

ISSUES AND PROGRAM REPORT

SECOND QUARTER - 2016

KLFY - TV

ISSUES AND PROGRAM REPORT RECAP

July 7, 2016

KLFY - TV uses its direct contacts with community leaders to address issues important to the Acadiana Community along with “surveys” from business and community leaders. KLFY - TV’s public affairs programs, interview segments on “Passe Partout”, “Passe Partout Saturday”, “Meet Your Neighbor”, as well as the KLFY -TV News programs at 5:00 PM, 6:00 PM and 10:00 PM news casts targets areas identified by our community contacts as significant needs or problem areas in “Acadiana”. KLFY also monitors CBS programs such as “Face the Nation”, and “60 Minutes” for segments of concern to the Acadiana Community.

Passe Partout interviews air between 4:30 - 7:00 AM Monday - Friday

Passe Partout Weekend airs between 5 - 6 AM on Saturday & 7-8 AM Sunday

Meet Your Neighbor interviews air from 12:00 - 12:30 PM Monday - Friday

Based upon KLFY - TV’s input from community leaders and various organizations, and KLFY - TV’s involvement in the community, we have determined that the following issues are the concerns of the community along with many other Community concerns and promotional needs.

Education:

Education is still a main concern of the communities. Student safety while on campus is also a concern of our viewers.

Traffic/Road conditions:

Traffic has become heavier in post hurricanes Katrina, Rita, Gustav and Ike in Acadiana. Road conditions and repair due to the extra vehicular traffic is taking its toll on streets and roads. Safety, speeding and seatbelt usage are also of concern to our viewers.

Crime:

Crime has always been a major concern of our viewers. Viewers and concerned citizens are trying to cope with seemingly added drug trafficking and crime rates in our viewing area.

Health:

Concerns of our viewers who are overweight, and concerns about losing weight through a balanced nutritional meal. Also of concern are cuts in Medicare and Medicaid for the elderly.

Economy:

The economic well being of Louisiana, interest rates, mortgages, oil spill & prices, housing starts, retail sales, government stimulus packages, tax cuts/increases and unemployment are some of the concerns of our viewers.

Date:	Show:	Topic:	Run time:	Context:
4/1	Passe Partout	Health	:55	Doctors now say drinking coffee decreases your risk of colon cancer. The findings suggest that the more coffee a person drinks, the lower the risk of colon cancer.
4/1	News 10 at 5	Health	1:15	A new report is taking a hard look at where growing obesity rates around the planet are heading. The news is especially bad for the United States.
4/4	Passe Partout	Health	:55	New research finds elderly men may be able to cut their risk of strokes, heart attacks, and even death with testosterone therapy.
4/4	News 10 at 10	Health	1:35	A group of scientists from Mote Marine Lab in Sarasota have just returned from a shark expedition in the Atlantic. The work they did can not only help protect those animals, but it can also help protect humans from diseases.
4/5	Passe Partout	Health	:55	A daily dose of Vitamin D3 can improve heart function in patients prone to heart failure. That's according to British researchers who found the heart's pumping function improved as much as 34 percent in patients with heart muscle weakness.
4/6	Passe Partout	Health	1:00	A majority of children's meals at leading restaurants are meeting calorie guidelines, according to new research from Tufts University. However, many kids' menu items are still high in fat and sodium.
4/7	Passe Partout	Health	1:05	Researchers followed patients for 22 years and found those who did not smoke, exercised

