Date:	Show:	Topic:	Run time:	Context:
1/01	Passe Partout	Health/Healthcare	:57	A drug developed to treat type 2 diabetes could be useful in the battle against Alzheimer's. Researchers found it significantly reversed memory loss in the mice; learning and memory formation also improved.
1/01	News 10 at 5	Health/Healthcare	1:30	If you're looking to get into shape this new year, in a report, we explain why you may want to try working out in a group.
1/02	Passe Partout	Health/Healthcare	1:10	A small study, funded by the National Institutes of Health, reveals people given e-cigarettes smoke less and are more likely to quit, compared to people who smoke traditional cigarettes.
1/03	Passe Partout	Health/Healthcare	:58	Norwegian study of more than 200-thousand older adults suggests frequent alcohol drinkers face a higher risk of dying from cardiovascular disease if they are poor. Scientists also found binge drinkers are at higher risk, regardless of their economic status.
1/03	News 10 at 5	Health/Healthcare	1:30	A new poll suggests that nursing homes and other long-term care facilities should do more to protect against the flu.
1/04	Passe Partout	Health/Healthcare	:59	Pregnant women who take vitamin supplements and folic acid could reduce their child's likelihood of autism spectrum disorder. The Israeli study cautions other factors could also be at play and more research is needed.

1/05	Passe Partout	Health/Healthcare	1:08	More women than ever are either overweight or obese before getting pregnant. The Centers for Disease Control says in 2015 45 percent of women were at a healthy pre-pregnancy weight; that's a drop of 5 percent since 2011.
1/08	Passe Partout	Health/Healthcare	:51	Severely obese teens who undergo weight loss surgery are showing signs of better heart health. Researchers with five U.S. hospitals examined patients three years after surgery and found they had fewer risk factors for developing cardiovascular disease.
1/09	Passe Partout	Health/Healthcare	1:11	Researchers at Georgetown University Medical Center say the most common gene test that predicts if breast cancer will reoccur may not be as cost-effective as once thought. The test, Oncotype DX, can help predict if tumors will come back and spread to other areas.
1/10	Passe Partout	Health/Healthcare	1:02	The CDC says about 3,500 babies die each year in the U.S. because of sleep-related causes including sudden infant death syndrome and accidental suffocation.
1/11	Passe Partout	Health/Healthcare	:58	A new study finds people at high genetic risk for obesity benefit more from a healthy diet than those with low genetic risk. Researchers say the findings suggest that genetic predisposition to obesity is no barrier to successful weight management.
1/12	Passe Partout	Health/Healthcare	1:03	Women with the BRCA mutation have a higher risk of developing breast cancer, but a new study finds survival rates are the same for young women with or without the mutation. Researchers say the findings suggest that women who inherit the mutation may not need an immediate double mastectomy when diagnosed with cancer.
1/15	Passe Partout	Health/Healthcare	1:05	Teens who were severely bullied in elementary school are three and a half times more likely to have suicidal thoughts or attempt suicide, according to a new study.

1/15	News 10 at 5	Health/Healthcare	1:30	Cold and flu season is hitting hard this year. And trying to find some relief may be a challenge, especially when it comes to finding the right medicine to treat your symptoms.
1/16	Passe Partout	Health/Healthcare	:53	Girls who start their cycle before age 12 are at higher risk of heart disease and stroke later in life. Researchers found hysterectomies, pregnancy complications and early menopause are linked to stroke and heart attacks.
1/17	Passe Partout	Health/Healthcare	:50	Women who breast feed for six months or more can cut their risk of developing type 2 diabetes in half.
1/18	Passe Partout	Health/Healthcare	1:02	New research finds people with higher levels of fitness have smaller waist circumferences and a lower degree of inflammation, regardless of body mass index. Researchers say the findings suggest that increasing physical activity can reduce abdominal fat.
1/22	Passe Partout	Health/Healthcare	:58	A new policy statement from the American Academy of Pediatrics puts the spotlight on brain development during a baby's first 1000 days of life. Expectant moms are encouraged to have a diet filled with protein, vitamins and minerals, so the baby's brain grows and develops normally. The organization also recommends breastfeeding and healthy food choices for toddlers.
1/22	News 10 at 10	Health/Healthcare	1:45	When a child is sick, parents want the best care possible for them, and that care may be found right here in Acadiana. We look at one hospital's success rate when it comes to saving kid's lives.
1/23	Passe Partout	Health/Healthcare	1:07	Taking anti-thyroid drugs during the first trimester of pregnancy may be linked to a higher risk of birth defects. Certain prescriptions may increase the risk of birth defects by as much as 31-percent.

