Dale Scherbring  
Regional Director of Engineering  
Sinclair Broadcast Group  
2000 W. 41<sup>st</sup> St.  
Baltimore, MD 21211

December 27, 2021

Dear Dale,

The letters announcing the intention of KSNV to begin broadcasting using their Experimental ATSC 3.0 license were mailed on December 22, 2021 to 300 medical facilities within KSNV's predicted coverage area.

Enclosed is a copy of the Medical Notification Letter, a list of the addresses, and proof of mailing stamped by the US Post Office in Orlando, Florida.

RF Notifications will store the undeliverable letters returned by the USPS for 6 months. If at any point they are required, please let us know and we will send them to you ASAP. Please note that the average return rate is generally eight to ten percent and letters are typically returned due to: the facility relocating and forwarding has expired, the name was changed, the facility refused to accept the letter, or the operation merged with, or was acquired by another company.

The returned letters along with the total list of facilities notified and the proof of mailing will be evidence of your sincere attempt and good faith effort to identify and notify health care operations in your coverage area. Please place these documents in your Public File.

In closing, it has been a pleasure to serve you and your station, and I look forward to helping you with any other notification needs as they arise in the future.

Sincerely,

Lisa Sockett  
COO – RF Notifications

File No.: 0000176937 Facility ID No: 10179

**THIS LETTER CONCERNS TELEMETRY OPERATION. THE RESPONSIBLE PARTY FOR OVERSEEING AND/OR MAINTAINING CLINICAL OR BIOMEDICAL ENGINEERING EQUIPMENT AT THIS FACILITY MUST RECEIVE THIS LETTER.**

Dear Administrator or Biomedical Engineer,

KSNV has retained RF Notifications, a broadcast TV consultant, to notify you of the impending addition of an experimental digital television transmitter in your area.

We are notifying you of this channel addition because patients at your facility may use biomedical telemetry devices that operate in the television broadcast band and may be affected when this change takes place.

On or about January 4<sup>th</sup>, 2022, KSNV will begin testing an experimental ATSC 3.0 broadcast channel. This testing will continue thru January 20<sup>th</sup>, 2022. This transmission will be using UHF channel 33.

Certain biomedical telemetry devices have been allowed to use unoccupied TV channels in their area on a **secondary basis**, according to the rules of the Federal Communications Commission (codified at 47 CFR 15.242 (a)(1)). If interference to or from these devices arises with regard to the TV broadcast service, the devices must cease operation on that channel. It is the responsibility of the medical facility or operator of the device to identify and retune its equipment to an alternative non-interfering channel.

The purpose of this letter is to provide you information and give you reasonable opportunity to resolve any issues. It will be important for you to discuss these changes with your technology supplier, especially if there is a possibility that biomedical devices used in your facility are likely to malfunction when KSNV's transmitter begins TV channel operations. **If you plan to replace your biomedical equipment, we urge that you purchase equipment designed to operate in the frequencies set aside for medical use.**

The contact information for the broadcast executive in charge of the TV station, along with the commencement date, TV channel and frequency band for this station is listed on the attached page. Please contact the individual listed on the attached page who is associated with the specific channel, if you wish for more information or want to report anticipated or actual interference problems.

Kind Regards,

Lisa Sockett, COO - RF Notifications

## Relevant Technical Information

This notice is being sent to announce that KSNV's experimental ATSC 3.0 will begin its broadcast transmission on UHF channel 33 as described below.

### KSNV 3.0

DTV Channel	33
RF Band:	584-590 MHz
Operational dates:	01-04-2022 thru 01-20-2022
Effective Radiated Power:	42 kW
Antenna Location:	36-00-27.3 N 115-00-26.9 W
Antenna Height (center of radiation)	Above Ground 47.4 meters Above Mean Sea Level 1065.7 meters Above Average Terrain 374 meters