				regularly, and maintained a healthy weight and blood sugar levels had a lower risk of developing kidney disease.
4/7	News 10 at 10	Health	1:30	If you've noticed your clothes are a little snug than they used to be, your job could be to blame. According to a recent survey, many people say they've packed on the pounds because of work.
4/8	Passe Partout	Health	1:00	Researchers in Boston have identified a new set of genes that may be responsible for causing stroke and dementia.
4/8	News 10 at 5	Health	1:30	Most states are dropping the ball when it comes to keeping students active and fit. A new report finds 62 percent of states allow students to substitute other activities for gym class. Only 19 states set a minimum amount of time for physical education. National guidelines recommend kids get a least an hour of moderate physical activity each day.
4/11	Passe Partout	Health	1:00	A new study suggests the Zika virus may now be linked to brain problems similar to multiple sclerosis. Brazilian researchers report some Zika patients are demonstrating neurological issues with mobility, vision, memory and cognitive skills.
4/11	News 10 at 10	Health	1:00	The White House, NIH, and CDC addressed the Zika virus outbreak. The health organizations warn it is more serious than they thought.
4/12	Passe Partout	Health	1:00	Most middle-aged men and women prone to cardiovascular problems may benefit from a daily aspirin. A national task force is urging potential heart patients between fifty and sixty-nine without bleeding risks to consider taking a low-dose aspirin every day.
4/12	News 10 at 5	Health	:30	Most middle-aged men and women prone to cardiovascular problems may benefit from a daily aspirin.
4/13	Passe Partout	Health	:50	Women with a history of infertility have denser breast tissue than other women. A

				study in the journal "Breast Cancer Research" says it may be caused by hormone treatments or may be from the infertility itself.
4/13	News 10 at 10	Health	:30	The CDC says Zika virus causes microcephaly and other birth defects
4/14	Passe Partout	Health	1:15	A new study suggests healthy gut bacteria may be able to slow or stop the development of some types of cancer.
4/14	News 10 at 5	Health	1:20	When it comes to eating right, we always have the best intentions, but sometimes an impulse buy or craving can ruin our efforts. In a report, we explain how to control your eating habits.
4/15	Passe Partout	Health	1:10	E-cigarettes are the most commonly used tobacco product among middle and high school students for the second year in a row. The CDC also found traditional cigarette use dropped during the same period.
4/15	News 10 at 10	Health	1:30	There's a new device that could revolutionize the way doctors treat Parkinson's disease.
4/18	Passe Partout	Health	:50	Researchers at the University of Michigan say very young children who reach for cookies over chips may be more prone to unhealthy weight gain.
4/18	News 10 at 5	Health	:30	Governor John Bel Edwards today spoke to members of the senate health committee about Medicaid expansion, which helps provide health care to the working poor.
4/19	Passe Partout	Health	1:00	Women who develop gestational diabetes during pregnancy are at greater risk for high blood pressure later in life. But research finds a healthy diet can reduce that risk by 20 percent.
4/20	Passe Partout	Health	:50	Researchers in Cincinnati are developing a new drug to treat life threatening lung damage and breathing problems.
4/20	News 10 at 10	Health	1:00	Bed bugs are becoming more resistant to typical bug sprays.
4/21	Passe Partout	Health	1:00	Aspirin may help patients beat cancer. New research suggests low dose aspirin increases

				cancer survival rates up to 20 percent and can also help prevent some cancers from spreading.
4/21	News 10 at 5	Health	1:15	New research suggests a link between PPI's and a dramatic increase in the risk of kidney disease and kidney failure.
4/22	Passe Partout	Health	1:10	The body's own immune response, rather than the virus itself, may be the primary cause of flu deaths in older people. New research from Yale could lead to new strategies to combat the illness.
4/25	Passe Partout	Health	1:00	Massachusetts researchers have developed a smart phone application that can potentially benefit people with vision problems. The app projects a magnified smartphone screen to Google Glass that allows the visually impaired to zoom and navigate using head movements.
4/25	News 10 at 10	Health	1:30	The World Health Organization says they're expecting to see a marked increase in the number of Zika virus cases worldwide. The mosquito spread disease can cause a host of problems including birth defects for women who are pregnant.
4/26	Passe Partout	Health	:50	Researchers in Canada say they've isolated a protein called OSMR that may one day help fight one of the deadliest cancers, Glioblastoma.
4/26	News 10 at 10	Health	:30	Pilgrim's Pride is recalling more than four and a half million pounds of fully cooked chicken products. Tainted products could have bad health effects.
4/27	Passe Partout	Health	1:05	There are more than 165 thousand mobile apps for healthcare, targeting everything from addiction to schizophrenia. But mental health experts say most have not undergone rigorous scientific review to see if they work.
4/27	News 10 at 5	Health	1:30	Doctors are using a promising new treatment for liver cancer. It involves tiny beads coated with a chemotherapy drug.
4/28	Passe Partout	Health	1:00	A traumatic brain injury may impact a person's sleep a year and a half after the injury. Researchers also say people with TBI