1/24	News 10 at 5	Health/Healthcare	1:30	This season, the flu is hitting hard. Now new research confirms a link between the flu and heart attack.
1/25	Passe Partout	Health/Healthcare	:57	Smoking even just one cigarette a day increases the risk of heart disease and stroke much more than expected, according to a new study in the British Medical Journal.
1/24	Passe Partout	Health/Healthcare	1:00	New research suggests women who take probiotics during pregnancy may lower their risk of pre-eclampsia, a condition that can lead to severe complications for both mother and child. Researchers in Norway also found taking probiotics - bacteria and yeasts thought to help the gut - may also lower the risk of premature birth.
1/26	News 10 at 10	Health/Healthcare	1:00	Many local blood centers are struggling with fewer donations due to the recent freezing weather, and the flu season is making it worse.
1/29	Passe Partout	Health/Healthcare	:47	Women suffering with rheumatoid arthritis may take a turn for the worse as they age. A study finds a more severe decline in physical function after menopause, which has a direct impact on quality of life.
1/30	Passe Partout	Health/Healthcare	:54	New research finds interrupted sleep may be an early sign of Alzheimer's. People suffering from the disease often have trouble sleeping through the night. Researchers say this kind of body-clock disruption can start years or even decades before a person's memory is impaired.
1/31	Passe Partout	Health/Healthcare	:55	A drug used to treat leukemia might also help with a more aggressive form of cancer. Researchers searched through existing medications to find one that works against Ewing sarcoma, a cancer found in bone or soft tissue. In lab tests they found the drug collar decimated the cancer.
1/31	News 10 at 5	Health/Healthcare	1:20	Free flu vaccines were offered at public health units throughout the state. The effort was

				underway in order to prevent the spread of the flu virus in the area.
1/02	News 10 at 10	Transportation	1:30	More than 50 miles of roads in Lafayette Parish will get a new look this year. The roads aren't being rebuilt or repaved, but the work should make them safer for drivers... Especially at night.
1/04	News 10 at 10	Transportation	1:45	The Lafayette Consolidated Government is planning to make some changes to Blue Bird Drive in south Lafayette. The changes will help traffic flow in the area.
1/16	Throughout the evening shows	Transportation		We talked about how the winter weather is causing the road conditions in Acadiana to deteriorate.
1/23	News 10 at 10	Transportation	1:30	The city of Carencro is planning to overlay two roads this spring. The project will improve the road conditions in the area.
1/29	News 10 at 10	Transportation	:40	University Avenue will be undergoing major improvements in the near future. A meeting, tonight, outlined those changes.
1/30	News 10 at 10	Transportation	2:30	There is no end in sight for road work in Acadiana. The Department of Transportation and Development has several big projects underway. The road construction affects traffic flow in the area.
01/05	News 10 at 10	Economy	:30	Overall, 2017 was a pretty good year to get a job, especially for blue collar workers.
1/08	News 10 at 10	Economy	1:00	Those employeeed at Posados went to work today, only to discover that they are now without a job.
1/11	News 10 at 10	Economy	:25	Walmart abruptly closed several of its Sam's Club stores around the country putting thousands of employees out of work.
1/09	News 10 at 10	Education	3:00	Conflict over teacher pay in Vermilion Parish and a pay raise for the superintendent led to an elementary teacher being arrested. Teachers help students in the parish receive a good education.
1/10	News 10 at 10	Business	1:15	Lafayette Consolidated Government changed an ordinance to allow more bars in downtown

				Lafayette. In a report, we explained the process owners will have to go through to open up a business.

