BNPFT-20030317LFO	104.5	0.035*	43	0.001391	0.70
TOTAL					60.27

* Circularly polarized

Notes:

The power densities were calculated at a point two meters above ground at the base of the tower, using Equation (9) or (10) of OET Bulletin 65, or Equation (2) of Supplement A of OET 65. All broadcast radiators within 350 meters horizontal distance are included above.

The aural ERP for the analog TV stations was assumed to be 10% of visual. A downward radiated field of 20% was used for all TV and DTV stations.

WVTW(TV), WKIH, WLUM-FM and WXSS are on an adjacent tower 130 meters from the subject tower.
