

KUUL-FM
East Moline-Quad Cities, IA
 Quarterly Issues/Programs List
 Third Quarter, 2013
 October 8, 2013

Issues

KUUL-FM provides is listeners with programming and public service announcements that address issues of concern to our local community. Among the issues determined to be of most concern to the community during the preceding calendar quarter were:
• Arts and Entertainment: Research shows that the availability of Arts and Culture—everything from museums to parks and recreation systems—can greatly improve an area's quality of life.
• Child Cancer: Today's kids have the best odds ever to beat childhood cancers, but much remains to be done to eradicate these health threats.
• Children & Family: Raising children has never been easy, but in today's world, a myriad of new issues have come in to play which complicate things even further.
• Community: From road quality to sewer repair to garbage pickup, people of the Quad Cities are BIG on city basics.
• Economy: Greater coordination is needed between economic development efforts for the various communities that make up the Quad Cities metropolitan area. The Quad City Development Group is vital to this effort.
• Education: Providing educational opportunities for our area's children—as well as secondary education for our adults—are important building blocks to continued quality of life in our community.
• Environment: Our natural resources need to be protected for future generations; the price we pay for the "technology now" style of living we currently enjoy has ramifications—both now and for our descendants.
• Health: Recruiting doctors, nurses, and health techs has become more difficult as this need is everywhere in our country and, as a result these persons are living where quality of life is best.
• Mental Health: As federal and state(s) funding for mental health programs has been decreased; local agencies are increasingly challenged to keep up with the need.
• Science and Technology. Amazing advances have been made in technology have had an enormously positive effect on each of our lives. These advances—and the breakneck pace of tech growth—have also made our lives more complicated.
• Tourism: Many cities in the Quad Cities two-state area rely on tourism revenues. The rich history of the region is a big reason people like to visit.
• Veteran's Support: Treatment of all veterans, particularly those from the war against terror stationed in Iraq and Afghanistan, is an important issue to Quad Citians because of the number of Eastern Iowans who have been/are stationed in those countries.

Programs

Section I

Section I lists regularly scheduled and special programs that represent the station's issue-responsive programming providing the most significant treatment of the issues listed above for the calendar quarter.

Section I lists regularly-scheduled and special programs that represent the station's issue-responsive programming providing the most significant treatment of the issues listed above for the calendar quarter.

NETWORK [and/or SYNDICATED] PROGRAMMING

ISSUE	PROGRAM/TITLE	DESCRIPTION	DATE/TIME	DURATION
Consumerism	Radio Health Journal	Eating fruits and vegetables that are locally in season has many health benefits, but consumers also need to be careful of pesticides. Experts discuss.	08/17/14 7:00am	08:08
Consumerism	Radio Health Journal	Summer vacation can be marred by mosquito and tick bites and by the rash of poison ivy. Home remedies abound on the internet, but do any of them work? What does? Experts discuss the best ways to avoid these problems and get relief.	08/24/14 7:00am	12:31
Consumerism	Radio Health Journal	Most people know cystic fibrosis as a disease that clogs the lungs with mucous, but the same sort of mucous also clogs ducts for digestive secretions, making it very difficult for CF patients to digest food and get adequate nutrition. Two experts discuss the results of this problem and ways patients get around them.	08/31/14 7:00am	07:49
Consumerism	Radio Health Journal	Virtually all vertebrates yawn, but no one really knows why we do it. Experts discuss theories and the evidence behind them.	09/28/14 7:00a	06:59
Disabilities	Radio Health Journal	Most people don't understand Asperger's Syndrome, which affects high functioning people with autism. Most of those with the syndrome can't express what their lives are like, but here, one person with the syndrome articulates his unusual world.	08/03/14 7:00am	07:31
Disabilities	Radio Health Journal	Leisure travel is possible for people with disabilities if they plan well in advance and communicate their needs ahead of time. A travel writer with a disability discusses.	09/21/14 7:00a	08:19
Education	Radio Health Journal	The average deaf high school graduate reads at about a 4th grade level. Some schools are teaching a technique called cued speech to make phonics accessible to deaf people. Many educators say this helps with literacy. Experts explain and discuss.	07/06/14 7:00a	11:36
Family Relationships	Radio Health Journal	Nearly half of marriages end in divorce in the US. A college course at Northwestern Univ. seeks to give students tools to build relationships that last, with lessons for all of us. The course's teacher and a student who recently took the course explain.	09/07/14 7:00a	07:54
Health Care	Radio Health Journal	Some people who have a stroke in the brain stem suffer from a condition where they are fully conscious and aware, yet appear to be in a coma because they cannot move a muscle, except for sometimes the eyes. They may remain in this "locked-in" state for years.	07/06/14 7:00a	08:13
Health Care	Radio Health Journal	Back pain hits 80 percent of Americans at some point in their lives. An expert discusses why it can be so hard to diagnose and treat.	07/13/14 7:00am	07:07
Health Care	Radio Health Journal	Doctors have discovered that a transplant of fecal material from a healthy person into a sick one can cure sometimes fatal c. difficile infections more than 90 percent of the time. In the past, the "ick factor" has contributed to the technique being seldom used. That is finally starting to change, and researchers are looking for ways to clean up the procedure.	07/27/14 7:00am	11:14
Health Care	Radio Health Journal	People who get bariatric surgery often face drastically changed relationships with spouses, children, and friends. Their self-image also often needs repair, all while they've lost their most reliable old coping mechanism--food.	07/27/14 7:00am	08:31

