

K49ND-D
Explanatory Statement Concerning Annual EEO Public File Reports

Effective May 22, 2015, in connection with transfer of analog station K13CO's Class A status to digital companion channel K49ND-D, K49ND-D is part of the same employment unit with commonly owned station KIFI-TV. Both stations are licensed to and serve the Idaho Falls-Pocatello Designated Market Area. The annual EEO Public File Reports uploaded to this online public file, as of May 22, 2015, report data for both K49ND-D and KIFI-TV and apply to both stations. Annual EEO Public File Reports uploaded to the online public file prior to May 22, 2015, report data for both K13CO and KIFI-TV.

The 2015 EEO Public File Report was uploaded three days late due to technical difficulties with the online public file in connection with the transfer of K13CO's Class A status to K49ND-D. Licensee personnel attempted to timely upload the 2015 report on June 1, 2015, and, when they could not successfully do so, communicated that day with FCC e-support staff about the technical difficulties. *See* ULS Help Cases HD0000002535636 (submitted June 1, 2015, and response from FCC sent June 2, 2015) and HD0000002536222. With troubleshooting assistance by phone and email from the FCC e-support staff over the period June 1-4, the licensee was able to upload the report to the online public file on June 4, 2015.
