**2016**

**1<sup>st</sup> Quarter Issues/Programs List**

**From January 1, 2016**

**to**

**March 31, 2016**

## WNDZ-AM Quarterly Issues/Programs List

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
The Arts; Education; Child Development; Psychology; (War; Law; Human & Civil Rights)	Viewpoints/Segment 1	01/03/16	3:01pm-3:12pm	11 minutes
	(Segment 2)		3:15pm-3:25pm	10 minutes

**Narration:** Many schools are cutting back or cutting out music education because of funding restraints. Is this a good idea? What do music and the other arts bring to a child's overall education and development? Two arts experts and some students talk to us about the value of music education in a child's life, and hear from some students about their experiences playing and studying music in and out of school.

**(Segment 2)** In school we learn that the American Revolution began with the battles of Lexington and Concord. But did it? A historian and author talk to us about the events that preceded those battles that effectively threw out the British rule in Massachusetts and set the stage for the other colonies to revolt and fight for freedom from England.

Health Care; Public Health; Consumerism; Environment & Weather; Prevention; (Environment & Pollution; Consumerism; Consumer Safety)	Radio Health Journal/Segment 1	01/03/16	3:32pm-3:44pm	12 minutes
	(Segment 2)		3:45pm-3:53pm	08 minutes

**Narration:** Millions of Americans suffer pain as a result of weather changes. Experts discuss different conditions affected by weather, why pain responds to weather changes, and possible remedies to some of these maladies.

**(Segment 2)** The average American is exposed to more than one hundred potentially toxic synthetic chemicals every day, and there is little oversight of their safety. A noted expert discusses the vast amount that we don't know about these chemicals, how the US might regulate them better, and how tougher regulation in other countries could help keep Americans safer.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Immigration; Women's Issues; Discrimination; Science & Technology; Media; (Children & Family Issues; The Arts)	Viewpoints/Segment 1 (Segment 2)	01/10/16	3:01pm-3:11pm	10 minutes
			3:14pm-3:24pm	10 minutes

**Narration:** Sometimes talking about serious subjects, even with friends and family, can cause arguments and bad feelings. But just as Mary Poppins said, "...spoonful of sugar makes the medicine go down," humor can make the discussion of serious subjects go down easier. Our guests are two very talented and funny people who use humor, satire, and irony to make their points about women in science and technology, and the immigrant experience.

**(Segment 2)** Everyone remembers little Gertie from the movie *E.T.: The Extra-Terrestrial* and the actress who played the part, Drew Barrymore. It's been a long time since she made that film and she's had her ups and downs since then. Now, as a forty year-old mother of two, Barrymore talks about her growing up, the problems she had with her family, fending for herself at age fourteen, and what she's learned on the way to becoming an accomplished actress and a mature and loving mother.

Health Care; Workplace Violence; Employment & Workplace Safety; Prevention; Education; (Consumerism; Technology; Health Care; Disabilities)	Radio Health Journal/Segment 1 (Segment 2)	01/10/16	3:32pm-3:44pm	12 minutes
			3:45pm-3:53pm	08 minutes

**Narration:** Healthcare workers are about four times more likely than workers in any other field to be attacked on the job, usually by patients or family members, and most often in the emergency department. Experts discuss how and why attacks occur and how hospitals and health care workers can do a better job preventing them.

**(Segment 2)** Hip and knee replacements are common, and doctors now say ankle replacements have become technically good enough to make fusion obsolete for arthritis patients in pain. A doctor and patient discuss.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Immigration; Religion; Discrimination; Education; Labor; Business; (Family; Health & Well-Being; Culture; Employment)	Viewpoints/Segment 1 (Segment 2)	01/17/16	3:01pm-3:12pm 3:14pm-3:23pm	11 minutes 09 minutes

**Narration:** There is a lot of talk by politicians and others about immigration policy in the United States. Many Americans are all for open immigration for those fleeing poverty and oppression. Others think that we need to stem the tide of refugees and undocumented immigrants to our shores. Our guests talk to us about what immigrants to this country offer to all of us and our economy. We also hear about how we should create a plan to allow them to become full members of the community and receive the education and training they need to succeed in their adopted home.

