QUARTERLY ISSUES/PROGRAM LIST

KRKC-AM
KRKC Country
1490

The Quarterly Issues/Program List for October 1 through December 31, 2023 for Stations KRKC- FM King City, CA (and K295BZ), KRKC (AM) King City, CA (and K268DW and K285FW) and KSGG-FM Soledad, CA broadcasted a total time is 14 hours and 18 minutes.

KSGG-FM
XTRA 104.7

Dimes Media Stations Public Service Announcements support the local and national non-profit organizations by airing their different events and outreach announcements. The Public Service Announcements (PSA's) total time is approximately 38 hours and 55 minutes. This time is representative of the PSA's for the fourth quarter.

TOTAL TIME FOR THE FOURTH QUARTER OCTOBER 1 THROUGH DECEMBER 31, 2023

IS

53 HOURS AND 13 MINUTES

1134 San Antonio Drive, King City, CA 93930

QUARTERLY ISSUES/PROGRAMS LIST

Here follows a listing of some of the significant issues responded by Station KRKC (FM), King City, California, KRKC (AM), King City, California and K3GG (FM) Sledstad, California along with the most significant programming treatment of those issues for the period **October 1, 2023 - December 31, 2023**. The listing is by no means exhaustive. The order in which the issues appear does not reflect any priority or significance.

	Program/Segment	Date	Time	Duration/Total Time	Narration of type and description of program/segment
Constitutional Rights, Citizenship, Education, Consumer Matters, Personal Health/Nutrition, Vehicle Safety	Public Affairs Program in Three Segments	10/08/2023	6:00 AM Sunday all stations	9:06 ; 8:11 ; 5:10 Total Time: 22 minutes	<p>Many Americans do not know what rights are protected under the First Amendment and a substantial number cannot name all three branches of government, according to the 2023 Annenberg Constitution Day Civics Survey. Prof. Levendusky shared other findings from the survey, discussed the reasons behind today's widespread civic ignorance and explained why the trend is so worrisome. Registered dietitians and other online influencers are being paid to post videos that promote diet soda, sugar and supplements on Instagram and TikTok. Prof. Schwartz discussed the little-known tactic often used by the multibillion-dollar food, beverage and pharmaceutical industries to sway consumers faced with often-contradictory health messages about popular products. She offered suggestions to help viewers recognize these paid messages. Minivans are frequently the go-to vehicle for families, not only for passenger comfort but also their ability to hold a lot of stuff. However, the Insurance Institute for Highway Safety recently updated their methods for testing minivan safety, with disturbing results. Ms. Cimminillo outlined the new data and what consumers need to know.</p>

<p>Artificial Intelligence, Personal Health, Housing, Poverty, Economy, Suicide Prevention, Veterans' Concerns, Mental Health</p>	<p>Public Affairs Program in Three Segments</p>	<p>10/15/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>9:02 ; 8:18 ; 5:03 Total Time: 22 minutes</p>	<p>Dr. Mann led a study of healthcare consumers that found that most of ChatGPT's responses to people's healthcare-related queries are nearly indistinguishable from those provided by human physicians. He believes the AI chatbots will be great tools for healthcare providers to communicate with patients, improve quality of care and reduce misdiagnoses and errors. Prof. Painter shared his research that Americans who pay more than 30% of their income toward rent are forced to make trade-offs in other areas of their lives that can last for years and contribute to many social ills. He said while some trade-offs, such as buying less clothing, might not have severe long-term consequences, some rent-burdened residents reported cutting back on medicine and other health care that could have cascading effects. Mr. Lorraine said the suicide rate of military veterans is roughly twice that of the general population, and is often spurred by more than just post-traumatic stress syndrome or depression. He said underemployment, irregular housing and other economic issues also play a large role in suicidal behavior. He talked about the resources that are available to veterans. He said that risk factors for veterans at risk of suicide vary significantly from one state to another, and his organization helps to identify the differences and develop strategies to help.</p>
<p>Racism, Workplace Matters, Adolescent Mental Health, Parenting, High Blood Pressure, Personal Health</p>	<p>Public Affairs Program in Three Segments</p>	<p>10/22/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>8:33 ; 8:45 ; 5:03 Total Time: 22 minutes</p>	<p>While explicit discrimination no longer occurs and organizations make internal and public pledges to honor and achieve diversity, black employees remain less likely to be hired, stall out at middle levels, and rarely progress to senior leadership positions. Prof. Wingfield discussed what she calls "gray areas:" the relationships, networks, and cultural dynamics that exist apart from specific expectations and duties required for any given job. She offered suggestions to address the problem. Dr. Darnour offered advice for parents to understand their teenagers' intense and often fraught emotional lives—and how to support teens through this critical developmental stage. She discussed some of the most common myths relating to teenage emotions and distress, and offered tips to help teenagers maintain or regain emotional control. Getting enough sleep has never been more difficult. Prod. Haghayegh shared his research that found that women who struggled with getting enough sleep were at greater risk of developing hypertension, or high blood pressure. He said hypertension and sleep disorders are becoming increasingly prevalent among American adults. He also noted that, while his study only included women, it's likely the findings apply to men, as well.</p>