				don't seem to realize just how much their sleep is disturbed.
4/29	Passe Partout	Health	1:00	Getting diagnosed with cancer increases your risk for mental health disorders including depression and anxiety. That's according to researchers in Sweden who found a cancer diagnosis also increased the use of psychiatric medications.
4/29	News 10 at 5	Health	1:30	Treating the mind of a cancer patient is just as important as the chemo and radiation. A new program lets animals and humans heal each other.
5/2	Passe Partout	Health	:50	New research links autism and aerial spraying for mosquitos. The findings show neighborhoods with pesticide spraying often have a higher rate of children with autism.
5/2	News 10 at 10	Health	1:00	Addiction specialists say the medicine cabinet has become the new drug dealer. 28,000 people died from overdoses linked to opioids in 2014, the most recent federal data available.
5/3	Passe Partout	Health	:50	A new study suggests that most people, not just people who are obese, could benefit from cutting calories every day. Doctors in Louisiana found when adults of normal weight restricted calories by 25 percent over two years, they had improved sleep, less stress, and a healthier quality of life.
5/3	News 10 at 10	Health	:45	A new study at Johns Hopkins finds more than 250,000 deaths per year are due to medical error in the U.S.
5/4	Passe Partout	Health	1:15	The CDC says at least 30 percent of antibiotics prescribed in the U-S are unnecessary. Researchers found doctors offered antibiotics to people with respiratory conditions caused by viruses that do not respond to antibiotics, including the common cold, viral sore throats, bronchitis and sinus and ear infections.
5/4	News 10 at 5	Health	1:30	More breast cancer patients are opting to receive oncoplastic breast reconstruction. This surgery, which combines cancer surgery and plastic surgery, allows qualifying women to get a lumpectomy in conjunction with breast reconstruction, often at the same time.

5/5	Passe Partout	Health	1:05	A new study finds the health benefits of walking and bicycling outweigh the negative health effects of air pollution.
5/6	Passe Partout	Health	:50	Weight loss surgery could have another benefit for obese teenage boys. Researchers found the surgery can boost the level of HDL, so-called good cholesterol.
5/9	Passe Partout	Health	:50	A new study found a rapid rise in nicotine poisonings among children exposed to e-cigarettes. Researchers found the numbers of children at risk each month jumped almost 1500 percent since 2012.
5/9	News 10 at 10	Health	:30	The threat of the Zika virus hasn't been met with much urgency in Washington, D.C.
5/10	Passe Partout	Health	:55	A new study suggests a junk food diet can cause as much kidney damage as diabetes.
5/10	News 10 at 10	Health	2:35	We aired a special report about reading food labels correctly to ensure you are eating healthy food.
5/11	Passe Partout	Health	1:05	A new national survey finds many adults have asthma and don't know it. Research from National Jewish Health finds most people are aware of common symptoms including wheezing and shortness of breath, but not other signs such as trouble sleeping, chest pain and persistent cough.
5/11	News 10 at 5	Health	1:00	Technology has in many ways made our lives so much easier and is even credited with saving lives. But many experts say technology addiction is very real and young people are not immune.
5/12	Passe Partout	Health	:55	A team of U.S. researchers found consuming a lot of fruit during adolescence was linked to a 25 percent lower risk of breast cancer in middle age. Apples, bananas and grapes appeared to have the greatest benefit.
5/12	News 10 at 5	Health	1:15	Preparing vegetables, rather than eating them raw, can maximize their health benefits.
5/13	Passe Partout	Health	1:00	Millions of people suffer from chronic pain, even when the injury that caused it has healed. A new study suggests that's because cells in the nervous system carry a memory of the initial trauma, and that causes the pain to persist.

