He went over the symptoms and warning signs that you need to look for and the importance of taking action immediately, even if the symptoms come and go. There are treatments for stroke that can be performed in the hospital but they are very time sensitive. They see patients every day who waited too long. Nurse Terry is the director of stroke and trauma services. She gave advice to call for an ambulance if you have stroke symptoms, the EMS can communicate directly to the ER so that they are ready with the time sensitive treatments as the ambulance arrives.