**(Segment 2)** In our fast-paced world, people get stressed out about things that aren't that important, such as traffic jams, their fantasy football team, and if they're wearing the latest fashions when they take the kids to school. By worrying about those things, they often ignore those everyday events that make life joyful. Our guest shows us through stories from his own life that we should take joy in the *little* victories that make life happy and fulfilling.

Technology; Ethics; Public Health; Economics; Federal Government & Regulation; (Women's Issues; Youth At Risk; Family Issues; Health Care; Politics; Consumerism)	Radio Health Journal/Segment 1 (Segment 2)	01/17/16	3:32pm-3:44pm 3:45pm-3:53pm	12 minutes 08 minutes
---	--	----------	--------------------------------	--------------------------

**Narration:** Scientists have developed the technology to edit single genes, which could eventually eliminate some inherited diseases. If the technology is used on embryos or egg and sperm cells, it could eliminate some diseases from succeeding generations. However, doctors don't know how such "germline editing" or errors in execution of it would affect other genes for generations to come, calling the practice into question.

**(Segment 2)** Many women who can't or don't want to breastfeed their newborns are pressured into trying anyway. An expert and author discuss the political forces creating unusual unanimity behind the issue, and the truth of health claims on breastfeeding's benefits.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Child Sexual Abuse; Education; Justice System; Media; (Science; Technology; Environment; Labor; Consumerism)	Viewpoints/Segment 1 (Segment 2)	01/24/16	3:01pm-3:12pm	11 minutes
			3:14pm-3:24pm	10 minutes

**Narration:** Many stories of child sexual abuse in schools by trusted teachers, coaches, and clergy have come to light in the past decade or so. One of the latest is the abuse suffered by some students at the Horace Mann School in New York City. A former student of the school talks to us about how the story of abuse came to light, and how teachers and coaches lured children into sexual situations. We also hear about how the draconian statute of limitations on child sex abuse in New York and other states hurts victims who wait until adulthood to reveal their horror.

**(Segment 2)** Mined diamonds and gemstones can cause a great deal of environmental damage getting them out of the ground, not to mention the horrible working conditions of miners, some just children, have to endure in some of the world's diamond mines. Lab-grown diamonds and gemstones don't require dangerous working conditions, and they're made with just a fraction of the environmental impact of mined gems. But are those stones grown in laboratory *really* diamonds? Do they look the same as the mined versions? A spokesperson for lab-grown diamonds and a geologist talk to us about this issue.

Health Care; Consumerism; Mental Radio Health Journal/Segment 1 Illness; (Health Care; Consumer- ism; Federal Government & Food Regulation)	(Segment 2)	01/24/16	3:32pm-3:44pm	12 minutes
			3:45pm-3:52pm	07 minutes

**Narration:** A surprisingly high percentage of people who've been treated in intensive care units later suffer from post-traumatic stress disorder, often including hallucinations recalling horrible ICU incidents. This has led to coining a new syndrome, PICS, or post intensive care syndrome. Experts discuss why the syndrome appears to occur and what's being done to treat and prevent it.

**(Segment 2)** Millions of people who think they have allergies, asthma, and sinus problems may actually have "silent reflux" which can travel up the esophagus all the way to the throat and head. An expert discusses telltale symptoms and the dietary triggers that can cause the disorder.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Business; Recreation; Sports; (Commerce; Media; Popular Culture; Business; Technology)	Viewpoints/Segment 1 (Segment 2)	01/31/16	3:01pm-3:11pm 3:14pm-3:25pm	10 minutes 11 minutes

**Narration:** Super Sunday is coming up, and football fans are planning their viewing parties. The first game between the Packers and the Chiefs was barely attended, but interest grew through the decades and now it's the biggest American sporting event of the year. We take a look back at the game, and hear about some of its stars, coaches, and dynasties.

