Their public school teachers and local business leaders work together. When that happens, kids learn the connection between school and work. That builds a strong work force, which helps leads to a strong local economy and that's good for all of us. When teachers and business leaders work together, great things happen in our Nebraska communities. Good schools are indeed good for business.       |

Something or someone's behavior that doesn't seem quite right. These are the moments to take a pause because if something doesn't feel right, it's probably not. It's not about paranoia or being afraid. It's about standing up and protecting our communities, one detail at a time. Because a lot of details can become a pattern. We trust our instincts, just like you should because only you know what's not supposed to be in your every day. So protect your every day. Getting enough food to eat shouldn't be one of them. But here in America, that is a real worry for 1 in 5 children. Even though we are one of the most food rich countries in the world, 15 million children don't know where their next meal is coming from. This is unacceptable, and something that feeding America Nationwide network of food banks is working to solve. Instead of accepting that our country lets billions of pounds of surplus food go to waste every year, Feeding America has made it their mission to help families in need by rescuing this food. Through food pantries and meal programs, a nationwide network of food banks provides more than 3 billion meals, serving virtually every community in the United States, including yours.