5/13	News 10 at 10	Health	:30	House Republicans are preparing a spending package to combat the Zika virus
5/16	Passe Partout	Health	:45	Researchers say a father's lifestyle and age may affect children's health. Doctors linked older fathers to higher rates of schizophrenia, autism, and birth defects in children. And up to three-quarters of babies with fetal alcohol problems had alcoholic fathers.
5/16	News 10 at 10	Health	:30	The state's medical marijuana expansion bill is heading to the governor's desk. Senator Fred Mills' bill will broaden the bill to cover more diseases.
5/17	Passe Partout	Health	1:00	Researchers in Maryland report a link between increased exercise and a lower risk of thirteen types of cancer. Doctors say higher levels of physical activity were associated with lower rates of esophageal, liver, lung, kidney and other cancers.
5/17	News 10 at 5	Health	:30	Every 43 seconds, an American has a heart attack. Nearly half of all heart attacks may be silent.
5/18	Passe Partout	Health	1:15	New research shows women who eat four or more servings a week of potatoes are more likely to have an increased risk of high blood pressure. Researchers say the findings are similar for men who eat more servings of French fries.
5/18	News 10 at 5	Health	1:30	A new study finds the location of tumor can predict survival rates for advanced colon cancer patients.
5/19	News 10 at 10	Health	1:50	It's tanning season, but consider this before baking in the sun. Diagnoses of melanoma, the deadliest form of skin cancer, have doubled in recent decades. With almost 150,000 melanoma cases in the U.S. expected this year, some experts are outraged that the FDA has delayed the approval of several potentially life-saving sunscreen ingredients.
5/23	Passe Partout	Health	:50	A new study suggests young women who survive cancer do not get enough information about how to preserve fertility.
5/23	News 10 at 5	Health	1:15	There are countless products out on the market promising you firmer, smoother looking skin. But scientists are developing something they hope will have multiple

				applications, including delivering a big blow to wrinkles.
5/24	Passe Partout	Health	:55	A new study suggests it's okay to let babies cry themselves to sleep. Researchers say infants left alone while fussing in their cribs fell asleep faster and stayed asleep longer.
5/24	News 10 at 10	Health	:30	The U.S. House passed a bill today to make it easier for state and local governments to use pesticides against mosquitos. They say it's to prevent the spread of the Zika virus.
5/25	Passe Partout	Health	1:00	There could be a negative impact on kids whose families move often. In a new study, researchers found many children's math and reading scores dropped each time their family relocated. They also found higher rates of emotional and behavioral problems in children who move frequently.
5-25	News 10 at 5	Health	1:15	A new study suggests medical errors may kill at least 250 thousand people a year, making it the third leading cause of death in the United States.
5/26	Passe Partout	Health	1:10	Many obese young adults are unaware they are at an increased risk for chronic kidney disease. Researchers say between 6 and 11 percent of obese young adults have elevated levels of a protein in their urine which signals that their kidneys aren't functioning normally.
5/27	Passe Partout	Health	1:15	Doctors have found a woman in the United States carrying a superbug that's resistant to even the most heavy-duty antibiotics. Doctors say the organism didn't even respond to Colistin, the antibiotic of last resort.
5/27	News 10 at 10	Health	1:30	A new federal study is linking tumors in rats to exposure to cell phone radiation. But the study is raising more questions than answers.
5/30	Passe Partout	Health	:55	Patients undergoing eye surgery are much less anxious when they hear relaxing music just before the procedure. French researchers found patients who listened to instrumental music needed significantly less sedation and reported higher satisfaction afterwards.
5/31	Passe Partout	Health	:45	Doctors at Yale University say early exposure to nicotine can trigger genetic changes long after birth. They say maternal smoking is linked to behavior disorders and addictions in lab animal tests.

5/31	News 10 at 5	Health	1:15	When it comes to lowering your cholesterol, a few simple measures can go a long way.
4/5	News 10 at 10	Education	:30	Uncertainty surrounds thousands of college students who depend on the state's TOPS free tuition program. Students use the money to receive a higher education.
4/6	News 10 at 10	Education	1:45	Lafayette Parish School Board members chose a name for the newly planned high school in the Youngsville area. It will be called Southside High School. Students will attend the school to receive a good education.
5/5	News 10 at 10	Education	1:15	In order to better balance Lafayette Parish School System's budget, leaders are proposing getting rid of a number of teaching positions. Those positions are filled to help better educate students in the parish.
4/19	News 10 at 10	Traffic/Road Conditions	1:45	Residents and business owners brought their concerns about possible changes to Moss Street to the Lafayette Consolidated Council. DOTD is proposing narrowing the street from four lanes to two lanes and adding bike lanes. This will affect traffic flow in the area.
5/26	News 10 at 10	Economy	1:30	Even though the price of oil is rising, experts in the oil and gas industry say it will still take some time to get the job market back to what it once was in the oil and gas industry.