**(Segment 2)** The Super Bowl is the big game for the NFL, but it's also the *biggest* game for advertisers. Many people, who don't even like football, tune into the game just to see the ads. But what makes a really good Super Bowl ad? Three marketing specialists talk to us about how to craft a good ad, how ads are measured, and what makes an ad memorable.

Health Care; Consumerism; Public Health; (Health Care; Public Safety; Prevention)	Radio Health Journal/Segment 1 (Segment 2)	01/31/16	3:32pm-3:44pm 3:45pm-3:52pm	12 minutes 07 minutes
---	---	----------	--------------------------------	--------------------------

**Narration:** Heart attacks that produce few if any symptoms may be mistaken for indigestion or simple malaise, but they can be more serious than heart attacks that bring crushing pain because they often don't bring a victim to the hospital for lifesaving help. Experts discuss.

**(Segment 2)** Low-level systemic inflammation is being tied to many disorders including heart disease, and now research has even tied inflammation to intermittent explosive disorder, a syndrome of repeated rage. Experts discuss these findings and how inflammation can be combated through diet and supplementation.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Employment; Finance; Taxes; Business; (Science & Technology; Healthcare; Senior Citizen Issues)	Viewpoints/Segment 1 (Segment 2)	02/07/16	3:01pm-3:12pm 3:15pm-3:25pm	11 minutes 10 minutes

**Narration:** Its campaign season and we're hearing from politicians about the wage gap between the top one percent of earners in this country and the rest of us. What is the gap? When did it begin to develop and why? And what can we do to narrow it? Our guests tell us their opinions on the subject and some solutions.

**(Segment 2)** Do humans have more than five senses? Can we detect more in our environment than what we normally perceive through sight, sound, smell, touch, and taste? Our guests wanted to know, so she spoke to scientists, engineers, and *biohackers* about learning from our five senses and perhaps even finding a 6<sup>th</sup> sense.

Youth At Risk; Developmental Disorders; Education; (Food Safety; Consumer Safety; Sports & Recreation)	Radio Health Journal/Segment 1 (Segment 2)	02/07/16	3:32pm-3:43pm 3:44pm-3:52pm	11 minutes 08 minutes
---	---	----------	--------------------------------	--------------------------

**Narration:** Stuttering has been blamed even fairly recently on parenting, but new research has several new findings: a structural deficiency in the brain's wiring in stutterers; an inability to perceive rhythms; and a much more successful way to treat stuttering. Experts discuss the new advances.

**(Segment 2)** Super Bowl party snacks are prime territory for contamination via cross contamination and being dropped on the floor. A scientist who has studied both phenomena discusses the truth (or lack of truth) in two old myths.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Immigrants; Teen Issues; Slavery; Crime; Law Enforcement & Criminal Justice System; Substance Abuse; (Business; Mental Health; Productivity)	Viewpoints/Segment 1 (Segment 2)	02/14/16	3:01pm-3:13pm	12 minutes
			3:16pm-3:25pm	09 minutes

**Narration:** Sex and labor trafficking are big business in the U.S. and around the world. Often it's young people and immigrants who are forced to work in the sex industry or in sweatshops, restaurants, and hotels with little pay, horrible hours, and horrible living conditions. An author, whose experienced dealing with young people caught in this web, and a university lecturer who's an advocate for trafficked victims, talk to us about the extent of the problem, how desperate people become ensnared in the trafficker's trap, and how law enforcement and communities can help the victims escape from a life of slavery and abuse.

**(Segment 2)** About this time of year, New Year's resolutions begin to wane, and most die. How do you keep them going? And how can you make better ones that you're more likely to keep in the future? Our guests give advice on crafting a goal and setting up a process that will help you attain it.

