Episode Title: 56 Up
Length: 150 minutes
Airdate: 10/14/2013 10:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

"56 Up" is the eighth film in a series of landmark documentaries that began 49 years ago when UK-based Granada's World in Action team interviewed a diverse group of seven-year-old children from all over England, asking them about their lives and their dreams for the future. Michael Apted, a researcher for the original film, has returned to interview the "children" every seven years since, at ages 14, 21, 28, 35, 42, 49 and now at age 56. In this latest chapter, more of the original group takes part than ever before.

Episode Title: The Black Atlantic (1500-1800)
Length: 60 minutes
Airdate: 10/22/2013 8:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

"The Black Atlantic" explores the global experiences that created the African-American people. Beginning a century before the first documented "20-and-odd" slaves who arrived at Jamestown, Virginia, the episode portrays the earliest Africans, slave and free, who arrived on these shores. The transatlantic slave trade soon became a vast empire connecting three continents. Through stories of individuals caught in its web, the episode traces the emergence of plantation slavery in the American South and examines what the late 18th-century era of revolutions – American, French and Haitian – would mean for African Americans and slavery in America.

Series Title: War of the Worlds: American Experience
Length: 60 minutes
Airdate: 10/29/2013 9:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

On Sunday, October 30, 1938, the night before Halloween, millions of Americans gathered around their radios and heard a news bulletin about strange explosions on Mars, followed by other reports that led them to believe an alien invasion was in progress. Relive the thrill of Orson Welles' infamous radio dramatization of H.G. Wells' War of the Worlds, 75 years after it set off one of the biggest mass hysteria events in U.S. history. The film examines the elements that made America ripe for the hoax: America's longtime fascination with life on Mars; the emergence of radio as a powerful new medium; the shocking Hindenburg explosion of 1937; and Welles himself, the 23-year-old wunderkind director of the drama and mischief-maker supreme.

Length: 60 minutes
Airdate: 11/19/2013 9:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

In 1863, Abraham Lincoln proved himself a master of a new frontier – not on the battlefields of the Civil War, but in his high-tech command center: the War Department Telegraph Office. The internet of the 19th century, the telegraph gave Lincoln new powers to reshape leadership and wield personal control across distant battlefields. It also connected him to the country in new ways, as information poured in, and allowed him to feel the pulse of the country faster than before. The results of Lincoln's pioneering experiment in communication led to the rebirth of America on the fields of Gettysburg ... both in the battle that turned the tide of the Civil War and in the few words that recast the American ideal as a national creed: the Gettysburg Address.

Episode Title: Who Was Lee Harvey Oswald?
Length: 120 minutes
Airdate: 11/19/2013 10:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

FRONTLINE marks the 50th anniversary of the Kennedy assassination with a two-hour reprise of its investigative biography of the man at the center of the political crime of the 20th century. At the heart of the assassination lies the puzzle of Lee Harvey Oswald: Was he the emotionally disturbed lone gunman of the 1964 Warren Commission report? Was he, as the House Select Committee on Assassinations concluded, probably part of a conspiracy on that day in Dallas? Or was he an unwitting fall guy, the patsy, as Oswald himself claimed when he was arrested on November 22, 1963? Twenty years ago, in the most comprehensive attempt on American television to penetrate this enduring enigma, FRONTLINE's investigative team spent more than a year re-examining Oswald's life and sifting through the psychological, political and forensic evidence of his role in the assassination. Traveling to Japan, Russia, Europe, Mexico, Canada and across the United States, the team uncovered new witnesses, documents, photographs, video and audio recordings of Lee Oswald, many of which had never before been made public.

Length: 60 minutes
Airdate: 10/25/2013 10:00:00 PM
Service: PBS
Format: Performance
Segment Length: 00:00:00

Witness the backstage challenges of mounting two issue-driven plays simultaneously in the performance documentary, *The Raisin Cycle*. The two plays, *Clybourne Park* and *Beneatha's Place*, inspired by original drama, *A Raisin in the Sun*, revisit the questions of race and gentrification in America.

Inspired by Hansberry's original and Norris' follow-up, Kwame Kwei-Armah, artistic director of Baltimore's Center Stage, penned a third play, "*Beneatha's Place*," which follows two of the *Raisin* characters to Nigeria and its post-colonial struggles. Baltimore's Center Stage mounted "*Clybourne Park*" and "*Beneatha's Place*" as "*The Raisin Cycle*" and as part of its 50th anniversary season. "*A Raisin in the Sun Revisited: The Raisin Cycle at Center Stage*" is a performance documentary, which captures the history and legacy of *Raisin* and the backstage challenges of mounting two issue-driven plays simultaneously.

Length: 60 minutes
Airdate: 10/22/2013 10:00:00 PM
Service: PBS
Format: News
Segment Length: 00:00:00

"Nightmare bacteria." That's how the CDC describes a frightening new threat spreading quickly in hospitals, communities and across the globe. FRONTLINE reporter David Hoffman investigates the alarming rise of untreatable infections: from a young girl thrust onto life support in an Arizona hospital, to a young American infected in India who comes home to Seattle, and an uncontrollable outbreak at the nation's most prestigious hospital, where 18 patients were mysteriously infected and six died, despite frantic efforts to contain the killer bacteria. Fueled by decades of antibiotic overuse, the crisis has deepened as major drug companies, squeezed by Wall Street expectations, have abandoned the development of new antibiotics. Without swift action, the miracle age of antibiotics could be coming to an end.

