbeat strikes men at a much younger age than women. Atrial fibrillation causes the heart to quiver instead of beat to circulate blood.
10/16	News 10 at 5	Health	1:30	A recent study shows more than 174,000 preschoolers have vision impairment and the problem is growing. Eye doctors recommend children have a comprehensive eye exam every year to detect problems early. If parents notice kids are holding a book too close, squinting or frequently rubbing their eyes, those may be signs of an eye problem.
10/17	Passe Partout	Health	1:16	Approximately one in nine American men are infected with oral HPV, the human papillomavirus. HPV infections can cause several types of cancer, the most common being head and neck cancer.
10/17	News 10 at 5	Environment	1:15	Air pollution may not only be affecting you, but your unborn child. A report focused some ways to protect you and your family.
10/18	Passe Partout	Health	:55	Obesity may make asthma symptoms worse in children. Researchers in Japan looked at nearly 40-thousand children hospitalized for the breathing condition. Those who were obese were more likely to be readmitted within a month of being discharged. They were also more likely to have longer hospital stays.
10/18	News 10 at 5	Health	1:30	Less than half of adults with high blood pressure in the U.S. have it under control. That's according to a new study from the CDC.
10/19	Passe Partout	Health	1:00	Another study finds heart patients who combine yoga and aerobic exercise had twice the reduction in blood pressure, weight and cholesterol levels than patients who just did just one or the other.
10/20	Passe Partout	Health	1:07	Concussion laws designed to reduce traumatic brain injury among high school athletes appear to be working. A study in the American journal of public health says about 2 years after adopting new rules, states see a significant decline in head injuries.
10/20	News 10 at 5	Health	1:30	The FDA has approved a new gene therapy for some aggressive types of lymphoma. The

				treatment is giving hope to cancer patients who have run out of options.
10/23	Passe Partout	Health	:58	A new vaccine being developed could possibly wipe out deaths caused by pneumonia. The vaccine destroyed harmful bacteria in the body before causing symptoms.
10/23	News 10 at 5	Health	1:30	Scientists in England say psychedelic mushrooms may help in treating depression.
10/24	Passe Partout	Elderly	1:04	Senior citizens often worry about winter as the most likely time to get hurt in a fall. But a study finds the majority of hip fractures happen during the warm months and 76-percent of them occur indoors.
10/24	News 10 at 5	Health	1:30	A trial is underway at Boston's Brigham and Women's Hospital that allows doctors to use genomic sequencing to screen newborn babies for about 1800 conditions.
10/25	Passe Partout	Health	:58	Blood thinning drugs may be effective in protecting against dementia.
10/25	News 10 at 10	Health	1:30	October is breast cancer awareness month. Doctors say there's a high rate of breast cancer in Acadiana. But expert recommendations for mammograms often change, leaving many unsure of how often they need to get checked up. We speak to a local doctor to clear up any confusion.
10/26	Passe Partout	Health	:52	A new study reveals a reduction in brain plasticity could be responsible for memory problems in Alzheimer's patients. The Canadian study found brain plasticity is significantly lower in people with Alzheimer's, compared to healthy people the same age.
10/26	News 10 at 5	Health	1:15	A good cup of coffee can jump start any morning. But too much coffee can be bad for your health.
10/27	Passe Partout	Health	:52	A new study shows the number of children with a peanut allergy has shot up more than 20 percent since 2010, and that 2 point 5 percent of children in the U.S. have the allergy. New guidelines introduced earlier this year recommend parents of children with a risk of developing peanut allergies should