<p>Workplace Matters, Business, Health Insurance, Immigration, Senior Issues, Personal Finance</p>	<p>Public Affairs Program in Three Segments</p>	<p>10/29/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>8:16 ; 8:59 ; 5:10 Total Time: 22 minutes</p>	<p>Mr. Misner discussed right and wrong ways to complain at work. He explained why it is important for businesses to take deliberate actions to be sure their staff is heard. He said scheduling regular "complaining meetings" can change the entire mood of the workplace, and lead to innovation and new ideas. Prof. Huguet led a study that revealed gaps in health insurance coverage for seniors residing in the US. She found that about a quarter of low-income patients receiving care at community health centers remain uninsured when they turn 65. The main reason is that they are not eligible for Medicare because they never paid into the Social Security system, in many cases because they are not legal US citizens. She said 20% of the uninsured patients had five or more health conditions, such as diabetes or high blood pressure, that need frequent treatment and management. 40% of Americans during the pandemic could not cover a \$400 emergency in cash. Ms. Cruze explained the psychology that influences how we spend and save money, and how to change those ingrained habits.</p>
<p>Government, Personal Health, Medicare, Scams, Senior Issues, Alzheimer's Disease, ADHD</p>	<p>Public Affairs Program in Three Segments</p>	<p>11/05/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>8:30 ; 8:38 ; 5:15 Total Time: 22 minutes</p>	<p>Mr. Prerau discussed the history of Daylight Saving time. He dispelled the myth that farmers are the main proponents of DST. He also explained where efforts stand to end the annual time change, and outlined the possible options that Congress would choose from. Vague and misleading advertisements for Medicare Advantage policies are flooding the airwaves and mailboxes of Medicare recipients. Ms. Khlopin explained what Medicare Advantage is and how it differs from original Medicare. She also shared examples of complaints from seniors who had their plans changed without their consent or knowledge, and how the scams work. She warned that some TV ads and phone calls may give the impression that they are affiliated with the federal Medicare system, when they are not. She advised seniors to be careful and seek help from legitimate sources. Prof. Beeri shared results of her study that found that people who were diagnosed with attention deficit hyperactivity disorder at midlife had a threefold increased risk of developing dementia later in life, compared to those without ADHD. She also discussed possible explanations for the link between ADHD and dementia, and what role ADHD medications may play.</p>