Date:	Show:	Topic:	Run time:	Context:
2/1	Passe Partout	Health/Healthcare	1:05	A new study finds deaths from liver cancer have increased by 80 percent since the 1990's, making it one of the fastest-growing causes of cancer deaths worldwide, second to lung cancer.
2/1	News 10 at 10	Health/Healthcare	1:40	Every day, over one thousand people are treated in emergency departments for misusing prescription opioids. That's according to the CDC. We spoke with local doctors about what they're doing to fight the growing epidemic and stop prescription drug abuse.
2/2	Passe Partout	Health/Healthcare	:19	Regular exercise may help produce better outcomes for surgery patients. Doctors tracking lung cancer patients, found exercising regularly before surgery cut complication rates in half and reduced hospital stays by almost three days.
2/2	News 10 at 5	Health/Healthcare	1:30	A woman dies of cardiovascular disease every 80 seconds in the U.S. Today, the American Heart Association asked women to wear red to bring awareness to the leading cause of death in women.
2/5	Passe Partout	Health/Healthcare	:57	The latest data from the CDC shows 16 more children died from the flu last week. More states are also reporting high activity with an uptick in hospitalizations.
2/6	Passe Partout	Health/Healthcare	1:01	Drinking hot tea is linked to a substantially increased risk of developing esophageal cancer, but only in people who also drink alcohol excessively and smoke cigarettes.
2/7	Passe Partout	Health/Healthcare	:54	A new CDC report finds asthma attacks among U.S. children have declined 8 percent

				in the last 15 years. That translates into fewer missed school days and fewer visits to the hospital. The report also shows certain children are more likely to have asthma than others including children from low-income families.
2/8	Passe Partout	Health/Healthcare	1:03	An amino acid called asparagine that's commonly found in food may hold the key to preventing a deadly form of breast cancer. Foods rich in asparagine include dairy, beef and eggs. Most fruits and vegetables are low in asparagine.
2/9	Passe Partout	Health/Healthcare	:39	British researchers believe vape shops could be a valuable ally to help smokers kick the habit. They say the shops provide behavioral support which could help people remain smoke-free.
2/9	News 10 at 5	Health/Healthcare	1:30	According to the CDC, this flu season has logged one of the highest hospitalization rates in nearly a decade. Doctors are asking people to take precautions as they enjoy carnival season.
2/12	Passe Partout	Health/Healthcare	:55	A new study in the Journal Pediatrics finds there's been little change since 1999 in the number of sudden infant deaths.
2/13	Passe Partout	Health/Healthcare	1:00	People who use opioids have an increased risk of serious infections like pneumonia and meningitis. Researchers found the link was strongest for high dose pain killers which can suppress the immune system.
2/14	Passe Partout	Health/Healthcare	:48	The U.S. Preventive Services Task Force is recommending against ovarian cancer screenings for many women. Doctors found potential harms outweighed the benefits for women without symptoms and who are not known to be at high risk.
2/14	News 10 at 5	Health/Healthcare	1:30	Each year, about 40-thousand children are born with heart defects, sometimes needing surgeries and other procedures for the rest of their lives. But each year, a special group gets together around Valentine's Day to celebrate being alive.
2/15	Passe Partout	Health/Healthcare	1:08	A new study shows a possible link between highly processed foods and cancer. French and Brazilian researchers found diets high in ultra-processed foods such as packaged baked

				goods, soda and sugar cereals were associated with increased risks for cancer. The link was not as significant with less processed foods such as canned vegetables and cheeses.
2/15	News 10 at 10	Health/Healthcare	1:00	We're in the middle of one of the worst flu seasons in more than a decade. The nation's top public health officials came together today to urge Americans to take steps to prevent the flu. That starts with getting a flu shot.
2/16	Passe Partout	Health/Healthcare	1:00	Rapid rises in air pollution may be just as bad for your cardiovascular health as constant high levels of pollution. European researchers found the risk of heart attack can more than double after a 24 hour increase the air pollutant nitric oxide.
2/19	Passe Partout	Health/Healthcare	:57	Babies who have a stroke during delivery don't usually suffer lasting side effects. Those are the results of a new study from Georgetown Medical Center which finds newborns, who suffer a stroke on the language side of the brain regained all function using the opposite side of the brain.
2/20	Passe Partout	Health/Healthcare	1:15	As for the effectiveness of the flu vaccine, researchers say past bouts with the illness can play a role in how well it works. Researchers say its effectiveness is also determined by poor immune responses because of prior cases of the flu.
2/21	Passe Partout	Health/Healthcare	:58	A study by the National Institute of Health suggests women who experience chest pains should get a check-up even if they are considered low risk for heart disease. Researchers discovered some participants in the study showed scarring on their heart indicating they had a heart attack even though they had no coronary artery blockages.
2/22	Passe Partout	Health/Healthcare	1:06	Pregnant women with high blood pressure can safely monitor it at home instead of going to the doctor.
2/23	Passe Partout	Health/Healthcare	1:05	Tears may help diagnose Parkinson's disease. New research from the American Academy of Neurology found differences in the levels of a protein in the tears of people with and without the disease. Researchers say they studied tears because Parkinson's affects nerve function..

