HEALTH	CLEARVIEW - PSYCHIATRIC RESOURCES	Harvey Rosenthal, Executive Director of the New York State Association of Psychiatric Rehabilitation Services talks with Diane Donato about current attitudes toward mental illness. Rosenthal says the term mental illness has been widened to cover many behaviors simply because society hasn't come up with a better way to explain them. Unfortunately, many people who may be struggling, resist getting treatment because they don't want to be labeled, they don't want to be catalogued into a state data system, or they don't have hope that addressing their needs will lead to a positive outcome. Rosenthal talks about reforms that have been made to social systems to advance recovery, but notes that many things, like greater medical community involvement still need to be developed. Smart phone technology has created a temptation for drivers to divide their attention between the road and people trying to get in touch with them. AT&T has launched the It Can Wait public awareness campaign to reinforce the message that driving requires our full attention. Christopher Johnson talks about surveys that have found that even though the public knows texting while driving is dangerous they continue to do it while behind the wheel. He says they have launched #ItCanWait on social media to convince people to pledge not to use smart phones while driving. Johnson says their goal is to save lives and to make distracted driving as socially unacceptable as driving under the influence. He talks about the Virtual Reality 3D simulator that helps people experience distracted driving and about smartphone apps that can hold calls and texts for drivers until they have reached their destinations.</p>	CHRISTOPHER JOHNSON	08/16/2015 07:02 PM	012:18

HEALTH	CLEARVIEW - ACSCAN	Bill Sherman, of the American Cancer Society's Cancer Action Network (ACSCAN) gives us an update on the cancer risks we are facing, some of which are preventable. For example, he says people who use indoor tanning devices before the age of 35 increase their risk of melanoma by 59 percent. Sherman says his group would like the state to further regulate the tanning industry. He also cites a study which finds that 75 percent of children who have used an electronic cigarette in the past year also used a combustible cigarette for the first time. There is growing concern that e-cigarettes may not be harmless and that they may be developing into a gateway product to entice young people to take up the use of traditional tobacco products. Shenman also encourages listeners to take advantage of the state program called Cancer Services Program or CSP. It provides cancer screenings for those who are uninsured or underinsured. HOMELESSNESS	CLEARVIEW - JOSEPH'S HOUSE	<p>Patti Tullgren, Director of Outreach at Joseph's House talks about the services they provide to the homeless and to the mentally ill. She discusses trends they've seen among those who need help and their approach to meet their needs. Joseph's House uses a "housing first" approach, meaning that their first priority is getting a roof over a person's head. Once a homeless person comes into the shelter the staff then helps the individual make choices about what kind of additional assistance they need. Statistics show their approach has been successful. In addition to the beds provided, Joseph's House also has an extensive street-outreach program which helps people wherever they are in need.</p>	JIM SPERO	09/20/2015 07:02 PM	013:14