				introduce them early to peanut-containing food.
10/30	Passe Partout	Health	1:07	Doctors in Europe say you may want to get that first colonoscopy sooner. Scientists said if people at average risk were first screened at age 45 instead of 50, more lives might be saved.
10/30	News 10 at 5	Technology	1:30	Johns Hopkins has opened a new state of the art center that allows medical students and staff to get real world training in a simulated setting. The patients are life-sized manikins that have real have pulses, breathe, and can have heart attacks and give birth to babies.
10/31	Passe Partout	Health	:57	Long-term aspirin users are less likely to develop digestive cancers. The study also found that people following an aspirin regimen were less likely to develop gastric, pancreatic and colorectal cancers.
10/31	News 10 at 10	Health	1:30	Halloween brings many tricks and treats. But those extra treats can also bring some unwanted cavities. In a report, we talked about how one local dentist is trying to protect your teeth.
10/12	News 10 at 10	Traffic/Road Conditions	1:30	As Lafayette continues to grow, planners have to look ahead to see the best ways to move traffic around the city and prevent gridlock. One possible solution would be to build another road and bridge over the Vermilion River.

Date:	Show:	Topic:	Run time:	Context:
11/01	Passe Partout	Health	1:16	Premature births rose in the U.S. for the second year in a row after nearly a decade of decline. The March of Dimes says an additional 8000 babies across the country were born preterm in 2016. Preemies face a higher mortality rate during their first year of life.
11/01	News 10 at 5	Health	1:30	The opioid epidemic has swept young people across the country into addiction. For many teenagers, the only way out is to break away from the temptations and peer pressure.
11/02	Passe Partout	Health	:54	Inflammation during middle age could be an early indicator of dementia later in life. A study suggests people who have inflammation indicators in their blood during their 40s and 50s could have brain changes associated with Alzheimer's disease decades later.
11/02	News 10 at 5	Health	1:20	According to a study, eating fruit and veggies with high amounts of pesticide residue may lower your chance of pregnancy.
11/03	Passe Partout	Health	1:17	Blood biomarkers appear to be an early warning sign of lung and airway problems for fireman who worked at ground zero after 9-11. Researchers say blood test helps identify two type of immune cells that are linked to respiratory diseases.
11/03	News 10 at 5	Health	1:30	Activated charcoal is an ingredient that claims to cleanse and purify. It first came onto the scene in beauty products but can now be found in some food and drinks.

11/06	Passe Partout	Health	:46	A new study finds fine air particles cause more than 10 million cases of Chronic Kidney Disease every year. Researchers say Central America and south Asia have the highest number of cases.
11/06	News 10 at 5	Health	1:30	Getting enough sleep is crucial for good health and for staying safe on the road. Speech scientists are developing a system that reveals when people are too tired to drive.
11/07	Passe Partout	Health	:50	A virus mutation is responsible for making last year's flu vaccine less effective. Researchers at the University of Pennsylvania School of Medicine say the H3N2 strain left the vaccine only 20-30 percent effective. Experts still strongly recommend getting a shot every year.
11/07	News 10 at 5	Health	1:20	The death rate for heart disease is dropping. But there are signs you should not ignore
11/08	Passe Partout	Women's Issues	1:01	A common form of contraception may offer protection against cervical cancer. Researchers from the University of Southern California found the incidence of cervical cancer was a third lower in women who used intrauterine devices, also known as I.U.D's. Cervical cancer is the third most common cancer in women worldwide.
11/08	News 10 at 5	Health	1:30	From our phones and computers, to our lights. We are constantly bombarded with blue light. But, nighttime exposure can be hazardous to your health.
11/09	Passe Partout	Women's Issues	1:00	Survivors of estrogen related breast cancer face a substantial risk of cancer returning or spreading. An international team of investigators discovered that even 20 years after the initial diagnosis, a steady number of patients saw their cancer spread throughout the body.
11/09	News 10 at 10	Health	2:30	In a special report, we explained how to prepare healthy meals for you and your family.

