This is at a time when the state is flush with extra COVID relief cash, but is that money getting out fast enough to those who need it most? To help alleviate homelessness and housing insecurity? To help education, and medical care? It's early March, already the drought's sparking Governor Brown's emergency declaration for Klamath County. Central and southern Oregon are in for a third consecutive year of drought, with some of the worst of it in the area that suffered one of the state's most devastating wildfires ever, the Bootleg Fire, last fire season. According to NOAA: many of the areas most affected by drought would need 150 to 200 percent or more of normal precipitation over the next two months to ameliorate drought conditions. Another big crisis point in Oregon: shootings. 2021 brought Portland's most ever shootings and murders, 1200 documented shootings, nearly 70 homicides with guns, larger numbers than San Francisco and Boston and double Seattle's rate. Our suicide rate is also higher than the national average. Oregon's dropping the mask mandate. Is this good or bad? We've seen current Oregon Governor Kate Brown, cope with really historic challenge after challenge, crisis after crisis: the pandemic, the wildfires, the months and months of protests and clashes with police, near shuttering of businesses, coping with the challenges of online education, record setting violence.
