

Rate Class Legend

Classes of Time

	P-Code
Section 1: Non-Preemptible: This class of time is non-preemptible once an order is confirmed, except for an act of God, national or local emergency or scheduling changes. In the event of a program schedule change, timely notification and make goods are guaranteed.	FNP
Section 2: Preemptible With Notice: This class of time is the less likely of the preemptible classes. Advance notice of preemption will be provided. Should a preemption occur, a make good will be offered by Station pursuant to our policy on make goods described on page 3 of the Political Disclosure, unless all commercial time has been sold out at the Section 1 level. Approximate clearance percentage: 90 to 95%.	PMT
Section 3: Immediately Preemptible: This is our most common transaction. Make goods are usual and may not place in same programs. Notice may not occur before an announcement being preempted. Preemption will occur when all immediately preemptible time has been sold and a commercial or political advertiser books a schedule at a higher section level. If preemption occurs, a make good will be offered by Station pursuant to our policy on make goods described on page 3 unless all commercial time has been sold out at the Section 1 through 3 levels. Approximate clearance percentage: 75%.	IMP

Station will, on request, update inquiries as to the likelihood of preemption for Sections 1 through 3 at any given time, but Station emphasizes that the responses can only be good faith estimates.

All rates are subject to change. Special Rotations, Packages and ROS Rates are available. Contact Station for additional or updated information.