Health Care	Radio Health Journal	Most Americans know that saturated fats are bad for their health. But some experts now say saturated fat has been unfairly vilified, the victim of bad science in the 1950's. Many of these scientists say the real culprit is carbohydrates in combination with fats. Other experts say the truth is much more complicated. Experts on both sides discuss the evidence.	08/03/14 7:00am	12:18
Health Care	Radio Health Journal	Millions of Americans will experience the slow loss of memory due to Alzheimer's disease. But what is it like for those going through it. A journalist describes how he hopes to provide the most detailed look yet as he progresses through early-onset Alzheimer's.	08/17/14 7:00am	12:42
Health Care	Radio Health Journal	Newborns born with virtually "half a heart" can now be saved through a series of surgeries rerouting their heart blood flow. An expert, a cardiac nurse and the mother of one such child discuss the successes and questions these procedures raise.	08/31/14 7:00am	12:28
Health Care	Radio Health Journal	Lupus results when the immune system turns on the body, producing inflammatory attacks on virtually any organ. Minorities of patients have lupus only on the skin, and while this is not life threatening, it can still be psychologically devastating.	09/14/14 7:00a	09:23
Homelessness	Radio Health Journal	New research is showing that a remarkably high proportion of homeless men have suffered a traumatic brain injury in the past, raising the possibility that TBIs may cause behaviors directly leading to homelessness.	09/07/14 7:00a	11:24
Pets & People	Radio Health Journal	Humans and animals share many diseases, and surprisingly, many behavioral disorders as well.	08/10/14 7:00am	08:11
Public Health	Radio Health Journal	Average life expectancy in the US is increasing, but among lower income people it is not, and the lifespan gap between rich and poor is increasing. Even middle class people have shorter lifespans than the rich. Experts discuss how a large income buys extra years of life, and why a lower income produces barriers to a longer life.	09/21/14 7:00a	12:06
Public Health	Radio Health Journal	Research is piling up showing that high school age students have a natural circadian rhythm that calls for them to sleep from about 11:00pm to 8:00am. Most schools start class before 8:00, leaving most students with a severe and detrimental sleep deficit. Experts discuss how a growing number of schools are pushing classes to later in the day for student benefit.	09/28/14 7:00a	12:41
Public Safety	Radio Health Journal	Police confrontations with mentally ill subjects can quickly turn tragic, as neither side often understands the other. Specially trained crisis intervention teams have spread around the country to prevent deaths, injuries, and unnecessary incarceration. Experts discuss how CIT works.	08/10/14 7:00am	11:48
Technology	Radio Health Journal	Silver nanoparticles provide germ resistant characteristics to anything containing them, so silver nano is being added to all kinds of consumer products, from teddy bears to computer hard drives. However, scientists aren't sure what the effects of silver nano is in the environment or on the human body.	07/13/14 7:00am	11:36
Traffic & Highway Safety	Radio Health Journal	Auto crashes kill more than 35,000 people in the US each year, but that toll is down dramatically even as speed limits have been going up. Engineers now realize that artificially slow speed limits can be more dangerous than high speeds.	08/24/14 7:00am	11:28
Youth at Risk	Radio Health Journal	Scientists have discovered that the way parents talk to their infants has a huge effect on their intellectual development and later success. Experts discuss why and how parents should hold "conversations" with their babies.	07/20/14 7:00am	11:49

Youth at Risk	Radio Health Journal	Some 700 American children under age 14 die of drowning each year. But when a child is pulled out of the water and revived, they may face life-threatening peril hours or days later as the body reacts. Experts discuss.	07/20/14 7:00am	07:23
Youth at Risk	Radio Health Journal	Use of prescription medications for mental disorders among children and adolescents is growing rapidly. An author, herself a Prozac user since age 17, discusses attitudes toward medications revealed in her extensive interviews with dozens of similar subjects.	09/14/14 7:00a	12:14

Section III

Section III lists public service announcements that the station broadcast during the preceding quarter that address community issues.
