**East Moline-Quad Cities, IA**  
 Quarterly Issues/Programs List  
 First Quarter, 2016  
 April 8, 2016

**Issues**

KUUL-FM provides its listeners with programming and public service announcements that address issues of concern to our local community. Among the issues determined to be of most concern to the community during the preceding calendar quarter were:
<ul style="list-style-type: none"> <li>• <b>Disabilities:</b> Though the Americans with Disabilities act became law in 1990, society continues to recognize new areas where we can all be made 'more equal'.</li> <li>• <b>Economic Development:</b> The overall health of our community is tied to its economic health. This health can only be maintained by sustaining the growth of area businesses.</li> <li>• <b>Education:</b> Providing educational opportunities for our area's children—as well as secondary education for our adults—are important building blocks to continued quality of life in our community.</li> <li>• <b>Environmental Issues:</b> Our natural resources need to be protected for future generations; the price we pay for the "technology now" style of living we currently enjoy has ramifications—both now and for our descendants.</li> <li>• <b>Food Safety:</b> More and more Americans are concerning themselves with the quality of the food they eat. From concerns about GMO's &amp; food additives to water quality--increasingly, people want to know where their dinner came from.</li> <li>• <b>Health:</b> Recruiting doctors, nurses, and health techs has become more difficult as this need is everywhere in our country and, as a result these persons are living where quality of life is best.</li> <li>• <b>Mental Health</b> As cutbacks have occurred in our federal spending, perhaps no area has been harder hit than the funding of mental illness programs.</li> <li>• <b>Politics:</b> The 2016 election--preceded by the Iowa caucuses and the Illinois primary--has meant an increase in the number of Quad City area visitors who also happen to be Presidential candidates.</li> <li>• <b>Tourism:</b> Many cities in the Quad Cities two-state area rely on tourism revenues. The rich history of the region is a big reason people like to visit.</li> <li>• <b>Veterans:</b> With a generation of veterans who have now served multiple tours overseas, their post-military treatment has become an important issue to Quad Citizens.</li> </ul>

**Programs**

**Section I**

Section I lists regularly scheduled and special programs that represent the station's issue-responsive programming providing the most significant treatment of the issues listed above for the calendar quarter.

**LOCAL PROGRAMMING**

*Note: Quad Cities Forum is a :30 minute show that airs weekly and frequently consists of more than one segment. The time listed is the show start time on that date.*

## Section II

Section I lists regularly-scheduled and special programs that represent the station's issue-responsive programming providing the most significant treatment of the issues listed above for the calendar quarter.

### NETWORK [and/or SYNDICATED] PROGRAMMING

*Note: Radio Health Journal is a :28 minute show that airs weekly and consists of two main segments.*

*The time listed is the show start time on that date.*

ISSUE	PROGRAM/TITLE	DESCRIPTION	DATE/TIME	SEGMENT DURATION
<b>Public Health</b>	Radio Health Journal	Millions of Americans suffer pain as a result of weather changes. Experts discuss different conditions affected by weather, why pain responds to weather changes and possible remedies to some of these maladies.	1/3/16 7:00a	11:52

<b>Environmental Issues, Pollution</b>	Radio Health Journal	The average American is exposed to more than 100 potentially toxic synthetic chemicals every day, and there is little oversight of their safety. A noted expert discusses the vast amount that we don't know about these chemicals, how the US might regulate them better, and how tougher regulation in other countries could help keep Americans safer.	1/3/16 7:00a	7:54
<b>Workplace Violence</b>	Radio Health Journal	Healthcare workers are about four times more likely than workers in any other field to be attacked on the job, usually by patients or family members, and most often in the emergency department. Experts discuss how and why attacks occur and how hospitals and health care workers can do a better job preventing them.	1/10/16 7:00a	12:23
<b>Health Care</b>	Radio Health Journal	Hip and knee replacements are common, and doctors now say ankle replacements have become technically good enough to make fusion obsolete for arthritis patients in pain. A doctor & patient discuss.	1/10/16 7:00a	7:54
<b>Ethics, Public Health</b>	Radio Health Journal	Scientists have developed the technology to edit single genes, which could eventually eliminate some inherited diseases. However, doctors don't know how such "germline editing" or errors in execution of it would affect other genes for generations to come, calling the practice into question.	1/17/16 7:00a	12:30
<b>Women's Issues, Public Health</b>	Radio Health Journal	Many women who can't or don't want to breastfeed their newborns are pressured into trying anyway. An expert and an author discuss the political forces creating unusual unanimity behind the issue, and the truth of health claims on breastfeeding's benefits.	1/17/16 7:00a	7:54
<b>Mental Health</b>	Radio Health Journal	A surprisingly high percentage of people who've been treated in intensive care units later suffer from post-traumatic stress disorder, often including hallucinations recalling horrible ICU incidents. This has led to coining a new syndrome--PICS, or post intensive care syndrome. Experts discuss why the syndrome appears to occur and what's being done to treat and prevent it.	1/24/16 7:00a	12:47
<b>Public Health, Food Regulations</b>	Radio Health Journal	Millions of people who think they have allergies, asthma, and sinus problems may actually have "silent reflux" which can travel up the esophagus all the way to the throat and head. An expert discusses telltale symptoms and the dietary triggers that can cause the disorder.	1/24/16 7:00a	7:12
<b>Public Health</b>	Radio Health Journal	Heart attacks that produce few if any symptoms may be mistaken for indigestion or simple malaise, but they can be more serious than heart attacks that bring crushing pain because they often don't bring a victim to the hospital for lifesaving help. Experts discuss.	1/31/16 7:00a	12:38
<b>Public Safety</b>	Radio Health Journal	Low-level systemic inflammation is being tied to many disorders including heart disease, and now research has even tied inflammation to intermittent explosive disorder, a syndrome of repeated rage. Experts discuss these findings and how inflammation can be combatted through diet and supplementation.	1/31/16 7:00a	7:12
<b>Developmental Disorders, Children at Risk</b>	Radio Health Journal	Synopsis: Stuttering has been blamed even fairly recently on parenting, but new research has several new findings: a structural deficiency in the brain's wiring in stutterers; an inability to perceive rhythms; and a much more successful way to treat stuttering. Experts discuss the new advances.	2/7/16 7:00a	11:39
<b>Food Safety</b>	Radio Health Journal	Super Bowl party snacks are prime territory for contamination via cross contamination and being dropped on the floor. A scientist who has studied both phenomena discusses the truth (or lack of truth) in two old myths.	2/7/16 7:00a	8:17
<b>Public Health, Government Regulation</b>	Radio Health Journal	Clinical trials are much of the basis for the practice of medicine. Funding of trials has dramatically shifted so that today, trials paid for by pharmaceutical and device makers outnumber publically funded trials 6-to-1. Some studies indicate this makes bias in trials more likely, jeopardizing public health. Experts discuss.	2/14/16 7:00a	13:30