Public Health; Consumerism & Consumer Safety; Federal Government; Government Regulation & Oversight; Economics; Ethics; (Consumerism; Economics; Insurance; Technology)	Radio Health Journal/Segment 1 (Segment 2)	02/14/16	3:32pm-3:45pm	13 minutes
			3:46pm-3:53pm	07 minutes

**Narration:** Clinical trials are much of the basis for the practice of medicine. Funding of trials has dramatically shifted so that today, trials paid for by pharmaceutical and device makers outnumber publically funded trials 6-to-1. Some studies indicate this makes bias in trials more likely, jeopardizing public health. Experts discuss.

**(Segment 2)** American healthcare is the most expensive in the world. An expert author details some of the causes and possible solutions now being established.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
African-American Studies; Education; Science; Urban Issues; Racial Discrimination; (Education; Literature; Poplular Culture & Media; Teen Issues)	Viewpoints/Segment 1 (Segment 2)	02/21/16	3:01pm-3:12pm	11 minutes
			3:15pm-3:25pm	10 minutes

**Narration:** At the beginning of the twentieth century, the study of sociology was dominated by the University of Chicago and other, historically white universities. Scholars at these schools conducted “armchair” theorizing, which is developing theories without actually going into cities and towns to talk to the people they were studying. One man, an African-American scholar and author, changed all that with his groundbreaking research and writing about Black people, their culture, and economic and social situations in urban areas. A sociologist talks to us about W.E.B. Du Bois and his work, and why he was denied the accolades he deserved for developing a new way to research and study various populations in the United States.

**(Segment 2)** A great many books and films these days deal with a dark, forbidding world where young people are warring with the villainous adults to save civilization. Teens are drawn to these stories, but why? What is it about dystopian fiction that fascinates young people? Two successful authors of these stories talk to us about how kids are working out some of the issues in their own lives through these post-apocalyptic novels and learning valuable lessons about hope, trust, friendship, good, and evil.

Public Health; Pubic Safety; Infectious Disease; Youth At Risk; Women’s Issues; Abortion; Travel & Tourism; Mosquito Abatement; (Healthcare; Food Additives)	Radio Health Journal/Segment 1 (Segment 2)	02/21/16	3:32pm-3:45pm	13 minutes
			3:46pm-3:52pm	06 minutes

**Narration:** Mosquito-transmitted Zika virus has arrived in Central and South America, and while most people are not affected by it, the virus has been linked to microcephaly, a severe birth defect. Experts discussed the virus, how it’s transmitted, its spread to the U.S., and how to protect you from it.

**(Segment 2)** Thyroid disease affects millions of Americans, many of whom have not been diagnosed. Experts discuss symptoms, causes, and treatments.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Crime; Mental Health & Human Behavior; (Wildlife; Farming; Environment; Science)	Viewpoints/Segment 1 (Segment 2)	02/28/16	3:01pm-3:11pm	10 minutes
			3:14pm-3:25pm	11 minutes

**Narration:** Films like *The Sting*, *Oceans '11*, and *American Hustle* portray con artists as charismatic heroes put to help the little guy get his due. Well, our guest says that they *are* charismatic, but they're hardly heroes. She'll explain the personality of the con man and woman, tell us some of the techniques they use to trick their victims, and warn us that anyone, including the con artists themselves, is vulnerable to their scams.

**(Segment 2)** Cheetahs are the fastest of all land animals; they can reach speeds of up to seventy miles per hour in short bursts. Despite their speed and hunting ability, cheetahs are endangered in Africa and Asia, and don't breed especially well in captivity. In Africa, they can attack livestock herds for food, and that puts them in danger from the subsistence farmers who need to protect their flocks. A wildlife expert, who lives in Namibia, Africa and has studied cheetahs for decades, and a wildlife photographer, who spent three years documenting the lives of a family of cheetahs and other animals, talk to us about this amazing cat, and why it's important to protect it for future generations.

