Should we discourage advances in biotechnology and bioengineering that can be used for human enhancement? Or should we take control of our own “evolution” and usher in a posthuman age? And how can we protect the vulnerable in our own families, churches, and communities? Listeners heard this deeply personal and compelling story that shone a spotlight on the physical and emotional impact of abuse, why so many survivors are reluctant to speak out, what it means to be believed, the extraordinary power of faith and forgiveness, and how we can learn to do what's right in the moments that matter most.**

**Program: In the Market**

**Date: September 19**

**Discussion: The United States' approach to China since the Communist regime in Beijing began the period of reform and opening in the 1980s was based on a promise that trade and engagement with China would result in a peaceful, democratic state. Forty years later the hope of producing a benign People's Republic of China utterly failed. The Communist Party of China deceived the West into believing that its system and the Party-ruled People's Liberation Army were peaceful and posed no threat. In fact, these misguided policies produced the emergence of a 21st Century Evil Empire even more dangerous than a Cold War version in the Soviet Union. Defeating the United States is the first step for China's current rulers in achieving global supremacy under a new world order based an ideology of Communism with Chinese characteristics.