2/26	Passe Partout	Health/Healthcare	1:02	One way to prevent depression could be with a healthier diet. A study at Rush University found the foods that have been shown to reduce the risk of stroke may also reduce the risk of depression by as much as 11 percent.
2/27	Passe Partout	Health/Healthcare	1:10	The flu may be more than a respiratory disease. A new study shows it may also cause neurological symptoms. Research in the Journal of Neuroscience finds that two different strains can cause changes to the structure and function of a part of the brain that controls learning and memory
2/27	Passe Partout	Health/Healthcare	1:05	Doctors in China report varicose veins may be associated with an increased risk of developing blood clots linked to deep vein thrombosis or DVT.
2/5	News 10 at 10	Technology	1:50	We explained how you can stay safe while using Facebook Marketplace to exchange goods.
2/6	News 10 at 10	Transportation	1:00	There's a change in plans for the completion date of the Surrey Street bridge. The bridge was closed in October. The closure affected traffic flow in the area.
2/8	News 10 at 5	Transportation	1:00	Barricades are being set up ahead of the Lafayette Mardi Gras parade this weekend. The barricades are affecting traffic flow in that area.
2/13	News 10 at 10	Transportation	1:55	The DOTD is building an interchange on I-10 at the Henderson exit as part of its I-10 widening project. The improvements will better road conditions in that area.
2/16	News 10 at 5	Transportation	:30	Interstate 10 east is now open after an 18-wheeler crash and fire this morning near butte la rose. The closure affected traffic flow in the area.
2/20	News 10 at 10	Transportation	1:45	Drivers in south Lafayette Parish have noticed lots of construction work at Kaliste Saloom and E. Broussard Roads. The road work is affecting traffic flow in the area.
2/7	News 10 at 10	Education	1:30	The Lafayette Parish School Board faced a decision tonight to rezone almost 500 students. However a portion of those students will be moved to a different facility in order to receive an education.
2/19	News 10 at 10	Education	:55	Governor Edwards says if lawmakers can't come up with a billion dollars, there would

				have to be cuts to prisons, healthcare, and schools. That includes the Taylor Opportunity Program for students' scholarship, also known as TOPS. Students use TOPS funding to pay for college and get a good education.
2/26	News 10 at 10	Education	1:00	The first phase of the Lafayette Parish magnet academy lottery process is complete. Tomorrow begins phase two to fill vacant seats in the district's nine academy schools. Students attend these schools to get a good education.
2/28	News 10 at 10	Education	:30	Over 70 Vermilion Parish teachers now have fresh classroom supplies to finish out the rest of the school year, courtesy of a local telecom company. The supplies will be used to help local children get a new education.
2/22	News 10 at 10	Consumer Issues	1:20	You've heard the story over and over again of someone being scammed out money, sometimes thousands of dollars because they were in fear of their freedom or the safety of a loved one. It's all because scammers and con artists have access to your phone numbers. In a report, we explain how to protect your numbers.
2/27	News 10 at 10	Economy	:30	A job fair is underway at UL Lafayette. People looking for work can meet with potential employers and interview for different positions that need to be filled.