Psychology; Crime; Volunteerism; Technology & Society; Public Safety; (Healthcare; Family Issues; Technology)	Radio Health Journal/Segment 1 (Segment 2)	02/28/16	3:32pm-3:44pm	12 minutes
			3:45pm-3:53pm	08 minutes

**Narration:** It's a psychological paradox that the greater the number of people present when a person needs help, the less likely help will be rendered. Experts discuss reasons why this effect occurs, how it can be broken by technology, and the background of intense research into the effect sparked by the first internationally famous "bystander effect" crime.

**(Segment 2)** Egg donation can solve infertility, but it can be a minefield of emotional risks, especially if the donor and recipient are family or friends. An author/journalist who has donated twice with vastly different results discusses the technology, and what to look out for when approaching egg donation.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Politics; Elections; Media; Health-care; (Agriculture; Food & Nutrition; Personal Finance; Environment)	Viewpoints/Segment 1 (Segment 2)	03/06/16	3:01pm-3:12pm	11 minutes
			3:14pm-3:25pm	11 minutes

**Narration:** The presidential election season is in full swing, and candidates are doing their best to make themselves attractive to the primary voters and to the general public for the November election. Our guest was in the thick of things during the last two election cycles and talks about how Barack Obama got elected to the highest office in the land. He also offers some insight into the president’s terms in office, the rambunctious candidates on the stump now, and the parties’ strategies in this campaign season.

**(Segment 2)** Americans throw away hundreds of dollars per household on discarded and spoiled food, not to mention wasting the water and energy needed to grow it. Why is that? And how can we decrease waste, save money to help the environment, and eat better? Our guest has some advice on buying, storing, and cooking food to minimize waste and create healthy meals.

Health Care; Economics; (Health-care; Family Issues; Technology)	Radio Health Journal/Segment 1 (Segment 2)	03/06/16	3:32pm-3:44pm	12 minutes
			3:45pm-3:53pm	08 minutes

**Narration:** Many primary care doctors are unhappy with the “factory medicine” they have to practice. Some are creating “concierge medicine” practices in response, cutting patient roles, and asking for retainer fees from those that remain. Patients receive much longer appointments, greater access, and more personal care for these higher fees. Two concierge doctors and a patient discuss.

**(Segment 2)** Restless leg syndrome, a neurological condition, strikes people at night, creating some of the worst sleep conditions known by any patients. Experts discuss identifying and treating the syndrome.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Education; International Conflicts; Urban Issues; Poverty; Racism; Religion; (Mental & Physical Health; Productivity; Employment; Family Issues)	Viewpoints/Segment 1 (Segment 2)	03/13/16	3:01pm-3:13pm 3:15pm-3:24pm	12 minutes 09 minutes

**Narration:** Character in a person is something we admire, and something we all would like to think that our kids grow up to achieve. But how do you teach them *character*? What are some of the virtues that go hand-in-hand with character, and how can we instill them in our kids? Two people who work with character education efforts talk to us about how two very different organizations are teaching kids teamwork, responsibility, fairness, friendship, and other character traits in some very trying environments.

**(Segment 2)** People tell us all the time to “have a good day,” but what does that really mean? How *do* you work on having a really *good* day? Our guest has researched the topic and has come up with some very interesting and helpful information from neuroscience and psychology that anyone can use to make their day more productive, less anxiety-provoking, and just more pleasant.

Health Care; Emergency Response; Public Safety; (Health Care; Public Health; Consumerism; Youth At Risk)	Radio Health Journal/Segment 1 (Segment 2)	03/13/16	3:32pm-3:43pm 3:44pm-3:51pm	11 minutes 07 minutes
--	---	----------	--------------------------------	--------------------------

**Narration:** Paramedics and EMTs are the first responders of the health system and often find violent, confusing situations on their arrival. A former paramedic describes the “inside story” of the job, its dangers, and rewards.