<p>Medical Errors & Misdiagnoses, Public Health, Drinking Water Safety, Government, Electric Vehicles, Consumer Matters</p>	<p>Public Affairs Program in Three Segments</p>	<p>11/12/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>8:30 ; 8:54 ; 5:11 Total Time: 22 minutes</p>	<p>Dr. Newman-Toker led what is believed to be the first rigorous national estimate of permanent disability and death from diagnostic error. He estimates that 795,000 Americans die or are permanently disabled by diagnostic error each year. He said vascular events, infections and cancers cause 75% of the serious harms, and that stroke is the top cause of serious harm from misdiagnosis. He believes that a serious campaign to target diseases with high error and harm rates may reduce diagnostic errors and improve patient outcomes. Prof. Lewis' research found that water from many wells and community water systems across the US contains unsafe levels of toxic contaminants. She discussed the health effects of seven contaminants, which include cancer, developmental delays, and preterm birth, and how they affect vulnerable populations and communities with lower income levels. She also talked about the challenges of removing these contaminants from water supply systems, and how larger systems tend to have more resources and monitoring than smaller systems. 7.9% of cars sold in the US in the third quarter of 2023 were electric vehicles. Mr. Appel outlined what consumers need to know about the three levels of EV charging currently available, and the pluses and minuses of each.</p>
<p>Education, Career, Parenting, Agriculture, Environment, Child Safety, Traffic Safety</p>	<p>Public Affairs Program in Three Segments</p>	<p>11/19/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>8:48 ; 8:27 ; 4:52 Total Time: 22 minutes</p>	<p>Ms. Gamm explained why parents, educators, and employers urgently need to understand today's generation of teens and young adults. She talked about the revolutionary effect that technological advances have had on education and the development of the human mind. She said every American needs to have a basic understanding of current technology because of the wide-ranging ramifications these changes have on legislation, regulation and privacy. Dr. Graham explained the importance of bees to the nation's food supply. She also discussed the role that pesticides and climate change may be having on bee populations in North America. She outlined simple steps that people can take to increase bee populations in their communities. About every five days, a child in the U.S. dies from a train collision. Ms. Rosenthal said young people, particularly teenagers, do not understand how dangerous railroad tracks and crossings are. She offered advice to parents to teach their kids to not walk or take selfies on railroad tracks, to not walk with earbuds in, and to never try to beat a train at a railroad crossing.</p>

Workplace Matters, Career, Organ Donation, Government Regulation, Parenting	Public Affairs Program in Three Segments	11/26/2023	6:00 AM Sunday all stations	8:31 ; 8:44 ; 5:12 Total Time: 22 minutes	Mr. Bailey said that the human brain has two powerful modes that can be unlocked when we use our attention well: a focused mode and a creative mode. He explained how to unlock each of these mental modes in order to concentrate more deeply, think more clearly, and work and live more deliberately every day. He explained how to minimize distractions that can cause problems at work and in personal relationships. Ms. Murnaghan's young daughter desperately needed a set of donor lungs. A set of lungs was available and there was nothing standing in the way medically, but a federal policy barred children under the age of 12 from receiving adult lungs. Ms. Murnaghan talked about her quest to save Sarah and other kids in similar situations. After a court fight and through the use of social media, she eventually convinced the government to change organ donation rules permanently. Ms. Dell'Antonia said that in her research and writing about family life over the years, one topic keeps coming up again and again: parents crave a greater sense of happiness in their daily lives. She discussed the most common problem areas that cause parents the most grief, and suggested steps parents can take to make them better.
Artificial Intelligence, Employment, Energy, Environment, Sexual Harassment, Women's Concerns, Workplace Matters	Public Affairs Program in Three Segments	12/03/2023	6:00 AM Sunday all stations	8:51 ; 8:32 ; 5:03 Total Time: 22 minutes	Prof. McFowland co-authored a recent study that found that the use of artificial intelligence tools elevates the skills of the lowest performers across a wide range of fields to, or even far above, what was previously average performance. Across a set of 18 tasks designed to test a range of business skills - from analysis to idea generation to persuasion - consultants who had previously tested in the lower half of the group increased the quality of their outputs by 43% with AI help while the top half only gained 17%. He discussed likely limitations in what AI can do well in modern professional work. He believes that AI will not be able to replace most human creativity and problem-solving. Prof. Frank studies job prospects for fossil fuel workers in the green energy transition. He said that fossil fuel workers have skills that are compatible with green jobs, but they face geographic and social barriers to relocate. He also explained why green jobs will span across different skill levels and sectors, but they are not well aligned with the current locations of fossil fuel workers. Ms. Lawrence explained how most companies mishandle sexual harassment cases and why. She also discussed the mental health consequences faced by those who report sexual harassment and how to deal with it. She talked about the impact of the MeToo# movement and what she sees as the future of dealing with sexual harassment as a society.