COMMUNITY AFFAIRS REPORT

- Economy

Date:	Show:	Topic:	Run time:	Context:
3/1	Passe Partout	Health	1:05	Doctors say pregnant women who take a daily fish oil capsule at 20 weeks through the first few months of breastfeeding appear to cut their child's risk of egg allergies by nearly a third. And they found a daily probiotic supplements later in pregnancy, reduced a baby's risk of developing eczema.
3/2	Passe Partout	Health	1:02	A study conducted by University of Washington Medicine suggests using brain cells created from stem cells could offer a new treatment and even prevent Alzheimer's disease. Researchers developed an experimental compound that reduced the production of toxic proteins that attack and kill brain cells causing dementia.
3/5	Passe Partout	Health	:50	New findings show that increasing the dosage of inhaled steroids for young asthma patients when severe flare-ups occur doesn't always work. In fact, the study shows an increase from low-to-high dose may stunt a child's growth.
3/6	Passe Partout	Health	2:00	An Opelousas man has a daily struggle with Friedrich's Ataxia that breaks down the body's nerves and ability to move. He is wheelchair bound but can ride a tricycle and is competing in a national race to help bring awareness.
3/7	Passe Partout	Health	1:05	A new study looking at middle-aged women found those with larger waistlines were significantly more likely to have anxiety. Researchers say hormone changes could be the culprit, but there's reason to be vigilant because anxiety and belly fat are linked to

				heart disease, diabetes and other medical problems.
3/8	Passe Partout	Health	1:00	Breast cancer screening guidelines may delay diagnosis for African American, Hispanic and Asian women. Researchers say current guidelines are based on studies of mostly white women, and guidelines need to look at racial differences in how breast cancer develops and how aggressive it can be in different women.
3/8	News 10 at 5	Health	1:20	A new study suggests the toxic chemicals found in most cleaning products may be just as harmful as the ones in cigarettes.
3/9	Passe Partout	Health	:55	Children who survive cancer are at higher risk for developing cardiovascular disease prematurely as adults. German researchers found cardiovascular disease in four and a half percent of childhood cancer survivors they studied, with most developing problems before age 40. That's eight years earlier than the general population.
3/9	News 10 at 6	Health	1:00	United Blood Services celebrated its partnership with Air Evac to help transported trauma victims. The partnership will allow Air Evac to provide blood transfusions to trauma victims while they're being transported in the air.
3/12	Passe Partout	Health	:55	Researchers report over half of stroke survivors require support with tracking and taking their medications, and that many are not getting the help they need. Almost half of those who have one stroke, go on to have another within the next ten years.
3/13	Passe Partout	Health	:57	Exposure to lead may be linked to over 250,000 premature deaths from cardiovascular disease every year, according to a study. Researchers followed people for almost 20 years and found exposure to lead in fuel, paint, and plumbing decades earlier affects middle age and older adults.
3/14	Passe Partout	Health	:46	Smokers are more likely to suffer high-frequency hearing loss according to a study published by Oxford University press. The data shows the more cigarettes smoked the greater the risk of hearing impairment but

				after quitting the risk of hearing loss decreases.
3/15	Passe Partout	Health	1:07	A new study shows middle aged women with high physical fitness are nearly 90 percent less likely to develop dementia later in life compared to women who were moderately fit. The study published in the Journal Neurology followed women for 44 years. The research suggests concentrating on heart fitness could delay or even prevent dementia all together.
3/16	Passe Partout	Health	1:00	The Food and Drug Administration took the first step Thursday in the process to drastically cut nicotine levels in cigarettes so they aren't addictive. FDA officials estimate about 5 million more people would quit cigarettes within one year if nicotine limits are put in place. Currently about 15 percent of U.S. adults smoke.
3/19	News 10 at 10	Health	1:40	March is Colorectal Cancer Awareness month. It's the second leading cause of cancer death among men and women combined in the U.S. And it's a cancer local musician Jamie Bergeron has been fighting for the last year and a half. We shared his story of recovery.
3/20	Passe Partout	Health	:58	Having poor dental health may be linked with an increased risk for diabetes. California researchers found a relationship between the number of teeth a person was missing and poor results on glucose tests.
3/21	Passe Partout	Health	:56	Doctors say freezing the nerve that carries hunger signals to the brain may help obese patients lose weight.
3/22	Passe Partout	Health	1:04	Lower back pain sufferers are not getting the right care, according to papers published in The Lancet. The findings suggest that the best treatment for people with the condition is stay active and work. Instead, many people are encouraged to rest and undergo unnecessary surgeries or seek prescriptions for pain killers.
3/23	Passe Partout	Health	1:00	New findings show that cutting calories by 15 percent for at least two years can slow aging. Researchers in Louisiana say calorie restrictions can also protect against age-related diseases.