<b>Health Insurance Costs, Public Health</b>	Radio Health Journal	American healthcare is the most expensive in the world. An expert author details some of the causes and possible solutions now being established.	2/14/16 7:00a	7:32
<b>Infectious Disease, Public Health</b>	Radio Health Journal	Mosquito-transmitted Zika virus has arrived in Central and South America, and while most people are not affected by it, the virus has been linked to microcephaly, a severe birth defect. Experts discuss the virus, how it's transmitted, its spread to the US, and how to protect yourself from it.	2/21/16 7:00a	13:17
<b>Food Additives, Health Care</b>	Radio Health Journal	Thyroid disease affects millions of Americans, many of whom have not been diagnosed. Experts discuss symptoms, causes, and treatments.	2/21/16 7:00a	6:15
<b>Psychology, Crime Prevention</b>	Radio Health Journal	It's a psychological paradox that the greater the number of people present when a person needs help, the less likely help will be rendered. Experts discuss reasons why this effect occurs, how it can be broken by technology, and the background of intense research into the effect sparked by the first internationally famous "bystander effect" crime.	2/28/16 7:00a	11:55
<b>Family Issues, Public Health</b>	Radio Health Journal	Egg donation can solve infertility, but it can be a minefield of emotional risks, especially if the donor and recipient are family or friends. An author/journalist who has donated twice with vastly different results discusses the technology and what to look out for when approaching egg donation.	2/28/16 7:00a	8:08
<b>Health Care Economics</b>	Radio Health Journal	Many primary care doctors are unhappy with the "factory medicine" they have to practice. Some are creating "concierge medicine" practices in response, cutting patient roles and asking for retainer fees from those that remain. Patients receive much longer appointments, greater access, and more personal care for these higher fees. Two concierge doctors and a patient discuss.	3/6/16 7:00a	12:20
<b>Health Care, Family Issues</b>	Radio Health Journal	Restless legs syndrome, a neurological condition, strikes people at night, creating some of the worst sleep conditions known by any patients. Experts discuss identifying and treating the syndrome.	3/6/16 7:00a	8:08
<b>Emergency Response, Public Safety</b>	Radio Health Journal	Paramedics and EMTs are the first responders of the health system and often find violent, confusing situations on their arrival. A former paramedic describes the "inside story" of the job, its dangers and rewards.	3/13/16 7:00a	11:46
<b>Youth at Risk, Family Health</b>	Radio Health Journal	Patients often keep lifestyle secrets from their physicians even though it may be harmful to their health. Experts discuss the most common reasons for secret-keeping and the consequences that may result.	3/13/16 7:00a	7:32
<b>Technology and Society</b>	Radio Health Journal	Genetic testing has become a widespread reality in the past five years, but doctors are struggling with what many genetic findings really mean. Should patients be told about the presence of genes that might be either dangerous... or perfectly harmless? Experts discuss.	3/20/15 7:00a	11:24
<b>Public Health, Dietary Education</b>	Radio Health Journal	Many experts disagree over the roots of the obesity crisis some 40 years ago. One well-known expert describes why he believes sugar is to blame, and the changes in the market and government advisories that made sugar a much heavier part of our diets.	3/20/16 7:00a	7:24
<b>Public Health</b>	Radio Health Journal	Doctors often deal with bacterial infections, but they are less familiar with infections involving several different kinds of bacteria in a matrix. This form, known as biofilm, is surprisingly common, resistant to many antibiotics, and gaining new attention as a source of hard to eradicate infections. Experts discuss	3/27/16 7:00a	11:51
<b>Youth at Risk, Public Health</b>	Radio Health Journal	Young adolescents often are allowed to take over the counter drugs on their own, but many OTC medicines, especially acetaminophen, can be dangerous. Experts discuss how to educate tweens on taking OTC drugs safely.	3/27/16 7:00a	7:24

**Section III**

Section III lists public service announcements that the station broadcast during the preceding quarter that address community issues.