Public Health, Mental Health, Cyberbullying, Eating Disorders, Discrimination, Education	Public Affairs Program in Three Segments	12/10/2023	6:00 AM Sunday all stations	8:37 ; 8:44 ; 5:05 Total Time: 22 minutes	Burnout is highly prevalent across most healthcare careers, but especially among trainee physicians. Dr. Fainstad developed a pilot program that successfully reduced burnout among female medical residents. She explained that while the program is digital, including videoconferencing coaching calls, she found that the group aspect was especially important in its effectiveness. She discussed the potential hurdles in expanding the training to hospitals and medical schools nationwide. Dr. Nagata's study of US adolescents found that both victims and perpetrators of cyberbullying were more likely than other youth to experience eating disorder symptoms, including worrying about weight gain, self-worth tied to weight, and binge eating. He believes it is important that teachers and parents are aware that these experiences are relatively common among teens, and encourage kids to report online harassment if it occurs. Ms. Fabrega traditional approaches to education, contrasting them with the ways kids really learn. She believes current methods of teaching children are outdated. She explained how her experience as a child who attended ten schools in seven different countries gave her an unconventional perspective. She suggested allowing children to learn through projects rather than strict curriculum, and explained why teaching kids of differing ages as a group, rather than segregating them in conventional grades and ages, can have major benefits.
Social Security, Government, Consumer Matters, School Violence, Air Pollution, High Blood Pressure	Public Affairs Program in Three Segments	12/17/2023	6:00 AM Sunday all stations	8:44 ; 8:41 ; 5:08 Total Time: 22 minutes	Prof. Kotlikoff explained the problem of Social Security clawbacks. He said each year more than a million unsuspecting Americans receive letters from the Social Security Administration, demanding repayment of thousands of dollars of overpaid benefits, due to SSA mistakes that occurred sometimes decades earlier. He shared examples of elderly people who suffered from clawbacks, and proposed reforms to stop them. Mr. Perry was the lead author of a study that examined how teachers rate different approaches to student violence. He said teachers believe that removing or expelling students from school after a violent incident is the least effective response, because it may increase the risk of violence against teachers, as the student may come back bitter or angry. He said most teachers prefer proactive strategies, which aim to create a positive learning environment and a sense of community through socioemotional learning and school counseling. Dr. Kaufman led a recent study that found a link between highway air pollution and higher blood pressure. He said the impact is significant enough to be comparable to other blood pressure factors such as sodium intake and medication. He also suggested some ways to reduce the exposure to traffic pollution both for motorists, and those who live near highways.