**(Segment 2)** Patients often keep lifestyle secrets from their physicians even though it may be harmful to their health. Experts discuss the most common reasons for secret-keeping, and the consequences that may result.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Media; Literature & The Arts; Business; (Business & Employment; Mental Health; Education; Family)	Viewpoints/Segment 1 (Segment 2)	03/20/16	3:01pm-3:10pm 3:12pm-3:24pm	09 minutes 12 minutes

**Narration:** You've no doubt heard the line "everyone's a critic!" Our guest *is* one and thinks we should all be critics of the films, fine art, literature, and other pleasures we indulge in. We hear about why it's good to be a discerning viewer of the arts, how to be a better critic, and how criticism makes us see things in a different light. We also hear about how it helps us become better at choosing those things in life that bring us beauty and pleasure.

**(Segment 2)** We all get stressed now and then, but did you ever consider that this "stress" is actually *fear*? We hear about why that is, and how it can sabotage our lives and work. We also learn how to handle fear when it comes along, and how to do a better job *on the job* of recognizing fear and learning to handle it.

Health Care; Ethics; Technology & Society; Public Health; Economics; (Public Health; Consumerism; Economics; Federal Government)	Radio Health Journal/Segment 1 (Segment 2)	03/20/16	3:32pm-3:43pm 3:44pm-3:51pm	11 minutes 07 minutes
--	---	----------	--------------------------------	--------------------------

**Narration:** Genetic testing has become a widespread reality in the past five years, but doctors are struggling with what many genetic findings really mean. Should patients be told about the presence of genes that might be either dangerous or perfectly harmless? Experts discuss.

**(Segment 2)** Many experts disagree over the roots of the obesity crisis some forty years ago. One well-known expert describes why he believes sugar is to blame, and the changes in the market and government advisories that made sugar a much heavier part of our diets.

<u>Description of Issue</u>	<u>Program/Segment</u>	<u>Date</u>	<u>Time</u>	<u>Duration</u>
Education; Politics; Cultural & Economic Diversity; Religion; Community Standards; (Business; Labor; Government; Community Activism)	Viewpoints/Segment 1 (Segment 2)	03/27/16	3:01pm-3:12pm	11 minutes
			3:15pm-3:25pm	10 minutes

**Narration:** Civic classes in many grade schools and high schools aren't the same as they were twenty years ago, when teachers lectured on "how a bill becomes a law" to a roomful of bored students. These days, kids are more likely to discuss and debate some of the most pressing issues of the day. Two educators talk to us about how some students are teaching students how to debate correctly, how discussion of hot topics can foster understanding of diverse points of view, and the long-term benefits for students who engage in thoughtful, civil, debate.

**(Segment 2)** Economists are saying that American workers' wages are stagnant and have been for quite a few years now despite working longer hours and being "on call" all the time through technology. That doesn't mean that business is lagging though, since corporations, their CEOs, and other high-level managers are doing quite well in that department. Our guest says that work and the way we compensate the rank-and-file workers needs to change to bring up wages and add benefits to make the work environment more equitable. Our guests explain why this inequality exists, and we look at some companies who are bucking that tide, and we find out ways that the system can change through education, government action, and community empowerment.

Health Care; Public Health; Consumerism; (Health Care; Consumerism; Youth At Risk; Consumer Safety; Drugs & Medications)	Radio Health Journal/Segment 1 (Segment 2)	03/27/16	3:32pm-3:44pm	12 minutes
			3:45pm-3:52pm	07 minutes

**Narration:** Doctors often deal with bacterial infections, but they are less familiar with infections involving several different kinds of bacteria in a matrix. This form, known as biofilm, is surprisingly common, resistant to many antibiotics, and gaining new attention as a source of hard to eradicate infections. Experts discuss.

**(Segment 2)** Young adolescents often are allowed to take over the counter drugs on their own, but many OTC medicines, especially acetaminophen, can be dangerous. Experts discuss how to educate 'tweens on taking OTC drugs safely.