Episode Title: Making Stuff Faster
Length: 60 minutes
Airdate: 10/16/2013 9:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

Are there physical limits to how fast humans can go? David Pogue wants to find out how much we can tweak physiology and engineering to move humans and machines even faster. He investigates everything from lightning-fast electric muscle cars to ultra-sleek sailboats to ultra-fast cameras and quantum teleportation. But faster is also about efficiency and the science of optimization: getting things done in less time. From the floor of the New York Stock Exchange to UPS headquarters and inside a packed 737, Pogue's quest for ultimate speed limits takes him to unexpected places where he comes face-to-face with the final frontiers of speed. NOVA also explores important questions: Is it possible to go too fast? Have we hit a point where innovation outpaces our ability to keep up?

Episode Title: Asteroids: Doomsday or Payday?
Length: 60 minutes
Airdate: 11/20/2013 9:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

The asteroid that exploded in the skies over Siberia injuring more than 1,000 and damaging buildings in six cities was a shocking reminder that Earth is a target in a cosmic shooting range. From the width of a football field to the size of a small city, these space rocks have the potential to be killers. In a collision with Earth, they could set off deadly blast waves, raging fires and colossal tidal waves. But some audacious entrepreneurs look at asteroids and see payday, not doomsday. Some asteroids are loaded with billions of dollars' worth of elements like iron, nickel and even platinum. While NASA plans an ambitious mission to return samples from a potentially hazardous asteroid, would-be asteroid miners are dreaming up their own program to scout for potentially profitable asteroids. Will asteroids turn out to be our economic salvation—or instruments of extinction?

Series Title: Red Metal: The Copper Country Strike of 1913
Length: 60 minutes
Airdate: 12/17/2013 8:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:00:00

An epic labor strike that devastated Michigan's Copper Country in 1913 haunts the American labor movement to this day. Among the notable elements of that strike was the death of 73 children at a union Christmas party, a tragedy immortalized by Woody Guthrie in his ballad "1913 Massacre," performed in the film by Steve Earle. The event remains the deadliest unsolved manslaughter in U.S. history. This program traces the Copper Country strike from its hopeful start to its heartrending conclusion. Between those endpoints, it explores the intensifying battle between organized labor and corporate power, as well as issues of immigration and technology. Richard Harris narrates.

Length: 60 minutes
Airdate: 11/17/2013 8:00:00 PM
Service: PBS
Format: Documentary
Segment Length: 00:55:10

From Dickens to Sherlock Holmes, Agatha Christie to James Bond — no police institution in the world has caught the public imagination in the same way as Scotland Yard. The name has become synonymous with London's police force, but actually comes from the location of the original police headquarters building. Its officers and "Bobbies" are often seen as protectors of the Royal Family and British officials, but Scotland Yard is most often associated with police detectives. Some contemporary sleuths reveal the secrets of what it takes to become a modern-day Sherlock Holmes and the program uncovers some grim and grisly details of detectives who have gone before.

NOLA: SUPB 000101 Stacked
Series Title: Superheroes: A Never-Ending Battle
Length: 180 minutes
Airdate: 10/15/2013 8:00:00 PM
Service: PBS
Format: Feature Film/Video Drama
Segment Length: 00:00:00

Episode 101: During the Depression, the popularity of dozens of superhero characters opens the door for a new generation of artists and writers. World War II creates a patriotic fervor for star-spangled adventurers to represent the American spirit at war and on the home front, but in the 1950s, superheroes are caught in the fire of government scrutiny and regulation. When the thrilling "Adventures of Superman" is broadcast on the new medium of television, America's first and greatest superhero leads the entire comic book industry to renewed strength.

Episode 102: In the 1960s, a new breed of superhero emerges in pages of Marvel Comics, inspired by the age of atomic energy and space travel and, in turn, inspiring the pop culture and pop artists of the time. Spider-Man, the Hulk and others are the first to have "problems" with which an adult audience can identify, and contemporary social issues make their way into comic books. Black powerhouses such as the Black Panther and Luke Cage appear on the scene, and the pages of "Green Lantern/Green Arrow" explode with relevant storylines as comic books are forced to confront the reality of an increasingly complex world.

Episode 103: Superheroes are enthusiastically embraced in all forms of media and by all demographics, beginning with the historic Superman movie featuring Christopher Reeve as the Man of Steel. In 1986, Batman is overhauled as The Dark Knight to reflect the nocturnal underside of his character, and Watchmen brings new sophistication to comic book narratives, illuminating a violent and politicized world. In the new millennium, superheroes have taken over popular culture with feature films, television shows and video games complementing a new generation of web-based comics that bring superhero adventures to every corner of the world.