<p>Crime, Online Security, Personal Finance, Foster Care, Minority Concerns, Parenting, Nutrition, Cancer, Personal Health</p>	<p>Public Affairs Program in Three Segments</p>	<p>12/24/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>7:43 , 9:24 , 5:01 Total Time: 22 minutes</p>	<p>Scammers have devised a new scheme to steal thousands of dollars from homebuyers who are about to close on a house. Mr. Kalember said buyers are often tricked into wiring their down payment on the day of closing to a fraudulent offshore account, by criminals who have hacked their real estate agent's or title company's email account. He explained how consumers can protect themselves. The number of children in the U.S. foster care system is at record levels, thanks in part to the opioid crisis. With nearly 450,000 children in the system, Ms. Redleaf discussed what happens when caseworkers make mistakes, taking children from parents who are neither abusive nor neglectful. She noted that minority families are disproportionately affected by this trend. She also said that once children are taken, parents and their attorneys sometimes can't learn where the children are being housed. Dr. Gewirtz was the co-author of a surprising study that found that adding highly refined fiber to processed foods could have negative effects on human health, including liver cancer. He explained what ingredients consumers need to watch for on processed food labels. He said the simplest solution is to eat fruits and vegetables naturally rich in soluble fiber, rather than processed foods.</p>
<p>Employment, Career, Social Media, Human Trafficking, Child Abuse, Poverty, Economics, Consumer Matters, Mental Health</p>	<p>Public Affairs Program in Three Segments</p>	<p>12/31/2023</p>	<p>6:00 AM Sunday all stations</p>	<p>7:28 , 9:43 , 4:49 Total Time: 22 minutes</p>	<p>Ms. Britton discussed the most common social media mistakes that take job seekers out of the running for a position. She noted that negative or inappropriate comments and questionable photos are the most common social media issues. She said a job hunter should always assume that a company has combed through their social media profile before even scheduling an interview. Ms. Bradley discussed the issue of human trafficking in the U.S. She said five main factors contribute to the problem, including poverty, abuse and isolation. She explained the shocking role that the foster child system plays in the issue, and she offered suggestions for individuals to make a difference in preventing and stopping human trafficking. Prof. Thaler discussed what happens when economics meets psychology and how irrational human beings greatly influence the US and world economies. He explained how research is in progress to understand human miscalculations, with the goal of developing better decision-making in business, government and life in general.</p>

PUBLIC SERVICE ANNOUNCEMENTS

Here follows a listing of some of the Public Service Announcements of local events and general issues broadcasted by Station KRKC-(AM) King City, California, KRKC- FM King City, California and KSGG (FM) Soledad, California for the period **October 1 2023 - December 31 2023** . The PSA listing is representative of all the broadcasted PSAs. The order in which the PSAs appear does not reflect any priority or significance.

Description of Issue	Program/Segment	Date	Time	Duration/Total Time	Narration of type and description of program/segment
KRKC-AM	PUBLIC SERVICE ANNOUNCEMENTS	9/25/23-10/29/23	A few days in September and Many in October 12AM-12AM	35 30 Second PSAs Total Time: 17 minutes and 30 seconds	KING CITY IN BLOOM (Non-profit organization thanking community for landscape upkeep)
KRKC-AM	PUBLIC SERVICE ANNOUNCEMENTS	9/28/23-10/25/23	A few days in September and A few in October 12AM-12AM	5 60 Second PSAs Total Time: 5 minutes	DAVE THOMAS ADOPTION (Natural Disaster Family Plans)
KRKC-AM	PUBLIC SERVICE ANNOUNCEMENTS	10/1/23-10/29/23	A few days in October 12AM-12AM	5 60 Second PSAs Total Time: 5 minutes	WEIGHT BIAS (Veteran Support)
KRKC-AM	PUBLIC SERVICE ANNOUNCEMENTS	9/25/23-10/29/23	A few days in September and Many in October 12AM-12AM	700 30 Second PSAs Total Time: 5 hours and 50 minutes	RETIREMENT SAVINGS 30 (wesaysaveit Organization Retirement Savings), TEEN SUICIDE 30 (Learn the Signs for Suicide Prevention), PUBLIC SERVICE ANNOUNCEMENT #4524 (Prize Picks Fantasy Sports), FLU VACCINE 30 (CDC Vaccine Recommendation), PREVENT BULLYING 30 (Learn Signs of Bullying to Prevent), PET ADOPT 30 (Adopting From Local Fosters/Shelters), PUBLIC SERVICE ANNOUNCEMENT #4532 (Wendy's Pumpkin Spice Menu/Gain Filings detergent), AA 30 (Alcoholic Anonymous Organization), BABY HEATSTROKE 30 (Baby Vehicle Safety), VAPING 30 (Talking to Children About Vaping)