3/26	Passe Partout	Health	:19	The American Academy of Pediatrics says low-income families need better access to healthy food. The group says many impoverished children have no way to get the nutritious foods they need. Instead, they're surrounded by unhealthy options and may need help to improve their diet.
3/27	Passe Partout	Health	1:12	Doctors often use antibiotics to treat sinus infections, but possibly for longer than necessary. Research by the Centers for Disease Control finds most sinusitis patients are prescribed medication for ten days or longer.
3/27	News 10 at 5	Health	1:30	March is Colon Cancer Awareness month. One Acadiana survivor is speaking out after he was unable to get a colonoscopy screening even with major symptoms.
3/28	Passe Partout	Health	:56	Women who undergo hormone therapy to relieve menopausal symptoms may receive a positive side-effect. A new study finds those women tend to have less fat tissue, particularly in the abdomen. Doctors say women need to be aware of potential weight gain when they finish hormone therapy.
3/29	Passe Partout	Health	1:05	Some advanced colon cancer patients may be able to receive less chemotherapy after surgery. New research shows some low risk stage 3 patients can do 3 months of chemo instead of 6 without affecting their risk of recurrence. Researchers say less chemo means less harmful side effects.
3/30	Passe Partout	Health	1:10	Coffee in California could soon come with a cancer warning because of the chemical, acrylamide, that's released during the roasting process.
3/1	News 10 at 10	Consumer Issues	:30	It turns out cyber-criminals accessed the personal information of millions more people than first thought in last year's massive Equifax data breach.
3/23	News 10 at 10	Consumer Issues	:30	Toys R' Us recently announced its closing or selling all of its stores across the country, including the six here in Louisiana. Before that happens, Attorney General Jeff Landry urges shoppers to use their gift cards and store credits.

3/29	News 10 at 10	Consumer Issues	:30	Tesla is voluntarily recalling one of their early model sedans due to steering complications.
3/2	News 10 at 10	Economy	:30	A job fair will take place on Monday and Tuesday. Local companies will connect with potential employees at the event next week.
3/5	News 10 at 10	Traffic/Road Conditions	:30	All lanes have reopened on Interstate 10 between Baton Rouge and Henderson. The westbound lanes were closed because of a crash involving an 18 wheeler. The lane closures affected traffic flow in the area.
3/12	News 10 at 5	Traffic/Road Conditions	:30	The I-10 entrance ramp at Highway 95 was closed this evening after a high-speed chase ended with the driver crashing into a state police unit. The closure affected traffic flow in the area.
3/13	News 10 at 10	Traffic/Road Conditions	1:30	The Frontage Road off Highway 90 in New Iberia is located between LA 14 Center Street and Avery Island Road. The problem is you can't take the Frontage Road to get to Avery Island Road. This affects traffic flow in the area. There is a project in the future to build an extension.
3/15	News 10 at 10	Traffic/Road Conditions	:30	A nine car deadly crash shut down a portion of I-49 near Ville Platte. The road was later reopened, however the closure affected traffic flow in the area.
3/20	News 10 at 10	Traffic Road Conditions	Throughout the show	Work is being done to maintain the Delcambre Bridge. While workers were on the bridge, the bridge was closed. The closure affected traffic flow in the area.
3/21	News 10 at 10	Education	1:30	We explained how a tax St. Landry Parish residents are voting on Saturday will help schools in the district. Better facilities will help students get a better education.
3/6	News 10 at 10	Education	1:00	After lawmakers failed to present a budget deal during the special session, the future of funding for the TOPS Program in Louisiana could now be in jeopardy. Students use the money to pay for tuition at state colleges and universities. The funding helps students get a higher education.