Format: Documentary
Segment Length: 00:00:00

In October 2012, superstorm Sandy cut a path of devastation across the Caribbean and the East Coast, killing hundreds and doing tens of billions of dollars in damage. To many, it was a wake-up call. Now, one year after Sandy's deadly strike, NOVA follow up on the 2012 film Inside the Megastorm with a fresh investigation of the critical questions raised by this historic storm: Was Hurricane Sandy a freak combination of weather systems? Or are hurricanes increasing in intensity due to a changing climate? What can we do to prepare ourselves for the next Sandy, and what progress has been made toward making our urban infrastructure more resilient? Much of Sandy's wrecking power was due to an extreme storm surge that left large swaths of New York and New Jersey underwater. And with sea levels on the rise, flooding will only become more frequent. NOVA examines the role of global warming in driving these rising seas, and looks at some of the latest extraordinary engineering employed in other areas, as well as what it may take to make cities like New York more resilient in the future.

Segment Length: 00:00:00

Between the blue sky above us and the infinite blackness of space lies a frontier full of enigmas that scientists have only just begun to investigate. "At the Edge of Space" takes viewers on a spectacular exploration to probe the earth-space boundary zone, home to some of nature's most puzzling and alluring phenomena: the shimmering aurora, streaking meteors, and fleeting flashes that shoot upwards from thunderclouds, known as sprites. Discovered in 1989, sprites have eluded capture because they flicker into existence for a mere split-second — 40 times faster than an eye blink. NOVA rides with scientists in a high-flying weather observation plane as they hunt for sprites and finally succeed in snaring them in 3D video, gaining vital clues to unravel their mystery. NOVA also combines advanced video technology with stunning sequences shot from the International Space Station.

Service: PBS
Format: News
Segment Length: 00:00:00

The National Football League, a multibillion-dollar commercial juggernaut, presides over America's indisputable national pastime. But the NFL is under assault as thousands of former players and a host of scientists claim the league has covered up how football inflicted long-term brain injuries on many players. In this special investigation, FRONTLINE and prize-winning journalists Steve Fainaru and Mark Fainaru-Wada of ESPN reveal the hidden story of the NFL and brain injuries, drawn from their forthcoming book *League of Denial: The NFL, Concussions and the Battle for Truth* (Crown Archetype, October 2013). What did the NFL know and when did it know it? What's the truth about the risks to players? What can be done? The FRONTLINE investigation details how, for years, the league denied and worked to refute scientific evidence that the violent collisions at the heart of the game are linked to an alarming incidence of early onset dementia, catastrophic brain damage, death, and other devastating consequences for some of football's all-time greats.

Segment Length: 00:00:00

What happens when engineers open up nature's toolbox? David Pogue explores bold innovations inspired by the Earth's greatest inventor, life itself. From underwater wi-fi based on dolphin communication, to robotic "mules" and "cheetahs" for the military, to swarms of robotic bees, Pogue travels the world seeing the "wildest" ideas put into action in new inventions and technologies. It is a journey that sees today's bacteria turned into tomorrow's metallurgists, viruses building batteries, and even DNA, the Code of Life, put to work in "living" computers. Will the stuff of the future take on a life of its own?

Fifty years later, what can science tell us about the Kennedy assassination – and the investigations that followed? The 1963 murder, in broad daylight in front of hundreds of witnesses, was a homicide investigator's best-case scenario. Yet somehow the JFK assassination became a forensic nightmare, plagued by mishandled evidence, a controversial autopsy and, incredibly, a prime suspect murdered while in police custody before he could be tried – all of it captured on film. Now, NOVA follows a group of experts trying to unravel the lingering mysteries of the assassination: private investigator Josiah Thompson; gunshot wound authority Larry Sturdivan; laser scanning specialist Tony Grissim; medical examiner and forensic neuropathologist Peter Cummings; and firearms experts Lucien and Mike Haag.

Segment Length: 00:00:00

In this program, scientists around the world follow a once-in-a-lifetime event, the path of the sun-grazing comet ISON. The comet, somewhere between one and 10 kilometers in diameter, is currently just beyond the orbit of Jupiter. As it races past Earth toward the sun, it will likely develop a tail to light up the night skies. Then ISON will slingshot around the back of the sun, to emerge perhaps brighter than ever. But there's jeopardy, too; ISON could evaporate completely, or the sun's gravity could tear it apart, producing a so-called "string of pearls" – several small comets arching across the night sky. Don't miss the breathtaking images captured in this special.

Cold. For centuries we've fought it, shunned it and huddled against it. Cold has always been the enemy of life, but now it may hold the key to a new generation of science and technology that will improve our lives. David Pogue explores the frontiers of cold science, from saving the lives of severe trauma patients and cooling a warming planet to ultracold physics, where bizarre new properties of matter are the norm and the basis of new technologies like levitating trains and quantum computers. In this brave new world, cold isn't to be avoided. Cold is the new hot.

Imagine a school where the cool kids are the chess team. Welcome to I.S. 318. "Brooklyn Castle" tells the stories of five members of the chess team at a below-the-poverty-line inner city junior high school that has won more national championships than any other in the country. The film follows the challenges these kids face in their personal lives – and on the chessboard – and is as much about the sting of their losses as it is about anticipation of their victories. By Katie Dellamaggiore.
