Reduced Power Operation

WCVT (FM) is licensed to operate at an ERP of 1.0 kW (DA H&V) but is unable to maintain full power due to heavy icing and possible antenna damage or deterioration. This is notification that the station will exceed 10 days of reduced power operation. As of today, the station is operating on an emergency antenna with 70w ERP and vertical polarization to maintain the radiated 60dBu contour within the licensed 60dBu contour. If the station is unlikely to be able to return to full power with authorized facilities within the next 20 days, Radio Vermont Classics LLC will request temporary operation at variance from licensed parameters with Special Temporary Authorization.

Statement of Preparer

This exhibit has been prepared by Elliott (Chip) Morgan, whose qualifications are a matter of record in the Federal Communications Commission.
