**Subject: Agriculture Deficit**

**Date: 3/14/2017**

**Time: 9:00 P.M.**

**Length: 2:04**

**Description:** 131 million dollars short. That's how off the state is from its expected revenue estimate. State lawmakers have already slashed 118 million to state agencies. The shortfall in revenue is mainly due to three areas: anticipated sales tax revenue, lower income tax estimated payments and income tax final payments - all coming in lower than anticipated. Unemployment is now at 3.3 percent - the lowest in 16 years. You'd think that with higher wages and near full employment - sales tax revenue should be growing - but it's flat. Income tax estimate payments are down 5 percent. Another factor? Iowa's farm economy. Rural Iowa continues to struggle. So what does this all mean for the current budget? The governor will most likely be looking to reserve funds to fill the deficit, something he typically doesn't like to turn to.
