Re: Public Inspection File: Local Public Notification for KWSB

In the period approaching our license renewal in 2013 and 2014, KWSB ran a regular :30 PSA that stated the station was up for renewal of its broadcast license, and instructed listeners on how to provide comment, as described in the copy provided to the station via the FCC website. Evidently, no negative comment or concerns were provided as our renewal for license was granted on 8/18/2014 by the FCC.