Date:	Show:	Topic:	Run time:	Context:
6/1	Passe Partout	Health	1:10	New research from the Children's Hospital of Philadelphia and the CDC finds there is a big gap in how the U.S. estimates how many children suffer concussions. Currently, concussion cases are based on ER visits and information from schools. But the new study looked at 8,000 electronic records of pediatric concussions and found 82 percent of them were diagnosed by a primary care physician.
6/2	Passe Partout	Health	1:00	A new study finds long-term marijuana use is linked to periodontal disease.
6/2	News 10 at 5	Health	1:30	Researchers at LSU's Pennington Biomedical are at it again. There's a new study available for people with Type Two diabetes.
6/3	Passe Partout	Health	1:05	A study found that overweight people are turning to smartphone apps to help them diet. But out of 3,000 of those programs, less than one percent are actually developed by

				certified health organizations. Researchers say there are no published reports on whether the apps are effective.
6/3	News 10 at 5	Health	1:30	In a report, we explained how to protect yourself from poison ivy when doing outdoor activities.
6/6	Passe Partout	Health	:55	Young Hispanic and black cancer patients are nearly 75 percent more likely to die from some forms of the disease than white patients.
6/7	Passe Partout	Health	:55	A new study suggests people who are chronically sleep-deprived and working the night shift may be at increased risk of cardiovascular disease.
6/7	News 10 at 5	Health	1:30	Summer is a great time to enjoy the outdoors, but medical experts say to be on the lookout for ticks.
6/8	Passe Partout	Health	1:10	Marriage may truly be good for the heart. A study presented to the British Cardiovascular Society finds married people are 14 percent less likely to die after a heart attack than single people and they're likely to spend less time in the hospital. Researchers say the findings emphasize the importance of a spouse's physical and emotional support.
6/9	Passe Partout	Health	1:05	A picture may be worth a thousand words when it comes to washing your hands. Researchers in Detroit found that seeing images of the bacteria found on everyday items inspired more healthcare workers to do a better job at cleaning their hands.
6/9	News 10 at 10	Health	1:00	New concerns about the FDA's food recall process. The Inspector General from Health and Human Services is issuing what is called a rare alert.
6/10	Passe Partout	Health	1:05	The air you breathe could put you at risk for stroke. A new study in the Lancet Neurology Journal says almost a third of strokes worldwide are linked to air pollution.
6/10	News 10 at 10	Health	1:50	In a report, we talked about the health dangers of flip flops.

6/13	Passe Partout	Health	:50	A new study suggests a high percentage of migraine sufferers, children as well as adults, have mild deficiencies in Vitamin D, Riboflavin and Co-enzyme Q-10..
6/13	News 10 at 10	Health	1:30	Between school and extracurricular activities, many parents struggle with making sure their kids are getting enough sleep. Now the American Academy of Pediatrics is endorsing a new set of sleep guidelines on how much sleep young people should get to stay healthy.
6/14	Passe Partout	Health	:50	A new study suggests eating more whole grains may cut your risk of dying.
6/14	News 10 at 5	Health	:20	A new study suggests eating more whole grains may help you live longer.
6/15	Passe Partout	Health	1:00	Eating a diet full of plant-based foods may substantially lower the risk of developing Type 2 Diabetes. Those who consumed more fruits, vegetables and nuts, and less red and processed meat, had a 20 percent lower risk of diabetes.
6/15	News 10 at 5	Health	1:30	A team of doctors is learning more about a device that's being used to save limbs from amputation. Peripheral Artery Disease happens when plaque builds up inside the arteries blocking blood flow. Complications include heart attack, stroke and losing the legs.
6/16	Passe Partout	Health	1:00	Treating young children repeatedly with antibiotics may disrupt the development of healthy bacteria inside their gut. These bacteria play a critical role in regulating metabolism and the immune system. Researchers at Massachusetts General Hospital say it's not clear whether there are long-term consequences.
6/16	News 10 at 10	Health	1:00	Acadian ambulance says it responded to more than 850 heat related emergencies this time last year. More than 100 calls were here in Lafayette.
6/17	Passe Partout	Health	1:00	If you want to remember something, you might want to exercise. Researchers discovered people who exercised four hours after learning new information remembered it better than those who exercised immediately or not at all.

