NOLA: PNWE 002057
Series Title: PBS News Weekend
Episode Title: Episode 57
Length: 30 minutes
Airdate: 1/13/2024 6:00:00 PM
Service: PBS-NPS
Format: News (live news only)
Segment Length: 00:06:49

Description:

Since the U.S. Supreme Court overturned Roe v. Wade in 2022, attempts to use the ballot box to enshrine the right to access abortion services into state constitutions have proliferated. This November, the issue could be on the ballot in as many as a dozen states, including some where abortion is banned or severely restricted. John Yang speaks with legal historian Mary Ziegler to learn more.

Length: 60 minutes
Airdate: 1/25/2024 7:00:00 PM
Service: PBS-NPS
Format: News (live news only)
Segment Length: 00:05:49

Description:

Polls show about seven in 10 Americans say abortion should be legal in cases of rape or incest. But since the Supreme Court overturned Roe v. Wade, nine states have banned abortion in those cases. A study in the Journal of the American Medical Association calculates there have been more than 64,000 rape-related pregnancies in areas with bans. John Yang discussed the study with Dr. Samuel Dickman.

Service: PBS
Format: Documentary
Segment Length: 01:00:00
Description:

When skeletal remains of at least 10 people, including several infants, turned up in the basement of Benjamin Franklin's British residence, people wondered if the Founding Father might have had a much darker side, as the bones had been meticulously cut and drilled. Franklin was aware of the bodies in his basement, but they weren't the victims of violent acts. Rather, they were used for the purposes of an illegal anatomy school that helped shaped modern medicine.

Leonardo da Vinci is well known for his inventions as well as his art. New evidence shows that many of his ideas were realized long before he sketched them out in his notebooks- some even 1,700 years before him! Of these "inventions" da Vinci never affirmed that his projects came from his original ideas. This film features drawings of his most famous ideas and inventions, some of which trace their original creation to ancient Greece while others were a product of the scientific inventions of golden age of Islamic learning. This knowledge seemed to be lost in Europe during the Dark Ages until the Renaissance when da Vinci recovered it.

Join renowned paleontologist Kirk Johnson on an epic adventure through time at the polar extremes of our planet. Following a trail of strange fossils found in all the wrong places-beech trees in Antarctica, hippo-like mammals in the Arctic-Johnson uncovers the bizarre history of the poles, from miles-high ice sheets to warm polar forests teeming with life. What caused such dramatic changes at the ends of the Earth? And what controls the dial on Earth's thermostat? Today, the Arctic is warming faster than anywhere else in the world, and Antarctica has locked in its ice enough water to raise sea level by a terrifying 200 feet. The way that the poles respond to a warming climate is one of the greatest wildcards in predicting our climate future. Johnson uses Earth's history, written in stone, as a cipher to decode what is going on at our polar extremes today, and what the future may hold.

Description:

California voters narrowly passed a ballot measure that will fund billions of dollars to help the state tackle its homelessness crisis. Gov. Newsom celebrated the victory, but opponents say it doesn't do enough to keep people from becoming homeless in the first place and gives the state too much control over mental health spending. William Brangham discussed the initiative with Christine Mai-Duc.

Join renowned paleontologist Kirk Johnson on an epic adventure through time at the polar extremes of our planet. Following a trail of strange fossils found in all the wrong places-beech trees in Antarctica, hippo-like mammals in the Arctic-Johnson uncovers the bizarre history of the poles, from miles-high ice sheets to warm polar forests teeming with life. What caused such dramatic changes at the ends of the Earth? And what controls the dial on Earth's thermostat? Today, the Arctic is warming faster than anywhere else in the world, and Antarctica has locked in its ice enough water to raise sea level by a terrifying 200 feet. The way that the poles respond to a warming climate is one of the greatest wildcards in predicting our climate future. Johnson uses Earth's history, written in stone, as a cipher to decode what is going on at our polar extremes today, and what the future may hold.