11/10	Passe Partout	Health	:52	Sleep apnea may increase the risk of developing Alzheimer's disease. Researchers found biomarkers associated with Alzheimer's grew faster for elderly adults with sleep apnea.
11/10	News 10 at 5	Technology	1:30	A seven year old boy has received a life-saving treatment after German and Italian doctors replaced 80 percent of the skin on his body. Doctors are hailing this highly-experimental surgery as the first-of-its-kind in the world.
11/13	Passe Partout	Health	:58	A new Canadian study suggests children who try a variety of sports are more likely to remain active throughout their teenage years.
11/13	News 10 at 10	Health	2:30	Applying makeup on a daily basis can be time consuming and costly over time. That's why some people are turning to permanent makeup. We explain how it works and who can get the medical procedure done.
11/14	Passe Partout	Health	1:05	Bill Gates is investing in the fight against Alzheimer's. The billionaire Microsoft founder just donated \$50 million dollars to the dementia discovery fund. He's giving another 50 million dollars to bio-tech firms researching the disease. Gates says Alzheimer's has affected several members of his family.
11/14	News 10 at 5	Health	1:30	The American Heart Association has released new blood pressure guidelines and more Americans are now going to be classified as having high blood pressure.
11/15	News 10 at 10	Health	2:30	Crossfit workouts have quickly become the new way to shed pounds and have fun while doing it. We take a closer look at the fitness craze, in a special report.
11/16	Passe Partout	Health	1:03	A new MIT study finds microbes living in the gut may help protect against high blood pressure. Researchers found that a strain of intestinal bacteria seems to stop a high-salt

				diet from triggering an inflammatory response which has been linked to hypertension.
11/16	News 10 at 5	Health	1:30	November 16 is world pancreatic cancer day, the date survivors and activists around the world demand better in the fight against what some call the world's toughest form of cancer. A report focuses on the deadly disease, and one woman's ongoing fight to raise awareness.
11/17	Passe Partout	Health	1:00	Regular coffee drinking may be good for your liver. That's according to a panel of experts who found coffee consumption reduced the risk of liver diseases like liver cancer and cirrhosis by up to 70 percent.
11/17	News 10 at 5	Health	1:30	At the world's first center to study chronic itch, researchers are getting closer to finding answers for desperate patients.
11/20	Passe Partout	Health	1:03	Twenty percent of all cancer patients experience post-traumatic stress disorder several months after their diagnosis and many continue to live with PTSD years later, fearing their cancer might return.
11/20	News 10 at 5	Health	1:40	Small devices are helping people scan their foods for any traces of ingredients they may be allergic to, like gluten. The pocket-sized devices may also be able to detect other allergens including peanuts and dairy.
11/21	Passe Partout	Health	1:03	A new study finds maintaining sufficient Vitamin D levels may help prevent the onset of inflammatory diseases such as rheumatoid arthritis. Researchers add also if Vitamin D is used in patients with R.A., they may need to be prescribed much higher doses than usual because rheumatoid arthritis leads to an insensitivity to Vitamin D.
11/22	Passe Partout	Health	:58	Trips to the emergency room for self-inflicted injuries increased the most for adolescent girls between the ages of 10 to 14. Research shows poisoning is the most common method of injury. Self-inflicted injuries are risk factors for suicide.

11/22	News 10 at 5	Health	1:20	The average American could take in more than 4500 calories and 200 grams of fat on Thanksgiving. But there are ways to have a healthier holiday.
11/23	Passe Partout	Health	1:07	Three to four cups of coffee a day may help you live longer and protect from some cancers, heart disease, diabetes, liver disease and dementia.
11/24	Passe Partout	Health	:49	A new study reveals intense exercise improves memory. Scientists found those who vigorously exercised showed significant improvement in their high-interference memory and a greater increase of a protein that supports the growth, function and survival of brain cells.
11/27	Passe Partout	Health	1:03	Arthritis may affect a much higher percentage of American adults than people think. Researchers say current estimates do not take into account the patient's joint symptoms.
11/27	News 10 at 5	Health	1:35	It's estimated about 12,000 people suffer a stroke in the eye every year, which can cause serious vision damage. There are currently no effective treatments available, but now researchers are testing a new drug that is giving patients hope.
11/28	Passe Partout	Health	:58	A new study sheds some light on whose most at risk of developing an opioid addiction. Columbia University researchers found that more than 60-percent of opioid overdose victims were diagnosed with chronic pain at some point in their lives. Many also suffered from anxiety or depression.
11/28	News 10 at 5	Health	:50	Millions of Americans have trouble falling asleep and staying asleep every day. If you're one of those millions of people, we gave some tips for treating insomnia.
11/29	Passe Partout	Health	1:00	A new report from the CDC finds doctors are now diagnosing HIV about seven months sooner after infection. The report also finds the number of people who have the virus under control is up and annual infections are down.

