KINK (FM) PUBLIC AFFAIRS

April 3rd, 2022

5am to 5:30am

28:50 minutes of a 30 minute show

Guest: Oregon State University Professor Dr. Christopher McKnight Nichols. He co-wrote and edited a book about U.S. grand strategy, and who has played a role in shaping it over the last century. “Rethinking American Grand Strategy” contains chapters from various scholars who say that politicians, policymakers and academics need to include more types of strategies and strategists, to optimize their country's goals in the world. Grand strategy used to be associated mostly with military power, but these experts say they need to also include social movements, health care, gender, race, and environment. We discussed how Putin’s approach in Ukraine reflects the old military might grand strategy model, but he wasn’t expecting the newer, soft power elements of political resistance, and citizens fighting for their country internally. So that's why Russia is losing the public relations campaign throughout the world. This approach also shows the need for a global grand health strategy lacking during the COVID-19 pandemic.