6/17	News 10 at 10	Health	1:00	We gave people suggestions on how to protect their pets in the hot weather.
6/20	Passe Partout	Health	:50	Most children who get concussions on playgrounds and playing sports are not treated in hospitals. That's according to researchers at the University of Washington. Doctors say the finding shows the need for all health care providers to improve concussion training.
6/20	News 10 at 10	Health	1:00	We gave an update on the construction of a veterans' health clinic. Veterans will be able to start getting care from doctors in December.
6/21	Passe Partout	Health	1:00	The FDA has given an experimental Zika vaccine the green light for safety testing in people. Researchers hope the vaccine will help prime the immune system to combat the mosquito-borne virus, which is linked to birth defects.
6/21	News 10 at 10	Health	:25	Listeria is being blamed for a voluntary recall issued on frozen vegetables.
6/22	Passe Partout	Health	1:00	A study of the U.S. diet shows signs of improvement. Americans are eating more whole grains, nuts and fish, and cutting back on sugary drinks.
6/22	News 10 at 5	Health	1:30	A powerful new cancer fighting tool is headed to Baton Rouge.
6/23	Passe Partout	Health	1:00	A new study finds women are less likely than men to receive life-saving procedures when having a heart attack. Hospital data shows women are 25 percent less likely to receive coronary angiography and 29 percent less likely to have angioplasty when in cardiac arrest. New York researchers were unable to pinpoint a reason.
6/23	News 10 at 10	Health	1:30	A CDC advisory committee recommended today that Flumist, the nasal spray influenza vaccine, should not be used during the upcoming flu season.
6/24	Passe Partout	Health	1:00	Researchers in the UK say an antibody that fights the dengue virus may lead to a vaccine against the Zika virus.
6/24	News 10 at 10	Health	:25	There are apps women can use to get birth control.

6/25	Passe Partout	Health	1:00	Teen suicide is now the second leading cause of death among adolescents. The American Academy of Pediatrics is publishing updated guidelines for doctors so they can better identify teens at risk from bullying and problematic internet use.
6/27	News 10 at 5	Health	1:30	The American Academy of Pediatrics is publishing updated guidelines advising pediatricians how to identify and help teens at risk for suicide.
6/28	Passe Partout	Health	1:10	Exercise may do more than just improve young bodies. The British Journal of Sports Medicine says physical activity can boost young people's brain power and academic performance.
6/28	News 10 at 10	Health	:25	The U.S. Senate blocked a 1.1 billion dollar bill to fight the Zika virus in the U.S. The bill would have cut 750 million dollars from other health programs to help develop a vaccine and pay for mosquito control.
6/29	Passe Partout	Health	1:00	Federal health officials have approved the first pill to treat all major forms of Hepatitis C. The virus attacks the liver. The FDA says data shows this new treatment cures 95 percent of patients.
6/29	News 10 at 10	Health	1:00	Because it is discolored, residents have concerns that the water in Carencro is not safe to drink.
6/30	Passe Partout	Health	:55	The death rate from heart disease and stroke has been declining for more than a decade in the U.S. But the latest study finds that even with advances in treatment and prevention, the improvement is leveling off.
6/30	News 10 at 10	Health	1:00	A health advisory has been issued for some beaches in Louisiana. This because bacteria may be in the water.
6/1	News 10 at 10	Education	1:30	The Performing Arts Academy is moving from Lafayette High School to Comeaux High School. Those students in the academy will have to go to Comeaux High to get an education.
6/8	News 10 at 10	Education	:25	Governor Edwards has signed some tougher GPA requirements for the TOPS scholarship program into law. Students use the funding to help them get a college education.