11/29	News 10 at 5	Health	1:30	A first of its kind study suggests the world needs to lose weight to prevent cancer. According to researchers, diabetes and having a high body mass index cause nearly six percent of cancers worldwide.
11/30	Passe Partout	Health	1:02	For patients with rheumatoid arthritis, being overweight may affect how well they respond to treatment. Doctors found that after therapy, patients who were overweight were 25 percent less likely to stay in remission. Obese patients were 47percent less likely.
11/30	News 10 at 5	Health	:30	The medical community has been talking about super-bugs for years. That's bacteria that cannot be knocked out by common antibiotics. But it looks like the genes that make super-bugs are older than scientists first thought.
11/15	Passe Partout	Traffic/Road Conditions	:30	An 18 wheeler crash caused traffic to be backed up for at least seven miles from the Atchafalaya Basin Bridge to Lobdell. The crash affected traffic flow in the area.
11/21	News 10 at 10	Traffic/Road Conditions	1:20	Progress is being made on repairing the Surrey Street Bridge. The closure of the bridge is affecting traffic flow in the area.

Date:	Show:	Topic:	Run time:	Context:
12/01	Passe Partout	Children/Youth	:53	A study by researchers in England finds that cannabis use is linked to bipolar symptoms in young adults. Teens who used marijuana at least 3 times a week showed signs of mania later in life.
12/01	News 10 at 5	Health	1:30	The fight against HIV and aids continues nationwide. But the numbers, even across Acadiana, have increased at an alarming rate. A local advocate for HIV and prevention shares his story facing the disease
12/04	Passe Partout	Health	1:02	A new study finds that premature birth alters the blood flow to the baby's brain. Researchers in Washington say the fetal brain goes through a growth spurt in the third trimester. In a full term baby, that growth happens inside the womb, where the mother's heartbeat stimulates brain maturity.
12/04	News 10 at 10	Business & Industry	1:00	A drugstore giant is joining forces with one of America's largest health insurers. CVS is buying Aetna for about 69 billion dollars. CVS has been working to become a one-stop shop for healthcare. By joining forces with Aetna, the company believe their locations could become something of a community based medical center.
12/05	Passe Partout	Health	1:00	A new study finds men with intermediate-risk prostate cancer may fare better with a shorter course of treatment. Researchers at Brigham and Women's Hospital say patients prescribed higher doses of radiation over fewer days

				were 13 percent less likely to have their cancer return.
12/06	Passe Partout	Health	:54	There are two new studies about the dangers of traffic pollution. Researchers say mothers exposed to roadway pollution are at an increased risk of having low-birth weight babies. And a study at Duke University finds pollution can cancel the positive health effects of 2 hours of outdoor exercise for people over age 60.
12/06	News 10 at 5	Health	1:30	The FDA recently approved a new device that could help some people cope with chronic pain without using prescription pain killers.
12/07	Passe Partout	Women's Issues	1:30	Women under 50 who currently or recently used hormonal contraceptives have a 20 percent higher risk of breast cancer compared to women who never used them.
12/07	News 10 at 5	Health	1:20	We look at some of the best ways to make sure you're keeping your skin protected during the cold, dry winter months.
12/08	Passe Partout	Health	1:00	The CDC says there is still time to get a flu vaccine if you want protection against the virus this season. The health agency says flu activity remained low during October but has been increasing since early November.
12/08	News 10 at 5	Health	1:30	For years, a New York man complained of burning chest pains, but since he was so young, doctors dismissed his concerns. It wasn't until he went for a test, that a heart tumor was discovered by accident. Doctors at Columbia University removed what they say might be the largest cardiac tumor ever recorded.
12/11	Passe Partout	Health	:48	A study in the Journal of Pediatrics shows women exposed to air pollution one month before or after conception have an increased risk of their babies being born with birth defects like a cleft lip or abnormal hearts.
12/11	News 10 at 5	Health	1:30	A new study has researchers calling for a mandatory safety standard to eliminate

				<p>window blinds with cords. The study finds blinds with cords continue to pose a serious strangulation risk</p>
12/12	Passe Partout	Health	1:04	<p>Dementia and cognitive impairment are more prevalent among seniors who live in rural settings, according to a new study published in the American Journal of Preventive Medicine. Researchers say education, specifically graduating from high school, appears to protect against cognitive impairment.</p>
12/13	Passe Partout	Health	:58	<p>A new study in Denmark finds TYPE-2 diabetes patients under age 45 are at a higher risk of developing heart, kidney and eye problems. Researchers found many younger patients had higher cholesterol and blood sugar levels and almost the same hypertension levels as elderly diabetes patients.</p>
12/13	News 10 at 5	Women's Issues	1:30	<p>More than 40 percent of women in the United States have dense breast tissue which can often mask potential cancers on a mammogram. Now doctors in Southern California are testing a new technology that could help pick up these cancers.</p>
12/14	Passe Partout	Health	1:05	<p>Flu-related deaths worldwide are increasing according to the latest estimate from the CDC and its global health partners between 291,000 and 646,000 people will died from flu related respiratory illnesses each year. Researchers say poorest nations and older adults are hit the hardest.</p>
12/14	News 10 at 5	Health	:30	<p>Researchers come up dry trying to find a link between aches and rainy weather. Rainy weather has long been blamed for achy joints but a new Harvard study suggests otherwise.</p>
12/15	Passe Partout	Elderly	:58	<p>One in five older patients with a chronic illness report experiencing some kind of health care discrimination. Researchers found the unfair treatment was based on patients' age, weight and income. They recommend medical professionals avoid a one-size fits all patient approach.</p>
12/18	News 10 at 5	Health	1:30	<p>More than five million Americans are living with Alzheimer's disease, and there's no cure</p>

				for the illness. But now, British researchers are hoping a new video game will produce valuable data to help diagnose the earliest signs of dementia.
12/20	News 10 at 5	Health	1:15	The holidays are considered to be the greatest time of the year. But for many, it can be the worst. Experts report that the months of November and December show an increase in those experiencing 'the holiday blues' or depression.
12/22	News 10 at 5	Health	1:30	The holidays can be a difficult time for people dealing with loss or coping the idea of being around relatives. There's a special cooking class in Southern California that helps students tackle emotional issues through baking.
12/26	News 10 at 5	Health	1:30	An investigation has yielded some troubling results concerning the way the food and drug administration handles recalls. It found that some recalled foods aren't immediately pulled from store shelves, leaving consumers at risk.
12/27	News 10 at 5	Health	1:30	Health officials say there's been widespread flu activity throughout Louisiana in the past weeks. They're urging everyone to get a flu shot.
12/29	News 10 at 10	Health	1:15	Senator Fred Mills helped set in motion what he believes to be long term help for opioid abuse, passing three parts of legislation that are designed to limit how patients can overuse a supply.
12/12	News 10 at 10	Traffic/Road Conditions	1:30	The Lafayette Consolidated Government will hold a public meeting tomorrow on a proposed road project in south Lafayette. The project will help alleviate traffic congestion on Ambassador Caffery Parkway.
12/19	News 10 at 10	Traffic/Road Conditions	1:30	A major road construction project will begin soon. The construction will affect traffic flow in the area.
12/28	News 10 at 10	Traffic/Road Conditions	1:35	Motorists heading to the Morgan City area on Highway 90 have noticed lots of changes in st. Mary parish. Since the beginning of this year, the DOTD has put in more than 30 J-turns and gotten rid of some of the intersections with signals. The changes help with safety and traffic flow in the area.
